For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., or any of the Field Offices of the Department of Commerce. — Price \$6.50

## PREFACE

This is one of a series of three volumes presenting final results of the 1954 Census of Manufactures. The 1954 Census was a large-scale undertaking which depended upon significant contributions from a great number of private and public organizations and individuals. Essential to the success of the Census, of course, was the excellent cooperation of some 280,000 manufacturing establishments in completing the appropriate report forms.

Hundreds of trade associations and thousands of individual manufacturers--large, medium, and small--as well as Government agencies and other data users provided valuable counsel in determining the types of information which would be of maximum usefulness. Among the Government agencies, the Bureau of the Budget, Business and Defense Services Administration, Bureau of Labor Statistics, Bureau of Mines, Department of Agriculture, the Office of Business Economics, the Board of Governors of the Federal Reserve System, and the Tariff Commission made especially important contributions to the 1954 Census. Also noteworthy was the assistance of the Advisory Council on Federal Reports in advising upon the feasibility of collecting various types of data and in participating in efforts aimed at minimizing the reporting burden. Support by the United States Chamber of Commerce, the National Association of Manufacturers, and other business groups, and timely publicity given to the Manufactures Census by the press, television, and radio aided materially in the collection of the reports.

The primary responsibility for the 1954 Census of Manufactures was centered in the Industry Division of the Census Bureau. Other divisions of the Bureau, particularly the Economic Operations Division, Machine Tabulation Division, Field Division, Administrative Service Division, and the Electronic Systems Branch, also had important functions in the Census.

The Manufactures Census was taken under the supervision of Maxwell R. Conklin, Chief of the Industry Division. The individuals listed in the organization structure of the Division shown on the opposite page carried the principal responsibility for the Census within the Division. Other Industry Division staff personnel also had important responsibilities in various phases of the Census. Their individual and collective contributions were essential to the completion of the census and of greater significance than would ordinarily be inferred from the mere alphabetic listing of their names which follows: Daniel Arrill, John J. Bartosiewicz, Paul F. Berard, Martin Bloom, Evelyn W. Colburn, Alice K. Cullen, Angela R. Daly, Jerome Deitch, M. Audrey Dickerson, Robert J. Dressel, David M. Fishbein, Edward D. Gruen, Arthur W. Horowitz, Shirley Kallek, Alvin S. Lubeck, Martin L. Marimont, Reese R. Morgan, Richard J. Rice, Albert A. Schulman, Charles H. Wittman, and John J. Zirkle, Jr. These individuals merited recognition for their participation in the development of the Census inquiries, the preparation of the report forms and instructions, the design of specifications for editing and coding the returns and the preparation and review of final text and tables. In a broader sense, special mention is due the entire staff of the Industry Division and a large number of people in other divisions of the Bureau during the collection, processing, tabulation, and publication of data from the 1954 Census of Manufactures.

Processing of the 1954 Census of Manufactures reports was performed by the Economic Operations Division under the supervision of Marion D. Bingham, Chief, Irving Weiss, Assistant Chief for Processing, and Sol Dolleck, Assistant Chief for Systems Development. Milton D. Lieberman, Chief of the Manufactures Census Branch and Sol Dolleck who succeeded him in that position on October 24, 1955 were assisted by Herman Hess, Walter A. Hines, Mary H. Johnson, Joseph M. Schubert, and Donald E. Young. Samuel Schweid contributed to certain procedural aspects of the Census and Robert Hansen to the Univac programming of the editing and tabulation phases.

Donald K. Heiser, Chief of the Electronic Systems Branch, and Rudolph M. Micoly, Chief of Operations for the Branch, were responsible for the utilization of electronic computer and accompanying high-speed printer equipment in the Census.

C. F. Van Aken was Chief of the Machine Tabulation Division and, in that division, Catherine M. Neafsey, Chief, Economic Section, and Emil Gorgovits were responsible for the machine tabulation procedures used in the Manufactures Census.

In the Field Division, Jack B. Robertson, then Chief of Division, and Ivan G. Munro, Assistant Chief, were responsible for directing the field work for the Census of Manufactures. George Klink, Branch Chief, supervised the collection of reports from Eastern sawmills that were not included in the Census mail canvass.

Julius Shiskin, Chief Economic Statistician in the Office of the Assistant Director for Statistical Standards, as well as Harold T. Goldstein and Irving Rottenberg of that office, contributed to the coordination of the Manufactures Census with the Censuses of Business and Mineral Industries and to several phases of the planning and processing of the Censuses. In addition, Mr. Goldstein assisted in the planning and preparation of the textual material for the industry reports.

Robert H. Brooks, Chief of the Graphics Branch of the Administrative Service Division, was responsible for preparing the Census of Manufactures publications for reproduction. Elma D. Beynon and Ingrid L. Millison of the Statistical Reports Division reviewed text material and table forms, and assisted on publication problems.

## 1954 CENSUS OF MANUFACTURES FINAL REPORTS

### Volume I: SUMMARY STATISTICS

Chapter	Chapter
I. General Summary	VII. Horsepower of Power Equipment
II. Employment and Payrolls	VIII. Fuels and Electric Energy Consumed
III. Size of Establishments	IX. Industrial Water Use
IV. Type of Organization	X. Selected Materials Consumed
V. Manufacturers' Inventories	XI. Industry Specialization of Establishments
VI. Expenditures for Plant and Equipment	XII. Selected Metalworking Operations
SPECIAL REPORT: Manufacturing Activity in Government Establishments. The special report also appears in Volumes II and III.	
Chapters I–XII also issued as separate reports in Bulletin Series MC–200.	

### Volume II: INDUSTRY STATISTICS

Separate chapters for each of 81 groups of related industries. These chapters include, for approximately 460 individual industries, statistics on employment and payrolls, inventories, capital expenditures, fuels, electric energy, and power equipment as well as quantities and values of

individual products made and materials used. Also included in this volume is a general summary chapter and separate summary chapters for each of the 20 major industry groups. (The 81 industry group chapters were issued as separate reports in Bulletin Series MC–20A–MC–39E.)

### Volume III: AREA STATISTICS

Separate chapters for each State, the District of Columbia, and Alaska and Hawaii. Statistics for standard metropolitan areas, counties and cities, and States by industry with cross classification by industry group for large standard metropolitan areas and principal counties. Also

included in this volume is a summary chapter for each of the nine geographic divisions (The State chapters were issued as separate reports in Bulletin Series MC–100.)

This volume includes preprinted portions of previously published State Bulletins (Series MC-101-151) and the general summary bulletin (Series MC-201). The pages of each report were numbered independently; page numbers of State reports consist of two parts, the first part being a State designation numbered in alphabetic order of the States. Thus, page 101-1 is page 1 of the report for the State of Alabama; page 149-6 is the last page of the report for the State of Wyoming (bulletin MC-149).

Corrections made after bulletins were issued are listed following the appendices.

### 1. Historical Note

The 1954 Census of Manufactures is the twenty-fifth such census of the United States. The first Census of Manufactures covered 1809. A census was taken at 10-year intervals thereafter to 1899 (with the exception of 1829). It was conducted at 5-year intervals from 1904 through 1919, and every other year from 1921 through 1939. The census was suspended during World War II, but was resumed in 1947. Legislation enacted in 1948 provided for a Census of Manufactures every 5 years, with annual sample surveys authorized for interim years. Such Annual Surveys of Manufactures were taken covering the years 1949 through 1953.

The 1954 Census, originally scheduled for 1953, is the first complete one since 1947, the next one is scheduled for 1958. For 1954, it was conducted jointly with the Censuses of Business (Wholesale, Retail, and Services) and Mineral Industries, covering the continental United States, Alaska, and Hawaii. Separate Censuses of Manufactures and Business for 1954 were also conducted in Puerto Rico jointly with the Commonwealth Government.

### 2. Publication of the 1954 Census Results

Results of the 1954 Census of Manufactures are published in three volumes: Volume I, Summary Statistics, shows comparative statistics for industries, States, and principal metropolitan areas for the more important measures of the activity of manufacturing establishments—employment, payrolls, inventories, capital expenditures, value added by manufacture, important materials consumed, etc.; Volume II, Industry Statistics, is a consolidation of reports for the 81 groups of industries and shows detailed information on individual industries and products. Volume III, Area Statistics, shows for each State and its important metropolitan areas and industrial counties, general statistics (number of establishments, number of employees, payrolls, value added by manufacture, and capital expenditures) for each of the industries of consequence in that State or in its principal metropolitan areas. Totals for all manufacturing are shown for all counties and for cities of 10,000 inhabitants or more. Supplemental reports such as that covering the Index of the Physical Volume of Production are also published.

### 3. Significance of the Manufacturing Sector of the Economy

Manufacturing is the largest of the industrial sectors in the economy. Table A below shows that manufacturing accounted for approximately 30 percent of the total national income. The next largest sector, wholesale and retail trade, contributed only slightly in excess of 17 percent.

Table B shows the relative importance of the major industry groups within manufacturing based on value added by manufacture. It should be noted that the concept of value added by manufacture which is used by the Bureau of the Census is different from the national income measure used by the Office of Business Economics. See section 23 of this Introduction: Value added by Manufacture, for discussion of the two concepts.

Table A.—NATIONAL INCOME BY PRODUCING SECTOR, 1954

(In millions of dollars)

Industry group	National income	Percent of total
All industries, total.....	298,335	100
Manufacturing.....	89,555	30
Agriculture, forestry and fisheries.....	16,688	6
Mining.....	5,021	2

38	Instruments and related products.....	2,129	2
39	Miscellaneous manufactures.....	4,473	4
19	Ordnance and accessories.....		

#### 4. Definition of Manufacturing Industries

The 1954 Census of Manufactures covers all establishments primarily engaged in manufacturing as defined in the Standard Industrial Classification Manual, Volume I, Manufacturing Industries, dated November 1945, as amended by the Bureau of the Budget. This system of classification is in general use among Federal agencies. The Manual defines manufacturing as the mechanical or chemical transformation of inorganic or organic substances into new products. The assembly of component parts of products is also considered to be manufacturing if the resulting product is neither a structure nor other fixed improvement. These activities are usually carried on in plants, factories, or mills, which characteristically use power-driven machines and materials-handling equipment.

Manufacturing production is usually carried on for the wholesale market, for transfer to other plants of the same company, or to the order of industrial users or government departments rather than for direct sale to the household consumer. Some manufacturers in a few industries sell chiefly at retail to household consumers through the mail, through house-to-house routes, or through salesmen. Some activities of a service nature (enameling, engraving, etc.) are included in manufacturing when performed primarily for the trade but are considered nonmanufacturing when performed primarily to the order of the household consumer.

The Standard Industrial Classification was developed on the basis of the following principles:

(1) The classification should conform to the existing structure of American industry;

(2) The reporting units to be classified are establishments rather than legal entities or companies; each establishment is classified according to its major activity;

(3) To be recognized as an industry, each group of establishments must have significance from the standpoint of value of sales, employment and other important economic measures. In addition, it is essential that each industry comprise a group of establishments whose output of the products defining the industry (primary products) accounts for a relatively high proportion of the total shipments of the industry as well as of the total shipments of these primary products by establishments in all manufacturing industries.

The Standard Industrial Classification Manual, issued November 1945, was amended slightly by the Bureau of the Budget prior to the 1954 Census. In classifying establishments by industry in the 1954 Census of Manufactures, the Census Bureau followed the amended version of the Standard Industrial Classification. The amendments to the 1945 edition of the standard classification are described in detail in Appendix B.

The following types of activities, while having many of the characteristics usually found in manufacturing, are defined as nonmanufacturing by the Standard Industrial Classification and, therefore, are excluded from the Census of Manufactures:

(a) Processing on farms when the raw materials are grown on the farm and the manufacturing activities (poultry dressing, milk and butter production, logging) are on a small scale without extensive use of paid labor. Also custom milling, cotton ginning, and similar activities.

(b) Mineral preparation such as the crushing, screening and concentrating of ores. However, mining performed as a secondary activity in conjunction with manufacturing is included in the Census of Manufactures; for example, stone and clay mining at cement, lime and clay products plants.

(c) Custom work to the individual order of household consumers. Examples are custom tailoring, woodworking, lettering on monuments, setting of diamonds and the making of orthopedic appliances.

(d) Repair and other service activities, except specified services performed "for the trade." Machine shops engaged exclusively or almost exclusively in repair work and repair shops of railroads are also excluded.

(e) Production of coke for own use by establishments owned by public utility companies.

Consistent with the Standard Industrial Classification, the Manufactures Census does not cover manufacturing when performed (1) by retail establishments which sell most of their products on the premises directly to household consumers, e.g., retail bakeries, ice cream stores, and feed stores, (2) by contractors at the site of construction, e.g., production of paving mixtures (3) by educational, eleemosynary and penal institutions.

It is not unusual for manufacturing establishments to engage also in such nonmanufacturing activities as repair work, merchandising of products without further processing, and installation work. Ordinarily, such nonmanufacturing receipts are small in relation to the manufacturing activities and, in such instances, it is not difficult to determine that the establishments should be included in the manufacturers area. However, where these nonmanufacturing activities account for a significant proportion of total receipts of an establishment, the allocation of that establishment to the appropriate major economic sector is more difficult.

In the 1954 Economic Censuses, an establishment engaged in a combination of manufacturing and merchandising was assigned either to the manufacturing or the trade industries depending on which of these activities was estimated to account for the larger share of its "value added" or "income produced." This criterion, even though based on an approximation, was considered preferable to reported dollar volume of receipts from each type of activity, since manufacturing requires considerably more man-hours, salaries and wages, and other inputs per dollar of receipts than either wholesaling or retailing. In the case of establishments engaged in manufacturing and also in mining, repair work, installation or other nonmanufacturing services, dollar receipts were used as a reasonably valid basis of classification because these activities require substantially comparable inputs per dollar of receipts.

The concurrence of the Censuses of Manufactures, Business and Mineral Industries in the same year provided a more complete universe from which to canvass and classify establishments than did the previous Census of Manufactures which was taken a year before the 1948 Census of Business. Establishments engaged in a combination of manufacturing and nonmanufacturing activities or factories incorrectly mailed a Business or Mineral

Industries report form (and vice versa) were included in the appropriate Census on the basis of the nature of business description and other information, such as products made or resold or services performed called for on the Census report forms. However, the resulting improvement in the coverage of manufacturing between the two Census years was generally limited to small plants in certain industries and did not appreciably affect comparability of data for manufacturing as a whole or for the great majority of industries. For those industries where there is a problem of comparability for this reason, e.g., poultry dressing, tobacco stemming and redrying, the descriptive text for the industry affected discusses the nature of the change.

Data were obtained on the manufacturing activities during 1954 of establishments owned and operated by the Federal Government (military arsenals, Navy yards, etc.) and of Federal and State prisons for the purpose of presenting complete information on manufacturing operations in the United States. Statistics on the employment, value added by manufacture and products manufactured by these establishments are shown in a separate chapter in each Manufactures Volume. Such data are not included elsewhere in the Census tables and, thus, are not represented in any of the individual industry or industry group totals appearing in the Volumes. Information on Government-owned, privately-operated establishments is included throughout the Census tables in the appropriate 4-digit industry on the same basis as privately-owned and operated plants.

### 5. Definition of Establishment

The Census of Manufactures is conducted on an establishment basis. That is, a company operating establishments at more than one location is required to submit a separate report for each location; also, companies engaged in distinctly different lines of activity at one location are required to submit separate reports if the plant records permit such a separation and if the activities are substantial in size. Census tabulations of establishment reports, therefore, differ substantially from those prepared on a company basis, i.e., from consolidated reports which not only combine manufacturing activities at different locations (thereby eliminating interplant transfers) but also include the nonmanufacturing activity of the company. Census figures will also differ to some extent from other tabulations based on establishment reports where the definition of an establishment as to location and line of activity is not applied in the same way.

The requirement that distinct lines of activity at the same location be separately reported was selectively applied. Consolidated activities at a single location are of two general types: (1) Where vertically integrated processes are present; that is, where basic or intermediate materials are produced for use in manufacturing final products of the plant. These are typified by the integrated paper mill which produces pulp, converts that pulp into paper and frequently goes on to make a variety of converted paper products; the steel mill which is integrated with a blast furnace and coke oven; and the operation of foundries, forge shops, etc., by plants producing machinery or other metal products. Typically, separate reports were obtained in the 1954 Census for the pulp-paper-paper converting or blast furnace-coke-steel mill types of integration. Much less commonly, and in fact only when it was more convenient for the company to report that way, was a separate census return submitted for integrated operations of the captive foundry or forge shop type. There are certain uncommon types of vertical integration such as tin can plants at canneries and steel mills at metalworking plants, which were usually separately reported. (2) Where the establishment produces and ships significant amounts of products classified in different S.I.C. industries. In widely varying degrees this product overlap exists in many manufacturing establishments. Generally, the amounts involved are not of serious proportion and, even if feasible, the filing of separate reports would not be warranted as a practical matter. However, there are a number of plant locations at which 100 or more employees are engaged in each of two or more distinct lines of manufacturing as defined in the Standard Industrial Classification. The Census Bureau requested separate reports in such instances in the 1954 Census, pointing out to the respondent that a limited amount of proration or esti-

mating was acceptable in the preparation of such reports. For the most part, the effort was successful, particularly in the case of very large operations where failure to "split out" the different activities would have significantly distorted the relationship of the industry and product statistics. Not infrequently, though, the two groups of products were made on the same production lines, by many of the same employees, and could not be distinguished sufficiently in the companies' records to provide establishment-type reporting. The extent to which such separations could not be achieved combined with the overlap contributed by the smaller plants (those with less than 100 employees) is shown for each industry in Tables 5A and 5B of the appropriate chapter of Volume II, Industry Statistics. It is planned that the 1954 Census of Manufactures will be the last one in which separate reports will be required for the several major activities at integrated paper mills and steel mills, although it is expected that selected key items of information will be obtained separately for the major types of activities.

For the 1954 Census, as for earlier censuses, a minimum size limit was set for establishments to be included. In both the 1954 and 1947 Censuses, reports were required from all establishments employing one or more persons at any time during the census year, whereas in prior censuses, establishments with less than \$5,000 value of products were excluded. The change in the minimum size limit in 1947 does not appreciably affect the historical comparability of the Census figures except for data on number of establishments for a few industries.

### 6. Industry Classification of Establishments

Each of the establishments covered in the census was classified in one of approximately 450 manufacturing industries in accordance with the industry definitions embodied in the Standard Industrial Classification system (see Appendix A). Under this system of classification, an industry is generally defined as a group of establishments producing a single product or a more or less closely related group of products. The product groupings from which industry classifications are derived are based on such considerations as whether they are typically produced by the same establishment, similarity of manufacturing processes, types of material used, types of customers, and the like. The group of products assigned to an industry is said to be "primary" to that industry. Accordingly, an establishment is classified in a particular industry if its production of the primary products of that industry exceeds in value, its production of products of any other single industry. In a few instances, however, the industry classification of an establishment is determined not only by the products it makes but also by the processes employed or materials used in making those products.

While some establishments produce only the primary products of the industry in which they are classified, it rarely happens that all the establishments in an industry specialize to this extent. The general statistics (employment, inventories, value added by manufacture, etc.) shown for an industry, therefore, reflect not only the primary activities of the establishments in that industry but also their activities of a secondary nature. For this reason, in relating industry statistics to product statistics showing shipments by all industries of the primary products of that industry, the composition of the industry's output as shown in Tables 5A and 5B of the Industry Volume should be considered. The extent to which industry and product statistics can be related is measured by two ratios which are available in Table 5A of the Industry Volume. The first of these ratios, called the primary product specialization ratio, describes the proportion of product shipments (both primary and secondary) of the industry represented by primary products. The second, defined as the coverage ratio, is the proportion of primary products shipped by the industry to total shipments of such products by all manufacturing industries.

The primary product specialization ratio measures the homogeneity of each 4-digit industry only in terms of the final products of its establishments. The industry may lack high homogeneity, and many of them do, in other equally or more important characteristics such as processes used, materials consumed, etc. There is substantial variation in types of produc-

tion processes and in the degree of integration of those processes for individual plants within separate S.I.C. industries throughout the classification structure. This may occur because of the variety of products falling into a single industry classification, e.g., industries such as photographic equipment, scientific instruments and toys. However, even where the primary products of the industry are reasonably narrowly defined, the processes carried on by particular establishments in the industry may be markedly different.

There are many examples of diversity of manufacturing operations among establishments in an industry. In the Woolen and Worsted Fabrics Industry, some of the plants perform all the operations from processing the raw fiber to the finishing of the fabric whereas other plants in the same industry limit their activities to weaving the fabric. In the metal fabricating industries, plants may operate a wide variety of metal processing departments (e.g., foundry, machine shop, plate fabrication) or may be solely engaged in the assembly of component parts purchased from other manufacturers. For example, in the refrigeration industry (Industry 3585) there are instances of almost complete integration in which the production of the compressor and condensing unit, electric motor and even the stamping of the case as well as the final assembly are all carried on at one plant. There are also strictly assembly plants and plants with various combinations of particular processes to be found in that industry.

These differences among plants in the same industry have a profound effect on the relationship between labor costs and material costs. As a consequence, in many industries there is a wide dispersion among individual establishments in such important ratios as payrolls to shipments and material costs to shipments. The 1954 Census does not provide any across-the-board measure of this diversity as it does for product mix through the specialization ratio.

For many industries, separate statistics are given on the manufacture of intermediate products for use within the same plant. This practice has been followed for many earlier censuses in the pulp and paper, textile fiber, yarn and fabric and certain chemical industries. In the 1947 and 1954 Censuses, the approach was expanded to include captive castings, motor and engine facilities and for the entire metalworking area an inquiry was added to show captive metal fabricating facilities such as stamping facilities, machine shops, and the like.

The texts in the Industry Volume describe the nature of variations in types of processes used and the production of intermediate parts and components in the same plant for those industries where such situations are especially significant. Differences in the integration of production processes, types of operations and the like should be taken into consideration together with the specialization and coverage ratios when using the industry statistics (employment, value added, materials used, etc.) and in relating these figures to the product data.

## 7. Comparability of Data with the 1947 Census of Manufactures

The 1947 figures include revisions of previously published 1947 Census totals and are comparable with the 1954 data (except as specifically noted in the tables or accompanying text.)

Two important changes were made in the scope of the 1954 Census of Manufactures which affected the comparability of State and selected industry statistics with the data from the 1947 Census of Manufactures.

(a) In the 1954 Census of Manufactures, the processing of milk (pasteurizing, homogenizing, vitaminizing, bottling) was defined as a manufacturing activity. For the 1947 Census establishments shipping any fluid milk were excluded from manufacturing industries regardless of their primary activity, in accordance with the 1945 edition of the Standard Industrial Classification Manual. Furthermore, in 1954 establishments processing and distributing fluid milk and other dairy products were classified on the basis of the primary product or activity of the establishment.

(b) In the 1947 Census of Manufactures, Logging Camps and Contractors (S.I.C. 2411) were excluded. In addition, only Sawmills and Planing Mills (S.I.C. 2421) that cut more than 200,000

board feet of lumber were included. On the other hand, for 1954, all loggers and sawmills with one or more paid employees as reported to the Bureau of the Old-Age and Survivors Insurance were included in the Census. In 1954, the loggers accounted for more than 11 percent of the national employment in Major Industry Group 24, Lumber and Wood Products. It is estimated that sawmills and planing mills producing less than 200,000 board feet accounted for less than 2 percent of national employment for the group.

The above changes have been noted in the appropriate tables and where significant, data are provided on a comparable basis for the two census years.

## 8. Geographic Areas

(a) Census divisions and regions.—In order to present census data at a level intermediate between the United States and the individual 48 States, the Census Bureau has used regional groupings for over a century. Since the 1909 Census of Manufactures, the present nine geographic divisions have been used. Beginning with the 1939 Census, the nine divisions were grouped also into four major geographic regions; Northeast, South, North Central and West.

Not only are these groupings convenient for the summary presentation of census data below the U. S. level, but they are essential to presenting maximum geographic information for those individual industries in which application of the Census disclosure law precludes the publication of individual State data. (See section on "Confidentiality of Data for Individual Companies" for a discussion of the disclosure rules.) The relative importance of manufacturing in 1954 among the several States and regions is shown in Table C.

(b) Standard metropolitan areas.—In addition to the legally constituted geographic units—States, counties, and cities—"All manufacturing" totals have been tabulated for the approximately 170 standard metropolitan areas, while industry group (3-digit) statistics have been tabulated for those areas reporting at least 40,000 manufacturing employees either in 1947 or 1954. (Industry group statistics for such areas are presented in Area Volume Table 5. There are 62 areas meeting this employment criterion.)

Except in New England, a Standard Metropolitan Area is a whole county or group of contiguous counties which contain a city (or cities) of 50,000 inhabitants or more. The inclusion of contiguous counties in a Standard Metropolitan Area is determined by the application of certain criteria aimed at measuring the metropolitan character of the county or counties and the degree of social and economic integration with the central city. An area may contain not only highly industrialized counties but also adjoining counties which, though primarily residential in character, contribute significantly to the industrial counties' labor force. A standard metropolitan area is generally more restricted than the market or trading area. In the New England States, similar integration criteria have been applied in defining standard metropolitan areas, but on a city and town, rather than on a county basis. The town is a more satisfactory statistical unit than the county in this region of the country. The Standard Metropolitan areas were defined by the Federal Committee on Standard Metropolitan Areas of the U. S. Bureau of the Budget for general-purpose use throughout the Federal government in presenting economic and social data.

The requirement that each standard metropolitan area consist of county units (except in New England) sometimes results in the inclusion in an area of a considerable amount of territory which would not ordinarily be considered "metropolitan," much less "industrial." It is recognized that metropolitan areas could be more accurately defined in terms of smaller area segments such as minor civil divisions, but the usefulness of areas so defined would be limited by the fact that many types of economic and social data are available only on a county basis. Moreover, so far as the Census of Manufactures is concerned, the inclusion in the metropolitan area of large tracts of agricultural or forest land is of little importance, since their contribution to the industrial activity of the area is usually negligible.

Table C.--VALUE ADDED BY MANUFACTURE BY DIVISION AND STATE, 1954

Division and State	Value added by manufacture (millions)	Per-cent	Division and State	Value added by manufacture (millions)	Per-cent	Division and State	Value added by manufacture (millions)	Per-cent
United States, total	\$116,913	100.0	West North Central--Con.			West South Central..	\$5,721	4.9
New England.....	9,128	7.8	Missouri.....	\$2,727	2.3	Arkansas.....	457	.4
Maine.....	565	.5	North Dakota.....	35	.1	Louisiana.....	1,182	1.0
New Hampshire.....	409	.3	South Dakota.....	78	.1	Oklahoma.....	581	.5
Vermont.....	223	.2	Nebraska.....	394	.3	Texas.....	3,502	3.0
Massachusetts.....	4,356	3.7	Kansas.....	1,049	.9			
Rhode Island.....	697	.6	South Atlantic.....	10,658	9.1	Mountain.....	1,505	1.3
Connecticut.....	2,877	2.5	Delaware.....	353	.3	Montana.....	141	.1
Middle Atlantic.....	30,402	26.0	Maryland.....	1,889	1.6	Idaho.....	182	.1
New York.....	14,149	12.1	District of Columbia	157	.1	Wyoming.....	51	.1
New Jersey.....	6,331	5.4	Virginia.....	1,629	1.4	Colorado.....	472	.4
Pennsylvania.....	9,930	8.5	West Virginia.....	988	.8	New Mexico.....	126	.1
East North Central.....	36,501	31.2	North Carolina.....	2,210	1.9	Arizona.....	192	.2
Ohio.....	10,165	8.7	South Carolina.....	1,041	.9	Utah.....	276	.2
Indiana.....	4,625	4.0	Georgia.....	1,592	1.4	Nevada.....	63	.1
Illinois.....	9,669	8.3	Florida.....	798	.7	Pacific.....	11,184	9.6
Michigan.....	8,707	7.4	East South Central.....	4,702	4.0	Washington.....	1,549	1.3
Wisconsin.....	3,334	2.8	Kentucky.....	1,236	1.1	Oregon.....	1,037	.9
West North Central.....	7,114	6.1	Tennessee.....	1,679	1.4	California.....	8,598	7.4
Minnesota.....	1,595	1.4	Alabama.....	1,319	1.1			
Iowa.....	1,236	1.0	Mississippi.....	468	.4			

Note: Detailed figures may not add to the totals because of independent rounding.

Each standard metropolitan area is designated by the name of the principal city of the area. In addition to the name of the principal city, the area title may include a maximum of two additional city names.

(c) Principal industrial counties.--In addition to industry group (3-digit) statistics for standard metropolitan areas with 40,000 or more manufacturing employees, the Census of Manufactures presents data in Area Volume Table 6, by major (2-digit) industry groups, for each "principal industrial county." A "principal industrial county" is one having 20,000 or more manufacturing employees in either 1947 or 1954. (There are 143 counties, or their equivalents, meeting this criterion.)

Although it is not feasible to show detailed industry data for most counties because of the disclosure law, the principal industrial county statistics supplement the data for metropolitan areas in two ways: First, they provide industrial information for the principal counties of some of the smaller metropolitan areas (many of which are, in fact, one-county-areas). Second, they provide information on the variations by county in industrial structure within the larger multicounty metropolitan areas.

(d) Cities of 10,000 inhabitants or more.--As in 1947, summary totals are presented for each individual city having 10,000 inhabitants or more. No industry detail is shown for individual cities. Because of the precedence given to standard metropolitan areas and principal industrial counties, most industry data even for large cities would necessarily be withheld from publication to avoid disclosure of individual company data by subtraction.

(e) Water use regions.--To present data on water use in manufacturing, together with related Census data on manufacturing activity, the country was divided into 18 water use regions. These regions typically represented combinations of river basins. The definitions of these water use regions were developed in consultation with other federal agencies having responsibilities for water development or use and with representatives of private industry.

Boundaries of water use regions generally follow the summits of watersheds and do not follow State boundaries. For practical reasons, however, water use regions are defined in terms of whole counties. Statistics are presented in the Summary Volume for each of these regions on the ratio of gallons of water intake per employee in addition to the total gallons of water intake, source of water, etc. Similar information is also presented for selected industries and counties within the water use regions.

## 9. The Census Report Forms

Although only one report was required from each establishment in the 1954 Census of Manufactures, the diversity of manufacturing activities made it necessary to use some 200 different report forms to canvass the approximately 450 manufacturing industries. In order to obtain the data essential to the census in a manner consistent with considerations of cost and reportability by the respondent, standard forms requiring full census detail were used only for those manufacturing plants above a given size in terms of number of employees (generally six or more employees). For the numerous smaller establishments, typically having less detailed records and representing a very minor portion of manufacturing output and employment, data requirements were limited to a relatively few key items on a general short form. In the case of a few industries where such small plants typify the industry (thus accounting for a substantial portion of its total in their aggregate), modified versions of short forms were used. However, all multiplant companies were sent the appropriate standard form for each of their establishments regardless of the size of establishment.

It was possible in this Census, using the administrative records of the Bureau of Old-Age and Survivors Insurance in conjunction with existing Census records, to determine correctly, in most cases, which report form was required for each manufacturing establishment before the mailing.

Information was obtained on all 1954 forms regarding the physical location, Social Security employer identification number, company affiliation, and form of ownership. These facts not only provided for completeness-of-coverage control in the census (see section 11, Development of the Mailing List), but also permitted the classification of each establishment by geographic location and type of legal organization.

(a) Standard Forms.--Each standard form called for virtually the same general plant items--employment, payrolls, man-hours, summary of materials cost, detailed fuels and electric energy costs, horsepower of installed equipment, water usage, inventories, and capital expenditures. However, the forms differed in that detailed inquiries on the quantity and value of individual products shipped and individual materials consumed as well as miscellaneous inquiries such as types of operation, equipment, and class of customer were adapted to the individual industry or industry group. These adaptations in product and material inquiries resulted in 192 different report forms for the manufacturing industries.

(b) General Short Form.—This form, designed for establishments with less than six paid employees and not part of a multi-unit company, was an abbreviated version of the standard form requesting limited general and product information typically available from the records of smaller manufacturers. For example, only total employment and payroll figures were requested, without detail by functional class of employees (i.e., production workers, force-account construction workers, and all other employees); production-worker man-hour figures were not required. Instead of detailed information on individual products shipped, the short form requested the respondent to indicate only his value of shipments in terms of product classes, a reference list for which was enclosed to provide consistency in reporting.

(c) Modified Short Forms.—In manufacturing as a whole and in most industries, very small establishments accounted for only a minor part of employment or production. Establishments with less than six employees accounted for less than two percent of value added by manufacture. However, for a few industries, smaller plants constituted a significantly large proportion of the total. For these industries, modified short forms were used, with the same establishment type inquiries (i.e., employment, inventories, etc.) as appeared on the general short form. In the materials and product sections of these forms, however, greater detail was required, approaching the materials and product sections of the standard form counterparts for these industries. The industries covered in this manner were: Logging and Sawmills, Concrete Products, Dairy Products, and several printing and publishing industries.

In addition to the report forms described above, there were several special forms used in 1954 to obtain information on related activities of manufacturing companies.

(d) Form for Manufacturing Plants Under Construction During 1954.—This form was designed to obtain data on capital expenditures by manufacturing firms for new plants under construction during 1954 but not in operation by the end of the year. A regular census report of the type described in (a)-(c) above was not obtained from such establishments. The new plant form was sent to the 1,700 largest manufacturing firms, and to a sample of 600 other manufacturing companies. (For a discussion of the purpose and use of this form, see section 25, "Expenditures for Plant and Equipment.")

(e) Form for Separate Central Administrative Offices and Auxiliaries of Manufacturing Companies.—Separate reports for each central administrative office and auxiliary unit (e.g., storage warehouses, power plants, research laboratories, garages, repair shops, etc.), which served the manufacturing establishments of the company rather than the general public, were obtained from the company if they were at locations different from the establishments served or if they serviced more than one manufacturing establishment. The report form included inquiries on payrolls, employment, inventories, sales and warehouse storage space. In the manufacturing field, there were approximately 4,200 such establishments in 1954, about evenly divided between administrative offices and auxiliary units. They accounted for 470 thousand employees with payrolls of almost \$3 billion, which represents 3 percent and 4.5 percent, respectively, of the totals for all manufacturing.

The employment, payroll and other related data for separate administrative offices and auxiliaries are not included in the operating manufacturing establishment totals, either for individual industries or industry groups. The employment and payrolls of such administrative offices and auxiliaries are, however, shown separately and also included in the "all manufacturing" totals in selected tables in the Summary and Area Volumes, e.g., Table 1 of each State report.

(f) Supplemental Form for Industrial Water Use.—On all standard forms, the respondent was asked to indicate, in terms of broad size ranges, the amount of water intake at his plant during 1954. Plants indicating the use of "20 million gallons or more" were defined as large water users. Based on results in the 1953 Annual Survey of Manufactures, it was estimated that this group of plants accounted for about 95 percent

of the total use of water in manufacturing. For 1954 each large user was sent an "Industrial Water Use" form, which requested information on water intake by broad use (processing, cooling, etc.), by type of water (fresh or brackish), and by source (public or private systems) as well as the amount of water recirculated and treated. The water use statistics obtained in the 1954 Census appear in the Summary Volume only.

#### 10. Comparison with 1947 Census Report Forms

In most respects, the inquiries on the 1954 standard Census forms were similar to those of the 1947 Census. However, there were some significant differences as follows: A 1947 classification of employees distinguishing clerical and routine office workers from other non-production personnel was dropped in the 1954 Census. Also, the 1947 item, "analysis of payroll ended nearest Oct. 15th", which included an employment distribution by sex was omitted in the 1954 Census. Further, the 12 monthly employment figures requested in 1947 were reduced to 4 selected months in 1954 except for report forms for highly seasonal industries.

The two-fold distribution of inventories in 1947 (finished products and all other inventories) was expanded in 1954 to a three-fold distribution in which work-in-process inventories were requested as a separate figure. On the other hand, the capital expenditures inquiry was abbreviated by the elimination of the subclasses under expenditures for new plants ("buildings" and "other construction") and by dropping of the subclasses under expenditures for new machinery and equipment ("production machinery and equipment" and "other machinery and equipment").

The industrial water use and horsepower rating inquiries of the 1954 census had no counterparts on the 1947 schedules. Conversely, the 1947 inquiry on highway-type motor vehicles was omitted in 1954.

The 1947 short forms, which were used on a more limited basis (ordinarily for one-employee establishments, except for small sawmills and printing establishments for which a higher employment cut-off was used), were similar in content to the 1954 short forms. In contrast to 1954, the 1947 forms, however, did not require separate figures on cost of contract work, value of total inventories, or total capital expenditures.

#### 11. Development of the Mailing List

The basic mailing list for the 1954 Censuses of Manufactures, Business and Mineral Industries comprised all employers (except farmers, State and local governments, and other ineligible classes) who made one or more quarterly payments in 1954 under the Federal Insurance Contributions Act. The list, which was obtained from the Internal Revenue Service (IRS) of the Treasury Department, contained all of the information necessary for mailing the Census questionnaires except the industry classification of the employer.

The IRS list was matched with various lists containing the industry code number (Standard Industrial Classification) which was required for selection of the appropriate Census report form. The matching operations done mechanically on punch card collating equipment, were made possible by the fact that both the IRS list and the classified lists contained the Social Security employer identification (E.I.) number.

While the IRS list was the basic control mechanism for the Census of Manufactures, the mailing list for the 1953 Annual Survey of Manufactures was the principal device for mailing to large companies. This survey included all large manufacturing establishments (i.e., those with 100 or more employees), which in 1954 accounted for 74 percent of total employment. For smaller establishments, the principal source of industry codes was the "employer master file" of the Bureau of Old-Age and Survivors Insurance (BOASI) of the Social Security Administration. The latter file was supplemented by independent lists for two industrial areas, apparel jobbers and milk bottlers. (The apparel jobber information came from a census commodity survey; the dairy list from an industry source.)

Further mailing list supplementation was necessary for "Multi-unit" companies—those with more than one manufacturing, mining or business establishment. In addition to the 1953 Annual Survey of Manufactures, which provided the principal source of information regarding manufacturing plants of multiunits, a limited pre-canvass was conducted by use of Form NCX-1. This form was sent to about 7,000 large companies and called for a listing of subsidiary corporations. The questionnaires for the smaller multiunits were selected on the basis of BOASI information.

Concerns having Employer Identification (E.I.) numbers on the IRS list which did not match the classified lists, and cases where the E.I. numbers matched but the classified lists did not provide sufficient information for selection of a specific questionnaire, were canvassed by means of a general schedule (NCX-3). The industry code of employers thus canvassed was assigned after receipt of the NCX-3 form on the basis of the information reported on that form. When the establishment filing the NCX-3 form was large or where otherwise necessary, additional information was obtained to complete the appropriate inquiries for the industry to which the establishment was assigned.

In the 1954 Census the report forms were distributed and returned by mail. Personal or telephone contact was made only when the manufacturer failed to respond to the initial request or to followup letters. All forms for larger establishments (in general, those with 6 or more employees) were mailed and the followup was controlled from Washington. Questionnaires for smaller establishments were mailed and controlled in the Census Bureau field offices.

## 12. Completeness of Coverage

For the 1947 Census, coverage was checked by an intensive field study of sample geographic areas, designed to measure losses due both to deficiencies in the original mailing list and to errors in processing (e.g., industry coding) after the questionnaire had been mailed and received. The results of this study indicated that 98.2 percent of the total manufacturing employment and 98.7 percent of total wages and salaries were covered in the 1947 Census statistics. The undercoverage was largely limited to small establishments and was of some importance in industries where establishments frequently combine manufacturing and merchandising activities (for example, production of prepared feeds combined with the retailing of farm supplies). Establishments operating during only part of the Census year, and unincorporated enterprises, constituted a significant proportion of those establishments omitted from the Census totals.

Since deficiencies in the 1947 mailing list were largely responsible for the relatively small "losses" incurred that year and since the 1954 mailing list was considered to be complete, no field coverage check was conducted for the 1954 Census. At various stages of processing of the reports, instead, coverage checks were conducted with the aim of determining whether establishments on the original mailing list were represented in the processing stage under scrutiny. For example, one such check indicated virtually complete mailing of reports to all names on the mailing list. The omissions brought to light through these checks were corrected, (i.e., either the missing reports were located or new reports were obtained). A final check, conducted after the close of collection operations, evaluated completeness of coverage of all establishments in the BOASI files with more than 100 employees. As a result, "missing" establishments in this size group were restored to the tabulations. This final over-all check was not extended to smaller establishments, but a few instances of omission of smaller establishments were discovered and corrected during the review of the Census tabulations.

A large proportion of the omissions discovered (and corrected) among establishments with more than 100 employees was attributable to difficult problems of coverage control among multi-establishment companies. Coverage control was much less difficult for "independent" establishments (companies with only one manufacturing location) and for this reason it was assumed that the

loss rate among small establishments which are largely "independents", was insignificant.

## 13. Manufacturing Employees—Classifications Used

(a) All employees.—The category "all employees" comprises all full-time and part-time employees on the payrolls of operating manufacturing establishments who worked or received pay for any part of the pay period ended nearest the 15th of the months specified on the report form. Included are all persons on paid sick leave, paid holidays and paid vacation during these pay periods; excluded are members of the armed forces and pensioners carried on the active rolls but not working during the period. Officers of corporations are included as employees; proprietors and partners of unincorporated firms, are, however, excluded from the total. Employment at separate administrative offices and auxiliary units is excluded from this category. (See 13b below.)

This total of manufacturing employment is divided into three standard functional classifications (in accordance with the Bureau of the Budget's Standard Specifications for Employment Reports of November 1955, for use by manufacturing establishments in reporting employment, payrolls, and man-hour data), as follows:

Production and related workers.—Workers (up through the working foreman level) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial, watchman services, product development, auxiliary production for plants' own use (e.g., power plant), record keeping, and other services closely associated with these production operations at the establishment covered by the report. Supervisory employees above the working foreman level are excluded from this category.

Force-account construction workers.—Employees on the payroll of the manufacturing establishment who are engaged in the construction of major additions or alterations to the plant and who are utilized as a separate work force. (Workers engaged in regular maintenance and repair operations are not included here but are classified in the "production and related workers" category.)

All other employees.—Nonproduction personnel of the manufacturing establishment, including those engaged in the following activities: factory supervision above the working foreman level, sales (including driver salesmen), sales delivery (highway truck drivers and their helpers), advertising, credit, collection, installation and servicing of own products, clerical and routine office functions, executive, purchasing, finance, legal, personnel, etc.

(b) Central Administrative Office and Auxiliary Unit Employees.—For the 1954 Census, respondents were asked to report separately any central administrative offices or auxiliary units that were at a different location from the establishments served or at the same location as one of these establishments but not operated as an integral part thereof and administered or served two or more establishments. The functions of employees in central administrative offices include: general company policy determination, planning and management (i.e., company purchasing, accounting, general engineering, direction of company personnel matters, and legal and patent matters). Auxiliaries are storage facilities, garages, repair shops, purchasing offices, sales promotion offices, and research laboratories, serving the plants or central management of the company. Employment and payrolls totals for the central administrative offices and auxiliaries are included in certain tables in the Area and Summary Volumes (see section 9e for additional discussion).

## 14. Manufacturing Employees—Average Employment

In the 1947 Census, the statistics "all employees, number" and "production workers, number" represented averages of reported employment of the mid-month pay period for the 12 months of the year. The 1954 Census report forms requested employment figures for only four selected pay periods (i.e.,

midmonth employment in March, May, August, and November) in all but seasonal industries.

This latter approach was initiated in the intercensal Annual Survey of Manufactures to simplify the schedule format and lighten the reporting burden of respondents, inasmuch as it was found that the average of these selected pay periods approximates very closely the average that would be obtained from the 12 monthly pay periods for almost all industries. A study of the 1947 Census data indicated that the difference between average employment based on the specified 4 pay periods and average employment derived from 12 monthly figures was less than one percent for 376 of the 452 manufacturing industries and less than 3 percent for 442 industries, or 98 percent of all industries. The remaining 10 industries showed a variation of 3 to 9 percent.

In the 1954 Census, the midmonth pay period of the middle month was used for the last three quarters of the year. For the first quarter of the year, however, the mid-March, rather than mid-February, pay period was selected in order to tie-in with the identical pay period for which employment data are reported to the Bureau of Old-Age and Survivors Insurance. This permits coordination of Census and BOASI establishment employment records, both for the purpose of a census "universe" control in census years, and in intercensal years for the tabulation of "County Business Patterns" data which are directly comparable with the Annual Survey of Manufactures estimates for industry groups, States and geographic divisions. Further analysis of the 1947 Census disclosed virtually no change in the 4-month employment average by selecting mid-March rather than mid-February as the representative pay period for the first quarter.

In the 1954 Census, therefore, the four selected pay periods mentioned above were used on all census report forms, except 15 covering 40 seasonal industries. A supplemental inquiry was included on the report form for such industries, requiring the midmonth total employment for each of the 12 months of the year. For this purpose, seasonal industries were defined as those in which one of the following conditions held in any one of the years 1947, 1950 or 1952:

(a) Average annual employment based on March, May, August and November differed by 2 percent or more from the average based on all 12 months of the year.

(b) The ratio of employment in the lowest of the 12 months to employment in the highest month fell below 75 percent.

#### 15. Manufacturing Employees--Payrolls

This total includes the gross earnings paid in the calendar year 1954 to all employees on the payroll of operating manufacturing establishments. Respondents were told they could follow the definition of payrolls used for calculating the Federal withholding tax. It includes all forms of compensation such as salaries, wages, commissions, dismissal pay, all bonuses, vacation and sick leave pay, and compensation in kind, prior to such deductions as employees' Social Security contributions, withholding taxes, group insurance, union dues, and saving bonds. The total includes salaries of officers of these establishments, if a corporation; it excludes payments to the proprietor or partners. Also excluded are payments to members of armed forces and pensioners carried on the active payroll of manufacturing establishments.

The 1954 Census definition of payrolls, identical to that recommended to all Federal statistical agencies by the Bureau of the Budget, is also the same as the 1947 Census definition. It should be noted that this definition does not include employers' Social Security contributions, or other nonpayroll labor costs such as employees' pension plans, group insurance premiums, and workmen's compensation. Force-account construction worker wages are included in total payrolls even though such wages are a cost charge to the manufacturer's capital account rather than a current production cost. However, these wages represent an inconsequential fraction of total manufacturing payrolls, as most construction of new plants or additions to existing plants is performed on a contract basis, either by independent construction firms or separate construction subsidiaries of manufacturing concerns.

As in the case of employment figures, the payrolls of separate central administrative offices and auxiliary units of multiestablishment companies are not included in the totals for individual industries or industry groups but are shown in table 1 of each State report and selected other tables in the Area and Summary Volumes.

#### 16. Production and Related Worker Man-Hours

This total consists of all plant man-hours of production and related workers as defined above. It represents all man-hours at the plant worked or paid for, including actual overtime hours (not straight-time equivalent hours). It excludes hours paid for vacations, holidays, or sick leave, when the employee was not at the plant. Where employees elected to work during the vacation period, only actual hours worked by such employees were reported.

The production worker man-hours total for an industry, as collected in the Census, provides a comprehensive measure of labor input, taking into account both the number of production workers and their actual hours of work.

As in the 1947 Census and subsequent Annual Surveys, 1954 man-hours data were requested by quarter for the calendar year, on the basis of 1947 Census pretests. These pretests indicated that quarterly data could be reported more readily than either monthly or annual data. The man-hours figures issued by the Census differ from those published monthly by the Bureau of Labor Statistics which cover all hours paid for, whether or not worked, and relate only to the payroll period ending nearest the middle of each month. The 1954 Census definition of man-hours (i.e., all man-hours at the plant, including "stand-by" hours paid for) is a clarification, without altering the desired concept, of the 1947 definition which simply called for all man-hours worked.

Man-hours were generally well reported except in the case of small establishments which, as in the 1947 Census, experienced some difficulty in distinguishing between production and other types of workers, and except for some industries like apparel where work is commonly performed on a piece rate basis. Where man-hours were not reported and it was not feasible to obtain the information by correspondence, the data were estimated. Because this estimating was largely confined to small establishments, there is no significant qualification to the validity of overall industry and geographic area totals for man-hours, except for sawmills and a few other industries characterized by small establishments or by other limitations in their record-keeping affecting the reporting of man-hour information. However, the man-hour figures for establishments with fewer than 10 employees, shown in the Size of Establishment chapter of the Summary Volume, should be interpreted with this factor in mind.

#### 17. Cost of Materials, etc., Consumed

A summary inquiry on the 1954 Census report forms requested information on the cost of materials, supplies, semi-finished goods, fuels and electric energy, actually consumed or put into production during the year, whether purchased, withdrawn from inventories, or received from other establishments of the company, as well as the cost of contract work. "Cost" refers to direct charges actually paid or payable for items consumed or put into production during the year, after discounts, and including freight charges and other direct charges incurred by the establishment in acquiring these materials.

Under the general heading "Cost of materials, etc." separate figures were obtained for (a) the total delivered cost of all raw materials, semi-finished goods, parts, components, containers, scrap, and supplies consumed or put into production; (b) the amount paid for electric energy purchased; (c) the amount paid for all fuels consumed for heat, power, or the generation of electricity; and (d) the cost of work done by others on materials or parts furnished by the reporting manufacturing establishment (contract work). The cost of materials figure published for each industry does not include the separately reported cost of products bought and resold in the same condition; also, it excludes the cost of purchased services, such as advertising, insurance, telephone, and research; it excludes overhead costs,

such as depreciation charges, rent, interest, etc.; it excludes materials, machinery and equipment used in replacement or expansion of plant or capitalized repairs which are chargeable to fixed assets accounts.

Where the respondent's records did not show the actual amounts consumed or put into production during 1954, he was permitted to enter purchase figures provided purchases closely approximated consumption during the year. For minor materials and supplies, the substitution of purchase records was accepted regardless of the variation between purchases and consumption. If for any major material, however, the two measures differed significantly, the manufacturer was instructed to derive an estimated consumption figure by adding purchases (or receipts) to amounts on hand at the beginning of the year and subtracting amounts on hand at the end of the year. While it was not feasible to audit the resulting figures reported for materials and supplies consumed, enough checks of consistency were made so that it is believed that the aggregates reported are close approximations of actual consumption.

In the case of materials received from other plants of the same company or from a central materials depot (whether at the same or different physical location), the respondent was asked to approximate the commercial value of these materials, including freight and other direct handling charges. For some industries in which there was no satisfactory market counterpart of the transferred material, special instructions were necessary. The respondent was also asked, where possible, to check that such approximated costs exceeded the value of shipments reported by the company's plant producing and transferring the goods only by the addition of freight and other direct charges.

It should be noted that the cost of fuel consumed under (c) above (including anthracite and bituminous coal, natural and manufactured gas, fuel oil, liquefied petroleum gas, and other fuels) does not include fuel used as a material in the manufacturing process, for example, coal used in the production of coke. Such costs were included with other materials costs in category (a) above.

A summation of industry figures for cost of materials would result in large and unknown amounts of duplication in industry group totals, owing to the addition of costs reported by related industries engaged in successive fabrication stages in the production of finished manufactured products. For this reason, cost of materials figures are not shown at the industry group (3-digit) and major industry group (2-digit) levels. With some important exceptions (such as Blast Furnaces and Steel Mills, Radios and Related Products, and Motor Vehicles and Parts), this duplication is not significant within individual industries.

#### 18. Individual Materials Consumed

In addition to the total cost of materials, fuels, etc., which every establishment was required to report, quantity and cost information was collected on the use of 433 specific materials. Consumption information was also collected for an additional 762 items as part of the product sections of the report forms. The latter group typically consisted of items which were produced and also consumed by the producing establishments or by other establishments in the same industry. For example, many chemical plants produced a basic chemical and then used it in further processes. Also in the steel industry, data on receipts and consumption of mill shapes were obtained as part of the inquiry calling for the production and shipments of these shapes.

Materials were covered in two ways. For 230 materials, every industry that consumed appreciable quantities of the material was canvassed so that the data would represent at least ninety percent of the total consumption by manufacturing industries. For the remaining 203 materials, information on consumption was obtained on a more limited basis, generally only from those industries in which the materials were an important part of total material costs. Of the 762 products for which consumption information was obtained, industries accounting for ninety percent or more of manufacturing consumption were covered for about 300 items.

Because American industry uses an enormous variety of materials, the number of materials for which "complete" coverage consumption data (90 percent or higher) were obtained had to be strictly limited. The selection of a particular material for such coverage was therefore based on the following criteria:

- (1) The importance of the material as measured by the total value of United States consumption of the material
- (2) The percentage of total consumption accounted for by manufacturing establishments
- (3) The availability of consumption information from manufacturers' records
- (4) In certain instances, other factors such as the strategic importance of the material or the availability of historical data on the use of the material.

The materials included on a limited coverage basis were chosen not only because they constituted important inputs for particular industries but, frequently, because they provided necessary classification-type information and other indirect measures. For example, an industry's production was of a heterogeneous character and materials consumed afforded a better measure of physical output than could be obtained from available production data.

Tabulated data on the materials consumed in an industry are usually shown in the report for that industry. In addition, for the 230 materials covered on a complete basis (see above), consumption by all industries and, frequently, by States is shown in the Summary Volume. The data on materials consumed relate generally to the quantity and cost of materials purchased from other companies or obtained from other plants of the same company. However, for selected materials which are also importantly produced for use within the same establishment, information was requested on such captive production in quantity terms only.

Some undercoverage exists in the statistics for most individual materials. This undercoverage results from the fact that:

- (1) Individual materials consumption information was obtained only from establishments using one of the Census of Manufactures standard forms. For the most part, therefore, plants with fewer than six employees are not represented in the statistics. A rough indication of the effect of short forms on the materials covered can be derived from an analysis of the size of establishment tables which appear in the industry reports in the Industry Volume and in a separate chapter of the Summary Volume.
- (2) Establishments consuming less than a specified amount of a material were not requested to report consumption of the material separately. For the majority of individual materials, the minimum amount was \$5,000.

The use of such cut-offs, as well as short forms, is not believed to have had a significant effect on the totals for most materials. However, for industries where a sizeable proportion of the activity is accounted for by small establishments or where a specified material is used in relatively small quantities, the above limitations may be of some consequence.

In the area of metal mill shapes and castings, the minimum amounts to be reported separately in the 1947 Census were 50 tons for carbon steel shapes, 25 tons for alloy steel and 10 tons for stainless steel, nonferrous mill shapes and castings. The reporting cut-off for each of these metals in 1954 was \$5,000. Because of the dominance of large consuming establishments in the totals for these materials, however, the effect of the difference in cut-offs between the two years is believed to be negligible.

#### 19. Value of Shipments

The amounts under value of shipments both for industries and for individual products or classes of products are the received or receivable net selling values, f.o.b. plant, after discounts and allowances, and excluding freight charges and excise taxes.

However, where the products of an industry are customarily delivered by the manufacturing establishments (bakery products, fluid milk, soft drinks, for example) the value of shipments is based on the delivered price of the goods rather than the f.o.b. plant price. For the tobacco and other industries where excise taxes are important, such taxes are covered separately.

Under the general heading of shipments, manufacturers were asked to include all items, made by or for each establishment from materials owned by it, whether sold, transferred to other plants of the same company, or shipped on consignment. Also included were receipts for contract work and for such miscellaneous activities as sale of scrap and refuse, installation work by manufacturing plant employees, research and development work, and repair work. The net selling value of products made in one plant on a contract basis from materials owned by others was reported by the plant providing the materials. The value of products bought and resold without further processing (merchandising) was reported separately and is excluded from the value of shipments figures shown in all tables; the value and cost of resales are, however, shown separately in table 3 of the Industry Volume.

In the case of multi-unit companies, the manufacturer was requested to report the value of products transferred to other establishments of the same company (i.e., other manufacturing plants, separate sales branches, or retail stores) at "the nearest approximation to corresponding commercial values, f.o.b. plant, and not the cost of production."

The industry "value of shipments" is necessarily different from the value of shipments of the group of products regarded as "primary" to the industry. The value of shipments of primary products of an industry (Tables 5 and 6 of the Industry Volume) includes the value of such products reported by all producers, including those establishments in other industries which make these items as "secondary" products. However, that value does not include the value of secondary products of establishments classified in the industry, nor receipts of such establishments for contract work and other miscellaneous activities. The general use of shipments as the basis for valuing the output of manufacturing industries differs from the practice for all censuses except those for 1947 and 1929. The selection of shipments in recent censuses was made in order to facilitate direct reporting from records of sales, shipments, or billings. Value of shipments for 1954 and 1947 may, however, be directly compared with value of products for earlier years. In the first place, it is likely that in earlier censuses many manufacturers valued their output in terms of shipments even though value of production was requested. Secondly, the changes in the value of finished goods inventories for most industries were of minor importance and there was, therefore, little difference between production and shipments in 1954, 1947, and 1939 Censuses. The "value of production" was requested in the 1954 Census for a relatively few industries where such records are generally maintained in place of shipment figures and reporting of the latter would have involved undue difficulty for the respondent. These instances are noted in the tables and descriptive text for the industries involved.

## 20. Individual Products

For 1954, as for 1947, data were collected for almost all industries on the quantity and value of individual products shipped. In the 1954 Census, information was collected on the output of approximately 7,000 individual product items. The term "product" as used in the Census of Manufactures represents the finest level of detail for which output information was requested. Consequently, it is not necessarily synonymous with the term product as used in the marketing sense. For example, all grades of automotive gasoline were reported as a single item. On the other hand, cotton broad-woven goods were distributed into nearly 200 items.

The list of products for which separate information was collected in the 1954 Census was based on the product categories selected for the 1947 Census of Manufactures after extensive consultation with industry and government representatives. This 1947 Census list was reviewed in preparation for the 1954 Census

and modifications were made in many instances, although less extensively than in 1947. In readjusting the list of products, comparability with previous figures was given considerable weight. Comparable 1947 information is presented for most products, therefore, at some level of detail.

Typically, quantity and value of shipments information was collected for each product. In some cases quantity was not significant or could not be reported by manufacturers, largely because of the wide range of sizes, prices or different types of products included in the category. For these products, only value of shipments was collected. Shipments include both commercial shipments and transfers of products to other plants of the same company. For products for which a considerable portion of the total shipments is transferred to other plants of the same company, separate information on such interplant transfers was also collected. Moreover, for products which are used to a large degree within the same establishment as materials or components in the fabrication of other products, total production and often consumption of products produced in the same establishment were collected. Production data were also collected for products for which there are significant differences between total production and total shipments. Other measures of output of products, such as "value of work done" for products with long production cycles, were used as appropriate and feasible.

## 21. Classes of Products

For the purpose of summarizing the product information, the separate products were aggregated into "classes of products" which were in turn grouped into all "primary" products of each industry. The code structure used is a 7-digit number for the individual products, a 5-digit code for the class of product, and a 4-digit code for the total primary products in an industry.

The 7,000 product items in the 1954 Census were grouped into approximately 1,000 separate classes on the basis of general similarity of manufacturing processes, types of materials used, and the like. However, the grouping of products was affected by the economic significance of the class, and in some cases, dissimilar products were grouped because they were not sufficiently significant to warrant separate classes.

The product class was developed in order to provide an intermediate level of classification for output information. Because of the reduced number of separate items and the increased number of companies producing the class of products, additional tabulations of output information, e.g., product class by State (table 6B of the Industry Volume) are feasible more frequently than would be possible for individual products. The increased number of companies minimizes the problem of protection against disclosure of individual company information and the smaller number of items (product classes) reduces the cost of tabulation.

## 22. Duplication in Cost of Materials and Value of Products

The aggregate of the cost of materials and value of shipments figures for industry groups and for all manufacturing industries includes large amounts of duplication owing to the use of products of some industries as materials by others. With some important exceptions, such as Motor Vehicles and Parts, this duplication is not significant within individual industries but arises from the addition of statistics for related industries representing successive stages in the production of a finished manufactured product. Examples are the addition of flour mills to bakeries in the Food Group and the addition of pulp mills to paper mills in the Paper and Allied Products Group of industries. Estimates of the over-all extent of this duplication indicate that the value of manufactured products exclusive of such duplication—the value of finished manufactures—tends to approximate two-thirds of the total value of products reported in the Census of Manufactures. Because of the unknown and varying amounts of duplication contained in cost of materials and value of products, these figures are not shown for groups of industries or for geographic areas in this census and are also eliminated for approximately a dozen individual industries containing significant amounts of duplication.

Even where no significant amount of duplication is involved, value of shipments figures are deficient as measures of the relative economic importance of individual manufacturing industries or geographic areas, because of the wide variation in ratio of materials costs to labor and other processing costs, both among industries and within the same industry.

### 23. Value Added by Manufacture

This measure is derived in the 1954 Census (as it was in the 1947 Census and intervening annual surveys) by subtracting the cost of materials, supplies, containers, fuel, purchased electric energy, and contract work, from the value of shipments of manufacturing establishments. It avoids, therefore, the duplication in the value of shipments figure which results from the use of products of some establishments as materials by others. It is considered to be the best value measure available for comparing the relative economic importance of manufacturing among industries and geographic areas.

Value added by manufacture should not be confused with "national income originating in manufacturing," as presented in the national income estimates compiled by the Office of Business Economics, Department of Commerce. The latter measure is the sum of factor costs incurred by an industry in production. It excludes, in addition to cost of materials, such other costs as depreciation charges, State and local taxes (other than corporate income taxes), allowance for bad debts, and purchases of services from nonmanufacturing enterprises, such as contract costs involved in maintenance and repair, services of development and research firms, services of engineering and management consultants, advertising, telephone and telegraph expense, insurance, royalties, patent fees, etc. It is, therefore, a more "net" concept of value added than that used in the Census of Manufactures.

In part, the "national income originating" estimates are prepared from company rather than establishment data. This results in the inclusion of some part of the net value added (or a logical approximation of it) by nonmanufacturing establishments of companies classified as being primarily manufacturing; and conversely, in the exclusion of some part of the net value added by manufacturing establishments of companies classified as primarily nonmanufacturing. It is believed that for manufacturing as a whole the net effect increases income originating. (In fact, in the Petroleum and Coal Products major industry group, nonmanufacturing activities of manufacturing companies are so significant that this is the one major industry group in which O.B.E. "income originating" exceeds Census "value added by manufacture.") Many of the items that must be deducted from "value added" to arrive at an income originating figure can be reported on an establishment basis only with considerable difficulty, if at all.

Another distinction between the Census value added and O.B.E. income originating statistics arises from the treatment of net changes in inventories of work-in-process and finished goods. The census figure is based on shipments, and hence does not reflect net changes in these inventories during the year. The O.B.E. estimate makes allowance for inventory changes.

For industries in which intra-company transfers constitute a significant part of total cost of materials or value of shipments, the Census value added is subject to certain limitations arising from the assignment of values to the products transferred. To the extent that manufacturing companies assign to products shipped from one establishment of the company (classified in Industry A) to another (in Industry B) values that reflect only cost of production without adequate allowance for overhead and profit, the value added in Industry A will be understated whereas that for Industry B will be overstated. For related groups of such industries and for manufacturing as a whole, this imbalance cancels out, of course, and the aggregate value added is without distortion due to problems of transfer valuation.

In the calculation of value added for the 1954 Census and prior years, products bought and resold in the same condition (resales) are excluded from both the value of shipments and the cost of materials, etc. However, value added by manufacture including value added by resale and the net change in work-in-

process and finished product inventories is shown for 1954 in a special table in the Summary Volume. It is planned that this more comprehensive concept will be followed in future censuses and annual surveys of manufactures.

### 24. Inventories

The value of beginning-of-year and end-of-year inventories held by each manufacturing establishment, except for those in Printing and Publishing, was obtained in the 1954 Census. Based on the successful experience in the 1953 Annual Survey of Manufactures, separate inventory figures were requested for: (1) finished products; (2) work-in-process; and (3) materials, supplies, fuel, and other inventories. In the earlier Annual Survey years and in the 1947 Census, inventory data had been collected for only two major categories: (1) finished products and (2) work-in-process, materials, supplies, and other inventories.

Respondents were asked to report their inventories at approximate current costs if feasible; otherwise "at book values." Since different methods of inventory valuation are used (LIFO, FIFO, etc.) the meaning of the value of inventories aggregate for all establishments in an industry is not precise. The figures on change in inventory between the beginning and the end of the year are of considerable significance.

Establishments were asked to report total inventories and a distribution of inventories by materials, work-in-process, and finished goods. However, an item treated as a finished good by an establishment in one industry may be reported as a raw material by another establishment in a different industry. For example, the finished product inventories of a steel mill would be reported as raw materials by a stamping plant. Such differences are present in the inventory figures by stage of fabrication shown for individual industries, industry groups, and all manufacturing which are merely aggregates of figures reported by establishments in specified industries. It should be noted further that the total finished goods inventory for all manufacturing includes items that are not finished manufactured products.

For a few industries in the food group there are special problems in the handling of inventories by stage of fabrication. These are industries in which the products are usually stored under controlled conditions and the products are aged. Included among such types of products are stemmed and dried tobacco, cheese, and whiskey. It is not clear whether such products should be treated as finished goods inventories or as work-in-process while in storage. In all of these industries substantial finished goods inventories have been reported. These data have been summarized in the inventory tables in a consistent manner for all of the years included in this report. The Census Bureau is investigating this problem further.

The total end of 1954 inventory of \$40.3 billion reported in the Census of Manufactures by manufacturing establishments is lower than the total inventory of \$43.5 billion estimated for manufacturing companies by the Office of Business Economics for the same date. This difference is mainly attributable to the fact that the Census of Manufactures total includes only the inventories of manufacturing establishments while the O.B.E. inventory is a total for manufacturing firms. The sales branches alone, among the nonmanufacturing establishments of manufacturing companies, reported inventories of \$2.2 billion in the 1954 Census of Wholesale Trade.

### 25. Expenditures for Plant and Equipment

In the 1954 Census, manufacturers were asked to report expenditures made during the year for permanent additions and major alterations to their plants, as well as for machinery and equipment purchases, that were chargeable to fixed-asset accounts of manufacturing establishments and were of a type for which depreciation accounts are ordinarily maintained. Capital expenditures during 1954 were to be determined by the following computation: additions completed during the year, plus construction in progress at the end of the year, minus construction in progress at the beginning of the year. Expenditures for machinery and equipment were to include those made for re-

placement purposes, as well as for additions to plant capacity. Excluded from such expenditure totals are costs of maintenance and repairs charged as current operating expenses. Also excluded are expenditures for land and expenditures made by owners of plants and equipment leased to manufacturers.

In addition to total capital expenditures, respondents were requested to indicate the following subtotals: (a) new structures and additions to plant (including major alterations and capitalized repairs and improvements); (b) new machinery and new equipment (including capitalized repairs and improvements); and (c) expenditures for used plant and used equipment acquired from others (including the United States Government). This three-fold breakdown of capital expenditures, also used in the 1949-1953 Annual Surveys, represents a contraction of the detail obtained in the 1947 Census when item (a) above was subdivided into buildings and other construction, and item (b) into production machinery and other machinery. The publication of statistics on capital expenditures is generally confined to new plant and equipment (items (a) and (b) above).

In the 1947 Census and the 1949 and 1950 Annual Surveys, data on capital expenditures related only to manufacturing establishments that were in operation at some time during the report year. They did not include expenditures incurred during the year for constructing and equipping new plants not yet in operation, or for renovating idle establishments. To close this statistical gap, such supplemental capital expenditures data were obtained in the 1951-1953 Annual Surveys, and again in the 1954 Census, by means of a special company report form. The 1954 report form (Form MC-D3) collected capital expenditures detail for each manufacturing plant under construction or renovation from the approximately 1,700 largest manufacturing companies. In addition, reports were obtained from about 600 smaller companies, selected as a representative sample of all other manufacturing concerns. Based on the 1951-1953 Annual Survey experience, the relative contribution from such smaller companies to this "under construction or renovation" segment of expenditures is ordinarily less than one-tenth of the estimated total.

The capital expenditures figures in the Industry and Area Statistics Volumes do not cover idle plants and plants under construction that were not put into operation within the year 1954. Data on this type of capital outlay are shown by industry group and by State in Volume I, Summary Statistics.

The census figures on capital expenditures differ from those estimates published from the joint Office of Business Economics-Securities and Exchange Commission sample survey. In addition to the sampling variation present in the latter data, a major source of difference is to be found in the scope of the two series. Census data relate only to manufacturing establishments, whereas the OBE-SEC series on expenditures, covers all establishments, manufacturing and nonmanufacturing, of companies classified as manufacturing concerns. This factor is particularly important in the petroleum industry, where company expenditures for developing new wells and new distribution facilities are ordinarily much larger than their capital expenditures at refineries. The OBE-SEC series excludes from the totals for manufacturing industries firms which operate manufacturing establishments but are primarily nonmanufacturing companies. Both series, it should be noted, exclude expenditures for plant and equipment at establishments owned by the Federal Government but operated under lease or contract by private companies.

## 26. Fuels, Electric Energy, and Water

Detailed statistics on use of fuels by manufacturing establishments for power and heat were collected in the 1954 Census of Manufactures. Separate figures were collected for coal, coke, fuel oil, gas, and other fuels. For each of the fuels with the exception of "other" fuels, both quantity and cost were collected. For "other" fuels, only cost was collected. The fuels reported in this inquiry exclude those used by manufacturing establishments as a raw material. For example, coal consumed in the manufacture of coke is not included in the fuel statistics.

However, data on such consumption are included in the materials consumed tables in the Industry and Summary Volumes.

Data were also collected on the use of electric energy in manufacturing. Separate figures were collected for the quantity and cost of electric energy purchased, the quantity of electric energy generated, and the quantity and value of electric energy sold.

Statistics on the industrial use of water were collected in 1954 for the first time in a Census of Manufactures. Comparable water use information had been obtained as part of the 1953 Annual Survey of Manufactures to meet a growing need for data on this important natural resource. (See Section 9f.) The water use statistics are shown by industry, State and water use region in Volume I, Summary Statistics.

## 27. Horsepower of Equipment

For the first time since 1939, statistics on horsepower rating of power equipment were collected. Such information had been requested prior to 1939 in periodic censuses as far back as 1869.

For prime movers, separate statistics in terms of total horsepower rating were collected for movers driving generators and movers not driving generators. Similarly, the horsepower rating of electric motors (excluding fractional horsepower motors) was obtained. In order to derive a measure of aggregate horsepower, the figures for electric motors were divided between motors driven by purchased energy and motors driven by energy generated within the same establishment. For establishments both generating and purchasing electric energy, the electric motor horsepower was split on the basis of the ratio of quantity of electric energy purchased to quantity generated in the establishment. The aggregate horsepower was then derived by summing the prime mover horsepower figures with the horsepower of electric motors driven by purchased energy. In this manner, duplication of horsepower between prime movers driving generators and motors driven by generated electric energy was eliminated. The problem of estimating the separation of the electric motor horsepower was limited inasmuch as the great majority of manufacturing establishments do not generate electric energy.

Horsepower of stand-by equipment as well as equipment in operation at the end of the year was requested. Included were all movers and motors in mobile as well as stationary equipment. Only motors driving highway-type motor vehicles were excluded.

## 28. Selected Metalworking Operations

For all industries in S.I.C. Major Groups 34 to 37 inclusive, and Group 19, and selected 4-digit industries in Group 33, the 1954 Census of Manufactures included a special inquiry on "Selected metalworking operations" to provide a measurement of the metalworking facilities in manufacturing. The following metalworking operations were included in this inquiry: foundry (except die casting); die casting (nonferrous metal only); forging-presses, hammers, or upsetters; electroplating; galvanizing and other hot-dip coating; heat treating or annealing of metals for production purposes; automatic screw machine department; machine shop; tool and die room, if separate from machine shop; pattern shop (foundry patterns only-metal, wood, etc.); plate or structural fabrication; and stamping, blanking, forming or drawing. The number of establishments performing these operations, classified by size of the specific operation, is shown by industry in the Industry Volume and in Chapter XII of the Summary Volume and by geographic division and State in the Summary Volume. The size distribution is based on the number of production workers usually employed in the operation. In addition, the actual number of production employees is given for the total of operations usually employing 20 or more workers. A column showing total estimated production workers for all establishments engaged in each of the metalworking operations is also included in the Summary Volume chapter.

Information on these metalworking operations was obtained for practically all industries where such operations are con-

sequential. In many of these industries, however, small establishments reported on a short form that did not include the inquiry on metalworking operations. Also, a few larger establishments that filed standard forms did not report their metalworking operations. This has resulted in an understatement of the number of establishments maintaining specific operations, primarily in the smallest size class, and to a much lesser degree an understatement of the total number of production workers in the operations. An approximation of the understatement in terms both of number of establishments and total employment is provided in the appropriate tables. The employment coverage is over 90 percent for nearly all industries and close to 100 percent for the larger metal consuming industries. The coverage is highest in industries which have few establishments with less than 6 employees. This type of operations information is useful in conjunction with the specific materials consumed data and with general relationships between materials cost and value of shipments in studying the extent of integration in specific industries. Moreover, this information measures approximately the extent to which these operations, which for the most part define individual industries, are conducted by establishments classified in other industries in the metal products area.

### 29. Selected Equipment Data

Detailed data on equipment were obtained from textile mills (S.I.C. Major Group 22, except 225, 2274, 228 and 229) and oil-seed crushing mills (S.I.C. Group 288) and are shown in the sections on those industries in the Industry Volume. The textile inquiries provided an inventory of selected items of equipment used in fiber preparation, spinning, weaving, and finishing; the oil mill inquiries secured information on various types of presses and the quantities of crushed seed and oil produced.

Information on storage capacity was collected from dairies (S.I.C. Group 202), grain mills (Industries 2041-43), ice plants (Industry 2097), tobacco plants (Major Group 21), and petroleum refineries (Industry 2911). These data which were obtained primarily to supplement similar inquiries included in the Census of Business are also shown in the Industry Volume.

### 30. Distribution of Manufacturers' Shipments

Information on the volume of goods shipped to various classes of customers (wholesalers, retailers, industrial users, etc.) was collected for the 28 industries or commodity groups listed below:

Industry or Commodity Group	Related S.I.C. Industry
Confectionery	2071-72
Soft drinks	2081
Hosiery	2251, 2252
Carpets and rugs	2271, 2273
Linoleum	2274
Printing and publishing	2731
Drugs and medicines	2831, 33, 34
Paints and paint products	2851, 52, 53
Essential oils, perfumes and cosmetics	2893
Petroleum products	2911, 2992
Shoes and slippers, other than rubber	3141, 42
Heating and cooking apparatus (including electric)	3432, 3439, 3621
Service-industry and household machines	3581, 3589
Refrigeration and air conditioning equipment	3585
Storage batteries	3691
Sporting and athletic goods	3949

This inquiry was originally planned to be similar in scope to the "Distribution of Manufacturers' Sales" inquiry in the 1939 Census of Manufactures. The 1939 distribution item covered 402 of 446 industries, and the information requested was identical for all the industries covered (with slight modifications for

certain textile industries). During the clearance of the 1954 Census forms, however, the Advisory Council on Federal Reports indicated the desirability of limiting the inquiry to industries which typically maintain records of shipments by class of customer and have a diversified distribution pattern and, furthermore, of adapting the inquiry in accordance with the customer channels of the particular industry. It was suggested by members of the Council, and later confirmed by a check of the Census reports, that the 1939 inquiry was poorly reported because of the lack of standardization among records maintained by manufacturers. Extensive conferences with industry representatives were held and, as a result, the inquiry was included only on the forms for the industries listed above. The details of the 1954 inquiries adopted differed from industry to industry, although, in general, distinctions were made between (a) interplant transfers, (b) shipments to retailers, (c) shipments to wholesalers, (d) shipments to Government, and (e) export shipments. The inquiries in some instances were confined to shipments of specific commodities, and in others covered the entire shipments of the industry, including both its "primary" and "secondary" products.

### 31. Plant Specialization Data

In response to needs expressed by data users, a program of plant specialization statistics was developed for the 1954 Census of Manufactures. These data provide a more exact measurement of the relationship between the output of an industry and the statistics on employment and payrolls, cost of materials, etc., reported by the same industry. The plant specialization data (in table 8 of the Industry Volume and Chapter XI of the Summary Volume) importantly supplement the information presented in the industry tables 5A and 5B.

Specialization for an establishment is computed in two ways. The first computation is in terms of the ratio of all the primary products of the establishment to its total of primary plus secondary products. The second in terms of the ratio of the largest single product class of the establishment to its total of primary plus secondary products. Receipts for contract and commission work as well as other miscellaneous receipts are not included in the plant specialization computation. Establishments are then grouped according to their degrees of specialization at the two levels. The statistics presented in table 8 group establishments in four specialization ranges for most industries: 90 percent or more, 75-89 percent, 50-74 percent, and less than 50 percent. For each of these ranges at the two levels (all primary products and the product class), statistics are shown on employment and payrolls, value added, cost of materials, and value of shipments.

Not all industries or all product classes are included in table 8 in each of the industry chapters. Industries having a high degree of primary product specialization (90 percent or more—see table 3 of the industry chapters) and including only one product class are omitted since the statistics for the specialized establishments would be approximately the same as those for the entire industry. In addition, selected industries having more than one product class as well as particular specialization ranges within a product class may have been omitted in order to avoid disclosing individual company figures.

Certain product classes are primary to more than one industry. The industry classification of establishments primarily producing such classes of products is determined on the basis of the kind of operation performed in the establishment, e.g., making the product from purchased materials or from materials produced at the same location. In the plant specialization data (table 8), product classes primary to two or more industries are shown in each of the respective industries. For each industry, the specialization data by industry and product class include only those establishments producing the class of product in the manner defined (e.g. lubricating oils from purchased materials).

Table 8 of the Industry Volume permits analysis of an industry in terms of the differences introduced by variation among establishments in the degree of specialization in the products of the industry or subgroup thereof. For example, where the ratios

of various statistics tend to be different for establishments specializing to different degrees in the products of the industry or in different product classes, such ratios for the industry as a whole would be importantly affected by shifts in product mix. It should be noted that for those industries in which a production process results in the manufacture of byproducts or other similarly highly correlated products which are separate product classes in the Census, the degree of specialization in each of the product classes tends to be somewhat lower.

Differences in the degree of integration of production processes within establishments are often more important than the element of product mix. No comprehensive industry by industry measure of variations in production processes among establishments is available in the 1954 Censustables. A partial measure of differences arising from this factor can be derived for some industries through the metalworking operations or other equipment data. For some other industries, data on the production and use of products within the same establishment may be used as an approximate measure (see also discussion in Section 6, Industry Classification of Establishment, concerning differences in process integration, captive production, etc.)

Statistics for establishments highly specialized in the products of their industry classification are also presented in table 3 of the Industry Volume for industries with a primary product specialization ratio of less than 90 percent. This permits a direct comparison of the statistics for the specialized establishments with the totals for the industry. However, the proportion of the total industry represented by the specialized establishments should be considered in the analytical use of the statistics for such establishments.

### 32. Imputation of Data

Each "key" census total called for on the standard forms had its counterpart in the various short forms. The short forms, however, did not require the detailed distribution of such totals (see Section 9, The Census Report Forms). It was necessary, therefore, to impute figures for these missing detail items in order to publish "universe" census totals of manufacturing activity.

Imputation of missing items was made feasible by use of the Census Bureau's high-speed electronic computer, Univac. Imputation factors (or ratios) were developed for each detailed item, taking into account a plant's industry classification, regional location, and employment size. These factors were applied by Univac against the reported total figures. For example, it was thus possible to estimate, for each establishment reporting on a short form, the number of production workers from the reported total employment figure; production worker wages were imputed from reported total payroll, and, in turn, production worker man-hours were developed from the derived production worker wages. Similarly, figures for the three-fold classification of inventories were developed from the reported total inventories. This imputation system was also applied to standard forms on which detailed items were not reported and where the total figures were too small to warrant "follow-up" correspondence on such omitted data.

Estimates of the incidence of imputation of detailed figures for short forms (as well as omitted detail for standard forms) in the 1954 Census indicate that, on the average, such imputation represents less than 5 percent of the published census totals.

For industries characterized by establishments of some size, the percentage of imputation of general measures such as employment and payrolls, cost of materials, inventories, expenditures, and the like is under 5 percent; for the industries in which

small establishments account for a significant portion of the total, the percent may go as high as 10 to 20. Of the various statistics, man-hours worked tended to have a higher degree of imputation than the other items due to certain difficulties in reporting those data by small and medium-size establishments in industries such as sawmills.

The major exceptions to the imputation procedure for missing data were the detailed products and materials, metalworking operations and equipment inquiries. The value of products and the cost of materials, parts, supplies and containers for establishments not reporting the detailed inquiries were treated as "unspecified" materials or products in the appropriate tables. For metalworking operations and equipment, the statistics were based on establishments reporting data, with appropriate measures of coverage shown in the tables.

### 33. Confidentiality of Data for Individual Companies

The Bureau of the Census is prohibited by law from publishing any statistics that disclose information reported by individual companies. In the 1954 Census, as in 1947, preference was given to geographic regions and divisions over individual States in applying disclosure rules; similarly, States took precedence over standard metropolitan areas, while such areas were given preference over counties, and counties over cities. In tables showing industry detail, major industry group (2-digit) totals were given preference over industry group (3-digit) totals which, in turn, had precedence over individual (4-digit) industries. Similarly, in product tables, 4-digit product groupings took precedence over 5-digit product classes; the latter were given precedence over individual 7-digit products.

Such order-of-precedence was used because (1) it was considered preferable to show regional data for an industry, even at the cost of withholding data for another (usually the least important) State in a region, rather than to show all publishable data for the individual States and group the disclosure States throughout the United States in an "all other" category as was done in the 1939 and earlier censuses; and (2) by giving preference to industry group statistics over individual industries within each State, the extent to which individual States can be compared within the S.I.C. industry classification framework is greatly increased.

For each producing State not shown separately in Table 2 of the Industry Volume, a footnote gives the number of establishments and either an employment range or the actual employment figure. The employment is shown in a range if the State had less than 1,000 employees, if it represented the total for only one or two companies, or if the exact figure would permit deriving (by subtraction) the number of employees in other States represented by only one or two companies. In addition, figures for States with less than 100 employees are shown only in the footnote together with the number of establishments and employment in a range.

In the Area Volume, figures are not shown for a county or for an industry within a State, metropolitan area, or principal industrial county if the publication of such statistics would disclose information for individual companies. In table 3 of that Volume, however, the number of establishments is shown for every county and the number of employees for most counties represented by three or more companies. Moreover, all counties having manufacturing establishments are included in table 7, showing for each county the distribution by employment size of establishments in each major industry group.

For industries with few establishments or considerable geographic concentration, it has frequently been necessary to use geographic regions broader than the traditional nine census divisions, in order to show all plants by some geographic group-

ing. For this purpose the following combinations of Census divisions have been used:

## NORTHEAST

New England  
Middle Atlantic

## SOUTH

South Atlantic  
East South Central  
West South Central

## NORTH CENTRAL

East North Central  
West North Central

## WEST

Mountain  
Pacific

## 34. Indexes of Physical Volume of Production

The Bureau of the Census, in collaboration with the Federal Reserve Board and the Bureau of Labor Statistics, is calculating indexes of the physical volume of manufacturing production for 1954 relative to 1947, primarily from the product and industry statistics published in Volume II, Industry Statistics, of the 1954 Census of Manufactures. In addition to the index for all manufacturing, separate indexes are published for over half the industries (representing more than three-quarters of the value added by manufacture) and for most of the major industry groups. The present calculations represent a continuation of the indexes for 1947 prepared jointly by the Census Bureau and the Federal Reserve Board and those for the period 1899-1939 constructed by

the National Bureau of Economic Research mainly from Census of Manufactures data. The indexes are published in the form of a separate report.

## 35. Abbreviations

The following abbreviations and symbols occur frequently in tables and footnotes:

...	zero
xxx	Not applicable
NA	Not available
n.e.c.	Not elsewhere classified
lin.	linear
equiv.	equivalent
hp	horsepower
kwh	kilowatt-hours
D	Withheld to avoid disclosing figures for individual companies
S.I.C.	Standard Industrial Classification

Other abbreviations, such as lb., gal., yd., doz., and bbl., are used in the customary sense. Where the term "tons" only is used, it refers to short tons of 2,000 pounds; where the figures are expressed in tons of 2,240 pounds, the unit of measure is specified as "long tons" or "gross tons."

## Chapter I.—General Summary

## GENERAL SUMMARY

Table 1A.—MANUFACTURING EMPLOYMENT IN THE UNITED STATES: 1954 AND EARLIER YEARS

(For explanation of column captions see Introduction)

Year <sup>1</sup>	Total manufacturing employment		Employment at operating manufacturing establishments		Employment at administrative and auxiliary units	
	(Number)	Payroll (\$1,000)	Number	Payroll (\$1,000)	Number	Payroll (\$1,000)
1954.....	16,125,550	65,976,667	15,651,294	62,993,321	474,256	2,983,346
1953 <sup>2</sup> .....	17,093,004	68,590,424	16,693,076	66,492,872	399,928	2,097,552
1952 <sup>2</sup> .....	16,061,041	61,140,549	15,732,722	59,598,225	<sup>3</sup> 328,319	<sup>3</sup> 1,542,324
1951 <sup>2</sup> .....	15,637,957	56,283,787	15,309,638	54,741,463	328,319	1,542,324
1950 <sup>2</sup> .....	14,769,931	47,892,894	14,467,149	46,642,786	302,782	1,250,108
1949 <sup>2</sup> .....	13,880,050	42,752,032	13,566,949	41,482,008	313,101	1,270,024

<sup>1</sup>Employment data for administrative offices and auxiliaries are not available for the years prior to 1949. See Table 1B for employment data for earlier years.

<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for these years. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.

<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not compiled for 1952.

## GENERAL SUMMARY

3

Table 1B.—GENERAL STATISTICS FOR OPERATING MANUFACTURING ESTABLISHMENTS IN THE UNITED STATES: 1954 AND EARLIER YEARS

(For explanation of column captions see Introduction.)

Year <sup>1</sup>	Estab- lish- ments	Proprie- tors and firm members	All employees <sup>2</sup>		Production workers			Value added by manu- facture <sup>4</sup>	Capital expendi- tures, new	Horsepower of prime movers and electric motors <sup>5</sup>	Index of physical produc- tion 1939=100

NA Not available.

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 and earlier Censuses. See footnotes to Table 2A for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954-1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cutoff was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The figures for 1939-1954 include data for employees at manufacturing establishments who were engaged in distribution and in construction work. The extent to which data for such employees were included in the figures for earlier years is not known.

<sup>3</sup>The 1949 thru 1954 "Average number of employees" is based on reported employment totals for the payroll periods nearest the 15th of March, May, August, and November except for seasonal industries in 1954 when a 12 month average was used. For 1947, the number of "All employees" represents the average of 12 monthly figures; for 1939 and earlier years, it represents the sum of the average number of production workers for the year and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>4</sup>Value of products shipped less cost of materials, supplies, fuel, electric energy, and contract work. For 1849-1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture.

<sup>5</sup>Driven by purchased energy.

<sup>6</sup>Estimated figure based on Federal Reserve Board data.

<sup>7</sup>Data for 1949 thru 1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

<sup>8</sup>The figures for 1939, but not for earlier years, have been revised on the basis of retabulation of the returns to exclude data for establishments classified as manufacturing in 1939 and prior years but classified as nonmanufacturing beginning with 1947. Value added by manufacture for 1939, prior to revision and on a basis comparable with 1937 and previous years, was \$24.7 billion.

<sup>9</sup>Not revised to exclude data for establishments classified as manufacturing in 1939 and prior years but classified as nonmanufacturing beginning with 1947.

<sup>10</sup>The 1939 figures for "all employees" were revised on the basis of estimates rather than by retabulation of the 1939 reports. The estimates were made in the following manner: for number of employees, by multiplying the retabulated figure for number of production workers by the ratio of all employees to production workers computed from the unrevised 1939 statistics; for salaries and wages, by multiplying the retabulated wage figure by the ratio for salaries and wages also derived from the unrevised 1939 statistics.

<sup>11</sup>Not including data for salaried officers of corporations and their salaries and, therefore, not strictly comparable with figures for other years.

<sup>12</sup>Does not include data for electric motors.

## GENERAL SUMMARY

Table 2A.—GENERAL STATISTICS FOR OPERATING MANUFACTURING ESTABLISHMENTS

(For explanation of column captions see Introduction.)

Code	Industry group and industry	Primary products specialization ratio <sup>1</sup>	Cover-age ratio <sup>2</sup>	Estab-lish-ments (Number)	Pro-prie-tors and firm mem-bers (Number)	1954					Value added by manu-facture, unad-justed <sup>4</sup> (\$1,000)

3996	Soda-fountain and bar equipment.....	83	74	50	21	1,445	6,422	1,129	2,231	4,487	10,808
3997	Miscellaneous products, n.e.c.....	84	88	893	598	20,765	73,740	16,336	31,582	48,010	123,805
3999	Ordnance and accessories.....	(NA)	(NA)	493	121	229,191	1,032,781	170,326	341,151	713,169	1,769,065

Note: Detailed figures may not add to totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>The "Primary product specialization ratio" measures the extent to which plants classified in the industry "specialize" in making products classified as primary to the industry. That is, value of shipments of primary products of plants in the industry is expressed as a ratio of the total shipments of all products made by these establishments, (excluding "miscellaneous receipts," such as receipts for contract and commission work on materials owned by others, scrap and salable refuse, repair, etc.).

<sup>2</sup>The "Coverage ratio" measures the extent to which all shipments of primary products of an industry are made by plants classified in the industry. That is, value of shipments of the primary products made by plants classified in the industry is expressed as a ratio of the total shipments of primary products made by all producers, both in and out of the specified industry.

<sup>3</sup>For most industries in 1954 the data for "All employees" and "Production workers" are based on reported data for the payroll periods ended nearest the 15th of March, May, August, and November. For 1947 and in 1954 for industries of a seasonal type an average based on the mid-month employment for 12 months was used.

<sup>4</sup>Unadjusted value added by manufacture represents value of products shipped less cost of materials, supplies, fuel, electric energy and contract work.

<sup>5</sup>Does not include expenditures for plants under construction and not yet in operation. Figures for such capital expenditures will be shown in other tables.

<sup>6</sup>The total value of shipments figures for industry groups (2- and 3- digit) and a few individual industries (4-digit) have not been published due to the extensive duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

<sup>7</sup>The 1954 and 1947 "all industries" totals are not strictly comparable because of differences in scope between the two years in Major groups 20 and 24 (see footnote 8).

<sup>8</sup>Comparable data are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Industry group		Estab-lish-ments  Number	Pro-prie-tors and firm mem-bers  Number	All employees		Production workers			Value added by manu-facture, unad-justed  (\$1,000)	Capital expendi-tures, new  (\$1,000)
				Number	Payroll  (\$1,000)	Number	Man-hours  (1,000)	Wages  (\$1,000)		
1954

<sup>9</sup>Includes privately owned and/or operated establishments classified in Industry Group 19, "Ordnance and Accessories." Government owned and operated establishments are excluded from the annual survey and the census data.

<sup>10</sup>For further qualifications of the ratio for this industry see Appendix A—Industry Descriptions.

<sup>11</sup>Includes data for Industry 2012, Custom Slaughtering.

<sup>12</sup>Includes data for Industry 2014, Sausage Casings.

<sup>13</sup>Less than \$500 thousand.

<sup>14</sup>Includes data for Industry 2225, Yarn Mills, silk system.

<sup>15</sup>Data for 1954 include reports for establishments which are owned by the government but privately operated and exclude data for T.V.A. The 1947 figures exclude data for government owned but privately operated establishments but include data for T.V.A.

## GENERAL SUMMARY

Table 2B.—UNADJUSTED AND ADJUSTED VALUE ADDED FOR INDUSTRIES AND INDUSTRY GROUPS: 1954

(In thousands of dollars. For explanation of column captions see Introduction)

Code	Industry and industry group	Value added by manufacture, unadjusted <sup>1</sup>	Value added by merchandising (resales)	Net change in finished products and work-in- process inventories between the beginning and end of 1954 <sup>2</sup>	Adjusted value added <sup>1</sup>
	All industries, total.....	116,912,526	1,760,131	-1,222,112	117,450,545

## GENERAL SUMMARY

Table 2B.—UNADJUSTED AND ADJUSTED VALUE ADDED FOR INDUSTRIES AND INDUSTRY GROUPS: 1954—Continued

(In thousands of dollars. For explanation of column captions see Introduction.)

Code	Industry and industry group	Value added by manufacture, unadjusted <sup>1</sup>	Value added by merchandising (resales)	Net change in finished products and work-in- process inventories between the beginning and end of 1954 <sup>2</sup>	Adjusted value added <sup>1</sup>
	Chemicals and allied products—Con.				
287	Fertilizers.....	252,422	17,756	1,872	272,050
2871	Fertilizers.....	171,297	6,334	1,788	179,419
2872	Fertilizers, mixing only.....	81,125	11,422	84	92,631
288	Vegetable and animal oils.....	385,475	7,786	4,753	398,014
2881	Cottonseed oil mills.....	101,164	3,407	7,163	111,734
2882	Linseed oil mills.....	16,679	17	-1,908	14,788
2883	Soybean oil mills.....	106,938	2,754	-2,474	107,218
2884	Vegetable oil mills, nec.....	21,240	708	-82	21,866
2886	Grease and tallow.....	95,451	121	1,053	96,625
2887	Fatty acids.....	21,922	749	1,296	23,967
2889	Animal oils, nec.....	22,079	30	-296	21,813
289	Chemical products, nec.....	1,128,552	50,124	-3,298	1,175,378
2891	Printing ink.....	87,289	714	340	88,343
2892	Essential oils.....	5,484	195	21	5,700
2893	Toilet preparations.....	419,666	15,567	-2,758	432,475
2894	Glue and gelatin.....	64,771	2,065	963	67,799
2895	Carbon black.....	62,424	17	-2,124	60,317
2896	Compressed and liquefied gases.....	111,254	10,863	-277	121,840
2897	Insecticides and fungicides.....	62,099	9,742	-558	71,283
2898	Salt.....	48,936	108	205	49,249
2899	Chemical products, nec.....	266,627	10,853	890	278,370
29	Petroleum and coal products.....	2,582,613	37,876	1,510	2,621,999
2911	Petroleum refining.....	1,901,333	22,196	-5,509	1,918,020
293	Coke and byproducts.....	373,874	45	7,204	381,123
2931	Beehive coke ovens.....	2,494	2	2	2,498
2932	Byproduct coke ovens.....	371,380	43	7,202	378,625
295	Paving and roofing materials.....	199,584	7,057	1,112	207,753
2951	Paving mixtures and blocks.....	50,260	1,582	303	52,145
2952	Roofing felts and coatings.....	149,323	5,475	809	155,607
299	Petroleum and coal products, nec.....	107,818	8,578	-1,297	115,099
2992	Lubricants, nec.....	85,063	7,408	-1,810	90,661
2999	Petroleum and coal products, nec.....	22,754	1,170	513	24,437
30	Rubber products.....	1,903,702	56,230	-5,531	1,954,401
3011	Tires and inner tubes.....	844,545	37,039	-3,813	877,771
3021	Rubber footwear.....	107,027	792	-1,051	106,768
3031	Reclaimed rubber.....	22,043	1,407	4	23,454
3099	Rubber industries, nec.....	930,086	16,992	-671	946,407
31	Leather and leather goods.....	1,637,417	11,593	-8,206	1,640,804
3111	Leather tanning and finishing.....	264,264	785	-4,821	260,228
3121	Industrial leather belting.....	34,911	1,507	-1,035	35,383

19--	Ordnance and accessories.....	1,769,065	9,047	-131,465	1,646,647

<sup>1</sup>Unadjusted value added by manufacture represents value of products shipped (excluding resales) during the year less the cost of materials, supplies, fuel, electric energy, and contract work. Adjusted value added by manufacture represents value of products shipped (including resales of finished products produced by other manufacturing establishments) less cost of products, materials, supplies, fuel, electric energy and contract work plus the net change in finished products and work-in-process inventories between the beginning and end of the year. All other 1954 census tables show only the unadjusted value added by manufacture figures (see Introduction—Value Added by Manufacture).

<sup>2</sup>In 1954, establishments that reported on the short form (generally those with less than six employees) were asked to show only their total beginning and end of year inventories. The 1954 totals were prorated on the basis 1954 industry averages of the establishments that reported detailed inventory by type to obtain inventory figures representing all establishments for 1954.

<sup>3</sup>The adjusted value added figures for industries classified in Major Group 27, Printing and Publishing Industries do not reflect the change in inventories between the beginning and end of the year since inventory statistics were not collected from establishments classified in that industry group.

<sup>4</sup>Includes privately owned and/or operated establishments classified in Industry Group 19, "Ordnance and Accessories." Government owned and operated establishments are excluded from the annual survey and the census data.

## GENERAL SUMMARY

Value.....\$1,000..	859,646	383,169			
Other fuels:					
Value.....do....	200,553	96,457			

NA Not available.

<sup>1</sup>In 1954, establishments that reported on the short form (generally those with less than six employees) were asked to show only their total expenditures for new plant and equipment, total beginning and end of year inventories and total cost of materials, supplies, fuel and electric energy. Their 1954 totals were prorated on the basis of 1954 industry averages of the establishments that reported detailed inventory expenditure, fuel, and electric energy data by type to obtain figures representing all establishments for 1954. In 1947, very small establishments that accounted for approximately 1.4% of the total manufacturing employment did not report inventory expenditure and detailed fuel and electric energy data and are not represented in the 1947 figures. See 1947 Census of Manufactures, Volume I, for a measure of undercoverage by industry.

<sup>2</sup>Detail fuel items will not add to total fuel, because only the total fuels figures were collected for major industries 23 and 27.

## GENERAL SUMMARY

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954.

<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.

<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952. In some instances, the figures have been withheld because the estimates did not meet publication standards.

<sup>4</sup>The employment figures for administrative and auxiliary units are included with those for operating manufacturing establishments.

<sup>5</sup>The definitions of the standard metropolitan areas are shown on pages 42-44.

## STANDARD METROPOLITAN AREAS

(As defined by the Bureau of the Budget)

- AKRON STANDARD METROPOLITAN AREA—Coextensive with Summit County, Ohio
- ALBANY-SCHENECTADY-TROY STANDARD METROPOLITAN AREA—Consists of Albany, Rensselaer, and Schenectady Counties, N. Y.
- ALBUQUERQUE STANDARD METROPOLITAN AREA—Coextensive with Bernalillo County, N. Mex.
- ALLEN TOWN-BETHLEHEM-EASTON STANDARD METROPOLITAN AREA—Consists of Lehigh and Northampton Counties, Pa.; and Warren County, N. J.
- ALTOONA STANDARD METROPOLITAN AREA—Coextensive with Blair County, Pa.
- AMARILLO STANDARD METROPOLITAN AREA—Consists of Potter and Randall Counties, Tex.
- ASHEVILLE STANDARD METROPOLITAN AREA—Coextensive with Buncombe County, N. C.
- ATLANTA STANDARD METROPOLITAN AREA—Consists of Cobb, De Kalb, and Fulton Counties, Ga.
- ATLANTIC CITY STANDARD METROPOLITAN AREA—Coextensive with Atlantic County, N. J.
- AUGUSTA STANDARD METROPOLITAN AREA—Consists of Richmond County, Ga.; and Aiken County, S. C.
- AUSTIN STANDARD METROPOLITAN AREA—Coextensive with Travis County, Tex.
- BALTIMORE STANDARD METROPOLITAN AREA—Consists of Baltimore City, Baltimore and Anne Arundel Counties, Md.
- BATON ROUGE STANDARD METROPOLITAN AREA—Coextensive with East Baton Rouge Parish, La.
- BAY CITY STANDARD METROPOLITAN AREA—Coextensive with Bay County, Mich.
- BEAUMONT-PORT ARTHUR STANDARD METROPOLITAN AREA—Coextensive with Jefferson County, Tex.
- BINGHAMTON STANDARD METROPOLITAN AREA—Coextensive with Broome County, N. Y.
- BIRMINGHAM STANDARD METROPOLITAN AREA—Coextensive with Jefferson County, Ala.
- BOSTON STANDARD METROPOLITAN AREA—Consists of all of Suffolk County; Cambridge, Everett, Malden, Medford, Melrose, Newton, Somerville, Waltham, and Woburn Cities and Arlington, Ashland, Bedford, Belmont, Burlington, Concord, Framingham, Lexington, Lincoln, Natick, North Reading, Reading, Stoneham, Wakefield, Watertown, Wayland, Weston, Wilmington, and Winchester Towns in Middlesex County; Beverly, Lynn, Peabody, and Salem Cities and Danvers, Hamilton, Lynnfield, Manchester, Marblehead, Middleton, Nahant, Saugus, Swampscott, and Wenham Towns in Essex County; Quincy City and Braintree, Brookline, Canton, Cohasset, Dedham, Dover, Medfield, Milton, Needham, Norwood, Randolph, Sharon, Walpole, Wellesley, Westwood, and Weymouth Towns in Norfolk County; and Hingham and Hull Towns in Plymouth County, Mass.
- BRIDGEPORT STANDARD METROPOLITAN AREA—Consists of Bridgeport City and Fairfield, Stratford, and Trumbull Towns in Fairfield County, and Milford Town in New Haven County, Conn.
- BROCKTON STANDARD METROPOLITAN AREA—Consists of Brockton City and Abington, Bridgewater, East Bridgewater, Rockland, West Bridgewater, and Whitman Towns in Plymouth County; Avon, Holbrook, and Stoughton Towns in Norfolk County; and Easton Town in Bristol County, Mass.
- BUFFALO STANDARD METROPOLITAN AREA—Consists of Erie and Niagara Counties, N. Y.
- CANTON STANDARD METROPOLITAN AREA—Coextensive with Stark County, Ohio
- CEDAR RAPIDS STANDARD METROPOLITAN AREA—Coextensive with Linn County, Iowa
- CHARLESTON (S. C.) STANDARD METROPOLITAN AREA—Coextensive with Charleston County, S. C.
- CHARLESTON (W. Va.) STANDARD METROPOLITAN AREA—Consists of Fayette and Kanawha Counties, W. Va.
- CHARLOTTE STANDARD METROPOLITAN AREA—Coextensive with Mecklenburg County, N. C.
- CHATTANOOGA STANDARD METROPOLITAN AREA—Consists of Hamilton County, Tenn.; and Walker County, Ga.
- CHICAGO STANDARD METROPOLITAN AREA—Consists of Cook, Du Page, Kane, Lake, and Will Counties, Ill.; and Lake County, Ind.
- CINCINNATI STANDARD METROPOLITAN AREA—Consists of Hamilton County, Ohio; and Campbell and Kenton Counties, Ky.
- CLEVELAND STANDARD METROPOLITAN AREA—Consists of Cuyahoga and Lake Counties, Ohio
- COLUMBIA STANDARD METROPOLITAN AREA—Coextensive with Richland County, S. C.
- COLUMBUS (GA.) STANDARD METROPOLITAN AREA—Consists of Chattahoochee and Muscogee Counties, Ga.; and Russell County, Ala.
- COLUMBUS (OHIO) STANDARD METROPOLITAN AREA—Coextensive with Franklin County, Ohio
- CORPUS CHRISTI STANDARD METROPOLITAN AREA—Coextensive with Nueces County, Tex.
- DALLAS STANDARD METROPOLITAN AREA—Coextensive with Dallas County, Tex.
- DAVENPORT-ROCK ISLAND-MOLINE STANDARD METROPOLITAN AREA—Consists of Rock Island County, Ill.; and Scott County, Iowa
- DAYTON STANDARD METROPOLITAN AREA—Consists of Greene and Montgomery Counties, Ohio
- DECATUR STANDARD METROPOLITAN AREA—Coextensive with Macon County, Ill.
- DENVER STANDARD METROPOLITAN AREA—Consists of Adams, Arapahoe, Denver, and Jefferson Counties, Colo.
- DES MOINES STANDARD METROPOLITAN AREA—Coextensive with Polk County, Iowa
- DETROIT STANDARD METROPOLITAN AREA—Consists of Macomb, Oakland, and Wayne Counties, Mich.
- DUBUQUE STANDARD METROPOLITAN AREA—Coextensive with Dubuque County, Iowa
- DULUTH-SUPERIOR STANDARD METROPOLITAN AREA—Consists of St. Louis County, Minn.; and Douglas County, Wis.
- DURHAM STANDARD METROPOLITAN AREA—Coextensive with Durham County, N. C.
- EL PASO STANDARD METROPOLITAN AREA—Coextensive with El Paso County, Tex.
- ERIE STANDARD METROPOLITAN AREA—Coextensive with Erie County, Pa.
- EVANSVILLE STANDARD METROPOLITAN AREA—Coextensive with Vanderburgh County, Ind.
- FALL RIVER STANDARD METROPOLITAN AREA—Consists of Fall River City and Somerset, Swansea, and Westport Towns in Bristol County, Mass.; and Tiverton Town in Newport County, R. I.
- FLINT STANDARD METROPOLITAN AREA—Coextensive with Genesee County, Mich.
- FORT SMITH STANDARD METROPOLITAN AREA—Coextensive with Sebastian County, Ark.
- FORT WAYNE STANDARD METROPOLITAN AREA—Coextensive with Allen County, Ind.
- FORT WORTH STANDARD METROPOLITAN AREA—Coextensive with Tarrant County, Tex.
- FRESNO STANDARD METROPOLITAN AREA—Coextensive with Fresno County, Calif.
- GADSDEN STANDARD METROPOLITAN AREA—Coextensive with Etowah County, Ala.
- GALVESTON STANDARD METROPOLITAN AREA—Coextensive with Galveston County, Tex.
- GRAND RAPIDS STANDARD METROPOLITAN AREA—Coextensive with Kent County, Mich.
- GREEN BAY STANDARD METROPOLITAN AREA—Coextensive with Brown County, Wis.
- GREENSBORO-HIGH POINT STANDARD METROPOLITAN AREA—Coextensive with Guilford County, N. C.
- GREENVILLE STANDARD METROPOLITAN AREA—Coextensive with Greenville County, S. C.
- HAMILTON-MIDDLETOWN STANDARD METROPOLITAN AREA—Coextensive with Butler County, Ohio
- HAMPTON-NEWPORT NEWS-WARWICK STANDARD METROPOLITAN AREA—Consists of Hampton, Newport News, and Warwick Cities, Va.
- HARRISBURG STANDARD METROPOLITAN AREA—Consists of Cumberland and Dauphin Counties, Pa.
- HARTFORD STANDARD METROPOLITAN AREA—Consists of Hartford City and Avon, Bloomfield, East Hartford, Farmington, Glastonbury, Manchester, Newington, Rocky Hill, Simsbury, South Windsor, West Hartford, Wethersfield, and Windsor Towns in Hartford County, Conn.
- HOUSTON STANDARD METROPOLITAN AREA—Coextensive with Harris County, Tex.
- HUNTINGTON-ASHLAND STANDARD METROPOLITAN AREA—Consists of Cabell and Wayne Counties, W. Va.; Boyd County, Ky.; and Lawrence County, Ohio
- INDIANAPOLIS STANDARD METROPOLITAN AREA—Coextensive with Marion County, Ind.
- JACKSON (MICH.) STANDARD METROPOLITAN AREA—Coextensive with Jackson County, Mich.
- JACKSON (MISS.) STANDARD METROPOLITAN AREA—Coextensive with Hinds County, Miss.
- JACKSONVILLE STANDARD METROPOLITAN AREA—Coextensive with Duval County, Fla.
- JOHNSTOWN STANDARD METROPOLITAN AREA—Consists of Cambria and Somerset Counties, Pa.
- KALAMAZOO STANDARD METROPOLITAN AREA—Coextensive with Kalamazoo County, Mich.
- KANSAS CITY STANDARD METROPOLITAN AREA—Consists of Johnson and Wyandotte Counties, Kans.; and Clay and Jackson Counties, Mo.
- KENOSHA STANDARD METROPOLITAN AREA—Coextensive with Kenosha County, Wis.
- KNOXVILLE STANDARD METROPOLITAN AREA—Consists of Anderson, Blount, and Knox Counties, Tenn.
- LANCASTER STANDARD METROPOLITAN AREA—Coextensive with Lancaster County, Pa.
- LANSING STANDARD METROPOLITAN AREA—Coextensive with Ingham County, Mich.
- LAREDO STANDARD METROPOLITAN AREA—Coextensive with Webb County, Tex.
- LAWRENCE STANDARD METROPOLITAN AREA—Consists of Lawrence City and Andover, Methuen, and North Andover Towns in Essex County, Mass.
- LEXINGTON STANDARD METROPOLITAN AREA—Coextensive with Fayette County, Ky.

## STANDARD METROPOLITAN AREAS

- LIMA STANDARD METROPOLITAN AREA—Coextensive with Allen County, Ohio.
- LINCOLN STANDARD METROPOLITAN AREA—Coextensive with Lancaster County, Nebr.
- LITTLE ROCK-NORTH LITTLE ROCK STANDARD METROPOLITAN AREA—Coextensive with Pulaski County, Ark.
- LORAIN-ELYRIA STANDARD METROPOLITAN AREA—Coextensive with Lorain County, Ohio.
- LOS ANGELES-LONG BEACH STANDARD METROPOLITAN AREA—Consists of Los Angeles and Orange Counties, Calif.
- LOUISVILLE STANDARD METROPOLITAN AREA—Consists of Jefferson County, Ky.; and Clark and Floyd Counties, Ind.
- LOWELL STANDARD METROPOLITAN AREA—Consists of Lowell City and Billerica, Chelmsford, Dracut, and Tewksbury Towns in Middlesex County, Mass.
- LUBBOCK STANDARD METROPOLITAN AREA—Coextensive with Lubbock County, Tex.
- MACON STANDARD METROPOLITAN AREA—Consists of Bibb and Houston Counties, Ga.
- MADISON STANDARD METROPOLITAN AREA—Coextensive with Dane County, Wis.
- MANCHESTER STANDARD METROPOLITAN AREA—Consists of Manchester City and Goffstown Town in Hillsborough County, N. H.
- MEMPHIS STANDARD METROPOLITAN AREA—Coextensive with Shelby County, Tenn.
- MIAMI STANDARD METROPOLITAN AREA—Coextensive with Dade County, Fla.
- MILWAUKEE STANDARD METROPOLITAN AREA—Coextensive with Milwaukee County, Wis.
- MINNEAPOLIS-ST. PAUL STANDARD METROPOLITAN AREA—Consists of Anoka, Dakota, Hennepin, and Ramsey Counties, Minn.
- MOBILE STANDARD METROPOLITAN AREA—Coextensive with Mobile County, Ala.
- MONTGOMERY STANDARD METROPOLITAN AREA—Coextensive with Montgomery County, Ala.
- MUNCIE STANDARD METROPOLITAN AREA—Coextensive with Delaware County, Ind.
- NASHVILLE STANDARD METROPOLITAN AREA—Coextensive with Davidson County, Tenn.
- NEW BEDFORD STANDARD METROPOLITAN AREA—Consists of New Bedford City and Acushnet, Dartmouth, and Fairhaven Towns in Bristol County, Mass.
- NEW BRITAIN-BRISTOL STANDARD METROPOLITAN AREA—Consists of Bristol and New Britain Cities and Berlin, Plainville, and Southington Towns in Hartford County; and Plymouth Town in Litchfield County, Conn.
- NEW HAVEN STANDARD METROPOLITAN AREA—Consists of New Haven City and Branford, East Haven, Hamden, North Haven, Orange, West Haven and Woodbridge Towns in New Haven County, Conn.
- NEW ORLEANS STANDARD METROPOLITAN AREA—Consists of Jefferson, Orleans, and St. Bernard Parishes, La.
- NEW YORK-NORTHEASTERN NEW JERSEY STANDARD METROPOLITAN AREA—Consists of New York City (Bronx, Kings, New York, Queens, and Richmond Counties) and Nassau, Rockland, Suffolk, and Westchester Counties, N. Y.; and Bergen, Essex, Hudson, Middlesex, Morris, Passaic, Somerset, and Union Counties, N. J.
- NORFOLK-PORTSMOUTH STANDARD METROPOLITAN AREA—Consists of Norfolk and Princess Anne Counties, and the cities of Norfolk, South Norfolk, Portsmouth, and Virginia Beach, Va.
- OGDEN STANDARD METROPOLITAN AREA—Coextensive with Weber County, Utah.
- OKLAHOMA CITY STANDARD METROPOLITAN AREA—Coextensive with Oklahoma County, Okla.
- OMAHA STANDARD METROPOLITAN AREA—Consists of Douglas and Sarpy Counties, Nebr.; and Pottawattamie County, Iowa.
- ORLANDO STANDARD METROPOLITAN AREA—Coextensive with Orange County, Fla.
- PEORIA STANDARD METROPOLITAN AREA—Consists of Peoria and Tazewell Counties, Ill.
- PHILADELPHIA STANDARD METROPOLITAN AREA—Consists of Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties, Pa.; and Burlington, Camden, and Gloucester Counties, N. J.
- PHOENIX STANDARD METROPOLITAN AREA—Coextensive with Maricopa County, Ariz.
- PITTSBURGH STANDARD METROPOLITAN AREA—Consists of Allegheny, Beaver, Washington, and Westmoreland Counties, Pa.
- PITTSFIELD STANDARD METROPOLITAN AREA—Consists of Pittsfield City and Dalton, Lenox, and Lee Towns in Berkshire County, Mass.
- PORTLAND (MAINE) STANDARD METROPOLITAN AREA—Consists of Portland, South Portland, and Westbrook Cities and Cape Elizabeth and Falmouth Towns in Cumberland County, Me.
- PORTLAND (OREG.) STANDARD METROPOLITAN AREA—Consists of Clackamas, Multnomah, and Washington Counties, Oreg.; and Clark County, Wash.
- PROVIDENCE STANDARD METROPOLITAN AREA—Consists of Central Falls, Cranston, Pawtucket, Providence, and Woonsocket Cities and Cumberland, East Providence, Johnston, Lincoln, North Providence, North Smithfield, and Smithfield Towns in Providence County; North Kingston Town in Washington County; Warwick City and East Greenwich, and West Warwick Towns in Kent County; and all of Bristol County, R. I. Also Attleboro City and North Attleborough, and Seekonk Towns in Bristol County; Bellingham, Franklin, Plainville, and Wrentham Towns in Norfolk County; and Blackstone and Millville Towns in Worcester County, Mass.
- PUEBLO STANDARD METROPOLITAN AREA—Coextensive with Pueblo County, Colo.
- RACINE STANDARD METROPOLITAN AREA—Coextensive with Racine County, Wis.
- RALEIGH STANDARD METROPOLITAN AREA—Coextensive with Wake County, N. C.
- READING STANDARD METROPOLITAN AREA—Coextensive with Berks County, Pa.
- RICHMOND STANDARD METROPOLITAN AREA—Consists of Richmond City and Chesterfield, and Henrico Counties, Va.
- ROANOKE STANDARD METROPOLITAN AREA—Consists of Roanoke City and Roanoke County, Va.
- ROCHESTER STANDARD METROPOLITAN AREA—Coextensive with Monroe County, N. Y.
- ROCKFORD STANDARD METROPOLITAN AREA—Coextensive with Winnebago County, Ill.
- SACRAMENTO STANDARD METROPOLITAN AREA—Coextensive with Sacramento County, Calif.
- SAGINAW STANDARD METROPOLITAN AREA—Coextensive with Saginaw County, Mich.
- ST. JOSEPH STANDARD METROPOLITAN AREA—Coextensive with Buchanan County, Mo.
- ST. LOUIS STANDARD METROPOLITAN AREA—Consists of St. Louis City and St. Charles and St. Louis Counties, Mo.; and Madison and St. Clair Counties, Ill.
- SALT LAKE CITY STANDARD METROPOLITAN AREA—Coextensive with Salt Lake County, Utah.
- SAN ANGELO STANDARD METROPOLITAN AREA—Coextensive with Tom Green County, Tex.
- SAN ANTONIO STANDARD METROPOLITAN AREA—Coextensive with Bexar County, Tex.
- SAN BERNARDINO-RIVERSIDE-ONTARIO STANDARD METROPOLITAN AREA—Consists of San Bernardino and Riverside Counties, Calif.
- SAN DIEGO STANDARD METROPOLITAN AREA—Coextensive with San Diego County, Calif.
- SAN FRANCISCO-OAKLAND STANDARD METROPOLITAN AREA—Consists of Alameda, Contra Costa, Marin, San Francisco, San Mateo, and Solano Counties, Calif.
- SAN JOSE STANDARD METROPOLITAN AREA—Coextensive with Santa Clara County, Calif.
- SAVANNAH STANDARD METROPOLITAN AREA—Coextensive with Chatham County, Ga.
- SCRANTON STANDARD METROPOLITAN AREA—Coextensive with Lackawanna County, Pa.
- SEATTLE STANDARD METROPOLITAN AREA—Coextensive with King County, Wash.
- SHREVEPORT STANDARD METROPOLITAN AREA—Consists of Caddo and Bossier Parishes, La.
- SIoux CITY STANDARD METROPOLITAN AREA—Coextensive with Woodbury County, Iowa.
- SIoux FALLS STANDARD METROPOLITAN AREA—Coextensive with Minnehaha County, S. Dak.
- SOUTH BEND STANDARD METROPOLITAN AREA—Coextensive with St. Joseph County, Ind.
- SPOKANE STANDARD METROPOLITAN AREA—Coextensive with Spokane County, Wash.
- SPRINGFIELD (ILL.) STANDARD METROPOLITAN AREA—Coextensive with Sangamon County, Ill.
- SPRINGFIELD (MO.) STANDARD METROPOLITAN AREA—Coextensive with Greene County, Mo.
- SPRINGFIELD (OHIO) STANDARD METROPOLITAN AREA—Coextensive with Clark County, Ohio.
- SPRINGFIELD-HOLYOKE STANDARD METROPOLITAN AREA—Consists of Chicopee, Holyoke, Springfield, and Westfield Cities and Agawam, East Longmeadow, Longmeadow, Ludlow, West Springfield, and Wilbraham Towns in Hampden County; Northampton City and Easthampton, and South Hadley Towns in Hampshire County, Mass. Also Enfield Town in Hartford County, Conn.
- STAMFORD-NORWALK STANDARD METROPOLITAN AREA—Consists of Norwalk and Stamford Cities and Darien, Greenwich, New Canaan, and Westport Towns in Fairfield County, Conn.
- STOCKTON STANDARD METROPOLITAN AREA—Coextensive with San Joaquin County, Calif.
- SYRACUSE STANDARD METROPOLITAN AREA—Coextensive with Onondaga County, N. Y.
- TACOMA STANDARD METROPOLITAN AREA—Coextensive with Pierce County, Wash.
- TAMPA-ST. PETERSBURG STANDARD METROPOLITAN AREA—Consists of Hillsborough and Pinellas Counties, Fla.
- TERRE HAUTE STANDARD METROPOLITAN AREA—Coextensive with Vigo County, Ind.
- TOLEDO STANDARD METROPOLITAN AREA—Coextensive with Lucas County, Ohio.
- TOPEKA STANDARD METROPOLITAN AREA—Coextensive with Shawnee County, Kans.
- TRENTON STANDARD METROPOLITAN AREA—Coextensive with Mercer County, N. J.
- TUCSON STANDARD METROPOLITAN AREA—Coextensive with Pima County, Ariz.
- TULSA STANDARD METROPOLITAN AREA—Coextensive with Tulsa County, Okla.
- UTICA-ROME STANDARD METROPOLITAN AREA—Consists of Herkimer and Oneida Counties, N. Y.

## STANDARD METROPOLITAN AREAS

WACO STANDARD METROPOLITAN AREA—Coextensive with McLennan County, Tex.

WASHINGTON STANDARD METROPOLITAN AREA—Consists of the District of Columbia; Alexandria and Falls Church Cities and Arlington and Fairfax Counties, Va.; Montgomery and Prince Georges Counties, Md.

WATERBURY STANDARD METROPOLITAN AREA—Consists of Waterbury City, Naugatuck Borough, and Beacon Falls, Cheshire, Middlebury, Prospect, and Wolcott Towns in New Haven County; and Thomastown and Watertown Towns in Litchfield County, Conn.

WATERLOO STANDARD METROPOLITAN AREA—Coextensive with Blackhawk County, Iowa

WHEELING-STEUBENVILLE STANDARD METROPOLITAN AREA—Consists of Brooke, Hancock, Marshall, and Ohio Counties, W. Va.; and Belmont and Jefferson Counties, Ohio

WICHITA STANDARD METROPOLITAN AREA—Coextensive with Sedgwick County, Kans.

WICHITA FALLS STANDARD METROPOLITAN AREA—Coextensive with Wichita County, Tex.

WILKES-BARRE-HAZLETON STANDARD METROPOLITAN AREA—Coextensive with Luzerne County, Pa.

WILMINGTON STANDARD METROPOLITAN AREA—Consists of New Castle County, Del.; and Salem County, N. J.

WINSTON-SALEM STANDARD METROPOLITAN AREA—Coextensive with Forsyth County, N. C.

WORCESTER STANDARD METROPOLITAN AREA—Consists of Worcester City and Auburn, East Brookfield, Grafton, Holden, Leicester, Millbury, Northborough, North Brookfield, Shrewsbury, Spencer, Westborough, and West Boylston Towns in Worcester County, Mass.

YORK STANDARD METROPOLITAN AREA—Coextensive with York County, Pa.

YOUNGSTOWN STANDARD METROPOLITAN AREA—Consists of Mahoning and Trumbull Counties, Ohio, and Mercer County, Pa.

Table 4B.—GENERAL STATISTICS FOR ALL OPERATING MANUFACTURING ESTABLISHMENTS BY DIVISIONS, STATES, AND STANDARD METROPOLITAN AREAS:  
1954 AND EARLIER YEARS

(For explanation of column captions see Introduction)

Division, State, Standard Metropolitan Area, and Year	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Capital expenditures, new (\$1,000)
		Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)

## GENERAL SUMMARY

47

Table 4B.—GENERAL STATISTICS FOR ALL OPERATING MANUFACTURING ESTABLISHMENTS BY DIVISIONS, STATES, AND STANDARD METROPOLITAN AREAS:  
1954 AND EARLIER YEARS—Continued

(For explanation of column captions see Introduction)

Division, State, Standard Metropolitan Area, and Year	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Capital expenditures, new (\$1,000)
		Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)

## GENERAL SUMMARY

Table 4B.—GENERAL STATISTICS FOR ALL OPERATING MANUFACTURING ESTABLISHMENTS BY DIVISIONS, STATES, AND STANDARD METROPOLITAN AREAS:  
1954 AND EARLIER YEARS—Continued

(For explanation of column captions see Introduction)

Division, State, Standard Metropolitan Area, and Year	Establish- ments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Capital expenditures, new (\$1,000)		
		Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)

1947.....	554	109,021	331,712	94,606	(NA)	274,351	569,388	33,784
1939.....	429	67,461	110,720	63,010		94,861	200,320	(NA)
1929.....	496	74,600	139,583	66,515		118,047	273,627	
1919.....	764	(NA)	(NA)	63,830		114,650	208,200	

Note: Detailed figures may not equal totals because of independent rounding.

NA Not available.

S Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of consistency review. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 Census and earlier years. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cutoff was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard error associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

<sup>3</sup>This report includes only standard metropolitan areas with 40,000 or more manufacturing employees in 1954 or 1947. For definitions of the areas see footnotes to Table 4A.

<sup>4</sup>Data for the Fall River and New Bedford Standard Metropolitan Areas were combined in 1947 and 1939. The combined data for the two years are given below.

Year	Number of establishments	All employees		Production workers			Value added by manufacture	Capital expenditures, new
		Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)		
1947.....	588	62,572	142,422	57,379	(NA)	122,624	244,346	12,541
1939.....	451	54,791	52,365	48,127		39,790	72,661	(NA)

## GENERAL SUMMARY

Table 5.—GENERAL STATISTICS FOR OPERATING MANUFACTURING ESTABLISHMENTS BY SELECTED COUNTIES: 1954 AND 1947

(For explanation of column captions see Introduction. This table presents, by States, statistics for all counties with 2,500 or more employees in manufacturing establishments in 1954. Statistics for at least five counties are, however, shown for each State. For States having fewer than five counties with 2,500 or more manufacturing employees, the next largest counties were added until a total of five was reached)

State and county	Popula- tion, 1950	1954								1947 <sup>1</sup>

D Withheld to avoid disclosing figures for individual companies. NA Not available.

<sup>1</sup>The 1947 data are not strictly comparable with the figures shown for 1954 due to differences in coverage of loggers and fluid milk distributors. See discussion in Introduction.

<sup>2</sup>San Francisco city is coextensive with San Francisco county.

<sup>3</sup>The independent cities of Baltimore, Md., and St. Louis, Mo., are treated as counties.

<sup>4</sup>A borough of New York City.

	Mountain.....	287	5,049	(D)	4,009	(D)	(D)	(D)	(D)	(D)	(D)
	Pacific.....	1,754	51,009	(D)	38,595	(D)	(D)	(D)	(D)	(D)	(D)

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>For definitions of the divisions, see table 4A.<sup>2</sup>The 1954 and 1947 "All industries" totals are not strictly comparable because of differences in coverage between the two years in major groups 20 and 24. (See footnote 4.)<sup>3</sup>The differences in coverage of establishments in the logging and fluid milk industries significantly affected the comparability of the "All industries" total, for four of the nine geographic divisions. Consequently 1947 "All manufacturing" totals are not shown in the table for these divisions. In the following table, comparable employment and value added by manufactures figures (excluding the establishments in the milk and logging industries) are shown for these divisions:

Division	1954		1947	
	All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
West South Central.....	688,183	5,549,166	546,083	3,008,043
Mountain.....	174,472	1,408,032	136,852	762,599
Pacific.....	1,298,588	10,723,201	906,862	5,496,961

<sup>4</sup>The 1954 Census coverage of establishments in Major Industry Group 20, Food and Kindred Products, and Major Industry Group 24, Lumber and Wood Products, are not comparable with the corresponding group figures published in 1947. In 1947, the Standard Industrial Classification of sub-group 202, Dairy Products differed from that used in 1954 chiefly in that the Industries 2026, Fluid Milk, and 2027, Fluid Milk and Other Products, were not included within the scope of manufacturing. Also, Logging Camps and Contractors, Industry 2411, were not included in the 1947 Census of Manufactures. They were, however, included in the 1954 Census (see Introduction for complete explanation). Comparable employment and value added by manufacture figures for the United States by Divisions for 1954 and 1947 for the Food and Kindred Products Industries (excluding Fluid Milk, Industry 2066, and Fluid Milk and Other Products, Industry 2027) and for the Wood Products group (excluding Logging Camps and Contractors, Industry 2411, are shown below:

Code	Area	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)

3999	Miscellaneous products, nec.	76	25	2,868	9,576	2,514	5,067	7,266	14,278	22,833	622	(D)	(D)
19 --	Ordnance and accessories...	51	40	24,326	97,576	19,638	38,679	73,482	177,087	( <sup>2</sup> )	5,230	(D)	(D)

Note: Detailed figures may not add to total because of independent rounding. (D) Withheld to avoid disclosing figures for individual companies. NA Not available. <sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line. <sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.) <sup>3</sup>The 1954 and 1947 "all industries" totals are not strictly comparable because of differences in scope between the two years in major groups 20 and 24 (see footnote 4). <sup>4</sup>Comparable data for major groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products except subgroup 202, Dairy products.....	64,000	412,000	66,361	339,023
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	28,446	115,463	33,574	114,201

<sup>5</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordinance and Accessories." Establishments which are Government-owned and operated are not included.

1949 <sup>2</sup> .....	3,850,592	12,205,084	3,737,368	11,728,888	113,224	476,196

Note: Middle Atlantic Division consists of: New York, New Jersey, and Pennsylvania.

<sup>1</sup>Employment data for administrative offices and auxiliaries are not available for the years prior to 1949.<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952.

TABLE 1B.—GENERAL STATISTICS FOR OPERATING MANUFACTURING ESTABLISHMENTS IN THE DIVISION: 1954 AND EARLIER YEARS

NA Not available.

<sup>1</sup>Driven by purchased electricity.<sup>2</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 Census and earlier Censuses. See footnotes to Table 2 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "railroad repair shops" and "manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cut-off was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)<sup>3</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

19--	Ordnance and accessories....	125	100	65,261	319,026	45,068	90,573	204,561	548,463	( <sup>2</sup> )	17,180	(D)	(D)

Note: Detailed figures may not add to total because of independent rounding. D Withheld to avoid disclosing figures for individual companies. NA Not available. <sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line. <sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.) <sup>3</sup>The 1954 and 1947 "all industries" totals are not strictly comparable because of differences in scope between the two years in major groups 20 and 24 (see footnote 4). <sup>4</sup>Comparable data for major groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products except subgroup 202, Dairy products.....	271,000	2,394,000	272,963	1,822,069
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	35,869	173,892	37,335	142,888

<sup>5</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Note: East North Central Division consists of: Ohio, Indiana, Illinois, Michigan, and Wisconsin.

<sup>1</sup>Employment data for administrative offices and auxiliaries are not available for the years prior to 1949.<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952.

NA Not available.

<sup>1</sup>Driven by purchased electricity.<sup>2</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 Census and earlier Censuses. See footnotes to Table 2 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "railroad repair shops" and "manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cut-off was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)<sup>3</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

## MANUFACTURES—AREA STATISTICS

## East North Central

Note: Detailed figures may not add to total because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

<sup>3</sup>The 1954 and 1947 "all industries" totals are not strictly comparable because of differences in scope between the two years in major groups 20 and 24 (see footnote 4).

<sup>4</sup>Comparable data for major groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products except subgroup 202, Dairy products.....	317,648	2,821,551	321,150	2,161,720
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	62,184	327,681	66,485	273,872

<sup>5</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Note: West North Division consists of: Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska and Kansas.

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954.<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952.

NA Not available.

<sup>1</sup>Driven by purchased electricity.<sup>2</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 Census and earlier Censuses. See footnotes to Table 2 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "railroad repair shops" and "manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cut-off was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)<sup>3</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

Note: Detailed figures may not add to total because of independent rounding. D Withheld to avoid disclosing figures for individual companies. NA Not available. <sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line. <sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.) <sup>3</sup>Comparable data for major groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
	All industries except subgroups 202 and 2411, total.....	900,354	6,848,222	762,643	3,996,391
20	Food and kindred products except subgroup 202, Dairy products.....	180,153	1,410,525	189,883	1,116,249
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	21,481	110,048	21,054	78,517

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

Note: South Atlantic Division consists of: Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia and Florida.

<sup>1</sup>Employment data for administrative offices and auxiliaries are not available for the years prior to 1949.

<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.

<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952.

TABLE 1B.—GENERAL STATISTICS FOR OPERATING MANUFACTURING ESTABLISHMENTS IN THE DIVISION: 1954 AND EARLIER YEARS

NA Not available.

<sup>1</sup>Driven by purchased electricity.

<sup>2</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 Census and earlier Censuses. See footnotes to Table 2 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "railroad repair shops" and "manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cut-off was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>3</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

## GEOGRAPHIC DIVISIONS

10-47

## South Atlantic

Note: Detailed figures may not add to total because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

<sup>3</sup>The 1954 and 1947 "all industries" totals are not strictly comparable because of differences in scope between the two years in major groups 20 and 24 (see footnote 4).

<sup>4</sup>Comparable data for major groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products, except subgroup 202, Dairy products.....	157,765	1,024,111	135,788	657,604
24	Lumber and wood products, except Industry 2411, Logging camps and contractors.....	120,464	387,774	139,700	383,814

<sup>5</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

1949 <sup>2</sup> .....	603,165	1,435,192	594,336	1,407,008	8,829	28,184

Note: East South Central Division consists of Kentucky, Tennessee, Alabama and Mississippi.

<sup>1</sup>Employment data for administrative offices and auxiliaries are not available for the years prior to 1949.<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.<sup>3</sup>The 1951 data are shown for 1952 since Auxiliary and Administrative unit data were not collected in 1952.

NA Not available.

<sup>1</sup>Driven by purchased electricity.<sup>2</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 Census and earlier Censuses. See footnotes to Table 2 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "railroad repair shops" and "manufactured gas" which were included in 1899-1933 figures; the minimum size of establishments included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cut-off was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)<sup>3</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

Note: Detailed figures may not add to total. D Withheld to avoid disclosing figures for individual companies. NA Not available. <sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line. <sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.) <sup>3</sup>The 1954 and 1947 "all industries" totals are not strictly comparable because of differences in scope between the two years in major groups 20 and 24 (see footnote 4). <sup>4</sup>Comparable data for major groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products except subgroup 202, Dairy products.....	65,548	529,040	62,366	475,749
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	71,056	244,865	98,747	285,087

<sup>5</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordinance and Accessories." (Establishments which are Government-owned and operated are not included.)

1949 <sup>2</sup> .....	574,663	1,584,593	556,462	1,515,529	18,201	69,064

Note: West South Central Division consists of: Arkansas, Louisiana, Oklahoma and Texas.

<sup>1</sup>Employment data for administrative offices and auxiliaries are not available for the years prior to 1949.<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952.

NA Not available.

<sup>1</sup>Driven by purchased electricity.<sup>2</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 Census and earlier Censuses. See footnotes to Table 2 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "railroad repair shops" and "manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cut-off was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)<sup>3</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

Note: Detailed figures may not add to total. D Withheld to avoid disclosing figures for individual companies. NA Not available. <sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line. <sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.) <sup>3</sup>Comparable data for major groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census, the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
	All industries except subgroups 202 and 2411, total.....	688,183	5,549,166	546,083	3,008,043
20	Food and kindred products except subgroup 202, Dairy products.....	108,111	769,539	106,069	571,524
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	57,732	204,268	90,924	272,233

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

1949 <sup>2</sup> .....	144,888	433,435	142,600	422,955	2,288	10,480

Note: Mountain Division consists of: Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah and Nevada.

<sup>1</sup>Employment data for administrative offices and auxiliaries are not available for the years prior to 1949.<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952.

Table 1B.--GENERAL STATISTICS FOR OPERATING MANUFACTURING ESTABLISHMENTS IN THE MOUNTAIN DIVISION: 1954 AND EARLIER YEARS

NA Not available.

<sup>1</sup>Driven by purchased electricity.<sup>2</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 Census and earlier Censuses. See footnotes to Table 2 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "railroad repair shops" and "manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cut-off was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)<sup>3</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

Note: Detailed figures may not add to total. D Withheld to avoid disclosing figures for individual companies. NA Not available.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line. <sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.) <sup>3</sup>Comparable data for major groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	All industries except subgroups 202 and 2411, total.....	174,472	1,408,032	5,852	762,599
24	Food and kindred products except subgroup 202, Dairy products.....	35,471	254,765	36,958	222,418
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	23,346	145,403	20,930	100,538

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

Note: Pacific Division consists of: Washington, Oregon and California.

<sup>1</sup>Employment data for administrative offices and auxiliaries are not available for the years prior to 1949.<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952.

NA Not available.

<sup>1</sup>Driven by purchased electricity.<sup>2</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 Census and earlier Censuses. See footnotes to Table 2 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "railroad repair shops" and "manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cut-off was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)<sup>3</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

Table 2.—GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1954 AND 1947—Continued

(For explanation of column captions see Introduction)

Code	Industry group and industry	1954									1947		
		Establishments, number		All employees		Production workers			Value added by manufacture (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
		Total	20 or more employees	Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)					
39	Miscellaneous manufactures <sup>4</sup> --Continued												
398	Miscellaneous manufactures <sup>4</sup> --Continued												
399	Miscellaneous products, nec.	114	13	993	3,621	814	1,597	2,532	7,019	13,724	205	1,176	6,363
19--	Ordnance and accessories....	59	37	27,278	1,289	195	38,183	87,165	216,447	( <sup>2</sup> )	4,337	(D)	(D)

Note: Detailed figures may not add to total.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

<sup>3</sup>Comparable data for major groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
	All industries, except subgroups 202 and 2411, total.....	1,298,588	10,723,430	906,862	5,496,961
20	Food and kindred products, except subgroup 202, Dairy products.....	163,340	1,527,687	157,562	1,061,448
24	Lumber and wood products, except Industry 2411, Logging camps and contractors.....	149,849	1,089,085	133,050	869,252

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

## MANUFACTURES—AREA STATISTICS

Table 1.—MANUFACTURING EMPLOYMENT AT OPERATING ESTABLISHMENTS AND CENTRAL ADMINISTRATIVE OFFICES AND AUXILIARIES FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS: 1954 AND EARLIER YEARS

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State, standard metropolitan areas, and year <sup>1</sup>	Total manufacturing employment		Employment at operating manufacturing establishments		Employment at administrative offices and auxiliaries	
	(Number)	Payroll (\$1,000)	Number	Payroll (\$1,000)	Number	Payroll (\$1,000)
Alabama:						
1954.....	220,077	690,015	217,084	672,109	2,993	17,906
1953 <sup>2</sup> .....	228,179	697,865	233,139	675,265	5,040	22,600
1952 <sup>2</sup> .....	213,010	608,102	209,197	593,046	3,813	15,056
1951 <sup>2</sup> .....	215,763	588,017	211,950	572,961	3,813	15,056
1950 <sup>2</sup> .....	211,162	524,322	207,544	511,374	3,618	12,948
1949 <sup>2</sup> .....	193,878	461,598	190,261	449,154	3,617	12,444
1954						
Standard metropolitan areas:						
Birmingham <sup>4</sup> .....	60,663	253,862	57,762	236,624	2,901	17,238
Columbus, Georgia <sup>5</sup> .....	17,976	44,097	17,913	43,788	63	309
Gadsden <sup>6</sup> .....	12,760	47,483	12,760	47,483	...	...
Mobile <sup>7</sup> .....	15,418	56,957	15,381	56,703	37	254
Montgomery <sup>8</sup> .....	6,281	17,753	6,281	17,753	...	...

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954. <sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954. <sup>3</sup>The 1951 data are shown for 1952 since auxiliary administrative unit data were not collected in 1952. <sup>4</sup>The Birmingham Standard Metropolitan Area consists of Jefferson County, Alabama. <sup>5</sup>The Columbus, Georgia Standard Metropolitan Area consists of Russell County, Alabama; Catta-hoochee and Muscogee Counties, Georgia. <sup>6</sup>The Gadsden Standard Metropolitan Area consists of Etowah County, Alabama. <sup>7</sup>The Mobile Standard Metropolitan Area consists of Mobile County, Alabama. <sup>8</sup>The Montgomery Standard Metropolitan Area consists of Montgomery County, Alabama.

NA Not available.

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cutoff was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these establishments are published in the Annual Survey of Manufactures volume for this period.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>The 1947 data are not strictly comparable with the figures shown for 1954 due to differences in coverage of loggers and fluid milk distributors.  
See discussion in Introduction and footnotes to Table 4.

Table 4.—GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1954 AND 1947  
(For explanation of column captions see Introduction)

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate Major industry group (2-digit) lines and the "all industries" line.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

<sup>3</sup>The 1954 and 1947 "all industries" totals are not strictly comparable because of differences in scope between the two years in major groups 20 and 24 (see footnote 4).

<sup>4</sup>Comparable data for Major groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products except subgroup 202, Dairy products.....	13,069	72,999	11,221	52,040
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	25,476	78,492	37,431	101,242

<sup>5</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

## MANUFACTURES—AREA STATISTICS

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY GROUP: 1954 AND 1947  
(For explanation of column captions see Introduction)

Code	Industry group	Establishments, number	1954							1947	
			All employees		Production workers			Value added by manufacture	Capital expenditures, new	All employees, number	Value added by manufacture
			Number	Payroll (\$1,000)	Number	Man-hours ((1,000)	Wages (\$1,000)				
			BIRMINGHAM STANDARD METROPOLITAN AREA (Consists of Jefferson County, Alabama)

Note: Detailed figures may not add to the totals because of independent rounding. D Withheld to avoid disclosing figures for individual companies. <sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries" line. <sup>2</sup>The 1954 and 1947 "All industries" totals are not strictly comparable because of differences in scope between the two years in Major group 20 (see footnote 3). <sup>3</sup>Comparable data for Major group 20 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products except Subgroup 202, Dairy Products.....	4,273	27,065	4,109	21,530

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordinance and Accessories." (Establishments which are Government-owned and operated are not included.)

Table 6.—GENERAL STATISTICS FOR PRINCIPAL INDUSTRIAL COUNTIES (THOSE WITH 20,000 OR MORE MANUFACTURING EMPLOYEES), BY MAJOR INDUSTRY GROUPS: 1954 AND 1947

(Jefferson County is coextensive with the Birmingham Standard Metropolitan Area, data for which are shown in Table 5.)

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1954

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954. <sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954. <sup>3</sup>The 1951 data are shown for 1952 as auxiliary and administrative unit data were not collected in 1952. <sup>4</sup>The Phoenix Standard Metropolitan Area consists of Maricopa County, Arizona. <sup>5</sup>The Tucson Standard Metropolitan Area consists of Pima County, Arizona.

STANDARD METROPOLITAN AREAS (None with 40,000 or more manufacturing employees in this State)								

NA Not available.

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cut-off was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

## Footnotes to Table 4, Arizona:

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

<sup>3</sup>Comparable data are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also exclude plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
	All industries except subgroups 202 and 2411, total.....	24,609	181,804	13,955	82,250
20	Food and kindred products except subgroup 202, Dairy products.....	3,198	28,304	3,200	17,464
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	2,491	14,090	2,530	12,620

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

Table 5.--GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY GROUPS: 1954 AND 1947  
(This State contained no standard metropolitan area with 40,000 or more manufacturing employees in 1954 or 1947)

Table 6.--GENERAL STATISTICS FOR PRINCIPAL INDUSTRIAL COUNTIES (THOSE WITH 20,000 OR MORE MANUFACTURING EMPLOYEES),  
BY MAJOR INDUSTRY GROUPS: 1954 AND 1947  
(This State contained no county with 20,000 or more manufacturing employees in 1954 or 1947)

## MANUFACTURES—AREA STATISTICS

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1954

20 Food and kindred products	26 Pulp, paper and products	32 Stone, clay, and glass products	38 Instruments and related products
21 Tobacco manufactures	27 Printing and publishing	33 Primary metal industries	39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)
22 Textile mill products	28 Chemicals and products	34 Fabricated metal products	
23 Apparel and related products	29 Petroleum and coal products	35 Machinery, except electrical	
24 Lumber and wood products	30 Rubber products	36 Electrical machinery	
25 Furniture and fixtures	31 Leather and leather goods	37 Transportation equipment	

(Counties and size classes in which no manufacturing establishments were reported are omitted)

# ARKANSAS (75 COUNTIES)

## MANUFACTURES—AREA STATISTICS

Table 1.—MANUFACTURING EMPLOYMENT AT OPERATING ESTABLISHMENTS AND CENTRAL ADMINISTRATIVE OFFICES AND AUXILIARIES FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS: 1954 AND EARLIER YEARS

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State, standard metropolitan area, and year <sup>1</sup>	Total manufacturing employment		Employment at operating manufacturing establishments		Employment at administrative offices and auxiliaries	
	(Number)	Payroll (\$1,000)	Number	Payroll (\$1,000)	Number	Payroll (\$1,000)
Arkansas:						
1954.....	79,196	222,293	78,391	218,473	805	3,820
1953 <sup>2</sup> .....	80,525	219,463	79,575	215,643	950	3,820
1952 <sup>2</sup> .....	80,331	208,802	79,702	206,654	<sup>3</sup> 629	<sup>3</sup> 2,148
1951 <sup>2</sup> .....	75,987	181,739	75,358	179,591	629	2,148
1950 <sup>2</sup> .....	72,926	157,190	72,090	154,558	836	2,632
1949 <sup>2</sup> .....	62,846	125,250	62,252	123,306	594	1,944
1954						
Standard Metropolitan Areas:						
Fort Smith <sup>4</sup> .....	6,376	19,472	6,376	19,472	...	...
Little Rock-North Little Rock <sup>5</sup> .....	11,784	34,538	11,626	33,889	158	649

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954.

<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.

<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952.

<sup>4</sup>The Fort Smith Standard Metropolitan Area consists of Sebastian County, Arkansas.

<sup>5</sup>The Little Rock-North Little Rock Standard Metropolitan Area consists of Pulaski County, Arkansas.

Table 2.—GENERAL STATISTICS FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES: 1954 AND EARLIER YEARS

(For explanation of column captions see Introduction)

STANDARD METROPOLITAN AREAS (None with 40,000 or more manufacturing employees in this State)						

NA Not available.

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cutoff was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

D Withheld to avoid disclosing figures for individual companies.

NA Detail figures are not available, but are included in totals for the area.

<sup>1</sup>The 1947 data are not strictly comparable with the figures shown for 1954 due to differences in coverage of loggers and fluid milk distributors. See discussion in Introduction and footnotes to Table 4.

<sup>2</sup>General statistics for Texarkana city in Bowie County, Texas, are shown in Table 3 for the State of Texas.

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

<sup>3</sup>Comparable data are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
	All industries except subgroups 202 and 2411, total.....	74,966	438,116	65,071	263,782
20	Food and kindred products except subgroup 202, Dairy products.....	11,131	61,849	8,988	37,286
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	20,000	66,000	28,749	83,775

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY GROUPS: 1954 AND 1947  
(This State contained no standard metropolitan area with 40,000 or more manufacturing employees in 1954 or 1947)

Table 6.—GENERAL STATISTICS FOR PRINCIPAL INDUSTRIAL COUNTIES (THOSE WITH 20,000 OR MORE MANUFACTURING EMPLOYEES), BY MAJOR INDUSTRY GROUPS: 1954 AND 1947

(This State contained no county with 20,000 or more manufacturing employees in 1954 and 1947)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

State, county, and size class	Establishments, total	Number of establishments by major industry group (see headnote for titles)

Stockton <sup>11</sup> .....	11,145	45,631	11,033	45,205	112	426

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954.

<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.

<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952.

<sup>4</sup>The Fresno Standard Metropolitan Area consists of Fresno County, California.

<sup>5</sup>The Los Angeles-Long Beach Standard Metropolitan Area consists of Los Angeles and Orange Counties, California.

<sup>6</sup>The Sacramento Standard Metropolitan Area consists of Sacramento County, California.

<sup>7</sup>The San Bernardino-Riverside-Ontario Standard Metropolitan Area consists of San Bernardino and Riverside Counties, California.

<sup>8</sup>The San Diego Standard Metropolitan Area consists of San Diego County, California.

<sup>9</sup>The San Francisco-Oakland Standard Metropolitan Area consists of Alameda, Contra Costa, Marin, San Francisco, San Mateo, and Solano Counties, California.

<sup>10</sup>The San Jose Standard Metropolitan Area consists of Santa Clara County, California.

<sup>11</sup>The Stockton Standard Metropolitan Area consists of San Joaquin County, California.

NA Not available.

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; motion pictures were no longer classified as manufacturing after 1931; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cut-off was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

D Withheld to avoid disclosing figures for individual companies.

NA Detail figures are not available but are included in totals for the area.

<sup>1</sup>The 1947 data are not strictly comparable with the figures shown for 1954 due to differences in coverage of loggers and fluid milk distributors. See discussion in Introduction and footnotes to Table 4.<sup>2</sup>A special Census of Population conducted by the Bureau of Census between 1950 and 1953 indicated that the city had a population of 10,000 inhabitants or more. Consequently data are included for this city. The population figures shown in the table however, are based on the 1950 Census of Population.<sup>3</sup>San Francisco city is coextensive with San Francisco county.

Table 4.—GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1954 AND 1947  
(For explanation of column captions see Introduction)

Ind. code	Industry	1954								1947			
		Establishments, number		All employees		Production workers			Value added by manufacture (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)	All employees, number	Value added by manufacture (\$1,000)

3999	Miscellaneous products, n.e.c..	101	13	946	3,517	776	1,534	2,459	6,727	13,125	187	1,056	5,422
1900	Ordinance and accessories.....	50	30	24,057	115,207	17,014	33,364	77,159	194,323	( <sup>2</sup> )	3,648	(D)	(D)

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

<sup>3</sup>The 1954 and 1947 "all industries" totals are not strictly comparable because of differences in scope between the two years in Major groups 20 and 24 (see footnote 4).

<sup>4</sup>Comparable data for Major groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products except subgroup 202, Dairy products.....	125,000	1,229,000	115,956	819,687
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	49,823	373,844	38,484	226,233

<sup>5</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordinance and Accessories." (Establishments which are Government-owned and operated are not included.)

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY GROUP: 1954 AND 1947

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

Footnotes continued on next page

Footnotes for Table 5—Continued.

NA Not available.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries" line.

<sup>2</sup>The 1954 and 1947 "All industries" totals are not strictly comparable because of differences in scope between the two years in Major Group 20 (see footnote 3).

<sup>3</sup>Comparable data for Major Group 20 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products except Subgroup 202, Dairy Products <sup>1</sup> , Los Angeles-Long Beach Standard Metropolitan Area.....	42,534	365,897	36,000	239,000
	San Diego Standard Metropolitan Area.....	3,522	32,713	4,400	30,000
	San Francisco-Oakland Standard Metropolitan Area.....	30,914	370,818	31,000	241,000

<sup>4</sup>Included privately owned/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

## MANUFACTURES—AREA STATISTICS

Table 6.—GENERAL STATISTICS FOR PRINCIPAL INDUSTRIAL COUNTIES, BY MAJOR INDUSTRY GROUP: 1954 AND 1947

(Principal industrial counties include all counties with 20,000 or more manufacturing employees. For explanation of column captions see Introduction)

Code	Major industry group	1954								1947	
		Establish- ments, number	All employees		Production workers			Value added by manu- facture (\$1,000)	Capital expendit- ures, new (\$1,000)	All employees, number	Value added by manu- facture (\$1,000)
			Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)

D Withheld to avoid disclosing data for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing data for individual companies, the statistics for some industry groups are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the "All industries" line.

<sup>2</sup>The 1954 and 1947 "All industries" totals are not strictly comparable because of differences in coverage of loggers and fluid milk distributors. See discussion in Introduction and footnote to Table 4 for comparable figures at the State level.

<sup>3</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

## MANUFACTURES—AREA STATISTICS

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1954

20 Food and kindred products	26 Pulp, paper and products	32 Stone, clay, and glass products	38 Instruments and related products
21 Tobacco manufactures	27 Printing and publishing	33 Primary metal industries	39 Miscellaneous manufactures (Includes Group 19)
22 Textile mill products	28 Chemicals and products	34 Fabricated metal products	Ordnance and accessories)
23 Apparel and related products	29 Petroleum and coal products	35 Machinery, except electrical	
24 Lumber and wood products	30 Rubber products	36 Electrical machinery	
25 Furniture and fixtures	31 Leather and leather goods	37 Transportation equipment	

(Counties and size classes in which no manufacturing establishments were reported are omitted)

## MANUFACTURES—AREA STATISTICS

Table 1.—MANUFACTURING EMPLOYMENT AT OPERATING ESTABLISHMENTS AND CENTRAL ADMINISTRATIVE OFFICES AND AUXILIARIES FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS: 1954 AND EARLIER YEARS

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State, standard metropolitan areas, and year <sup>1</sup>	Total manufacturing employment		Employment at operating manufacturing establishments		Employment at administrative offices and auxiliaries	
	(Number)	Payroll (\$1,000)	Number	Payroll (\$1,000)	Number	Payroll (\$1,000)
Colorado:						
1954.....	65,002	257,286	63,041	247,110	1,961	10,176
1953 <sup>2</sup> .....	60,220	237,137	58,864	230,377	1,356	6,760
1952 <sup>2</sup> .....	59,390	213,998	58,577	209,178	<sup>3</sup> 813	<sup>3</sup> 4,820
1951 <sup>2</sup> .....	58,157	196,178	57,344	191,358	813	4,820
1950 <sup>2</sup> .....	56,508	166,105	55,657	161,773	851	4,332
1949 <sup>2</sup> .....	50,593	149,903	49,565	145,271	1,028	4,632
1954						
Standard metropolitan areas:						
Denver <sup>4</sup> .....	42,583	176,666	40,774	167,289	1,809	9,377
Pueblo <sup>5</sup> .....	8,675	36,199	8,675	36,199	...	...

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954.

<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.

<sup>3</sup>The 1951 data is shown for 1952 as auxiliary and administrative unit data were not collected in 1952.

<sup>4</sup>The Denver Standard Metropolitan Area consists of Adams, Arapahoe, Denver, and Jefferson Counties, Colorado.

<sup>5</sup>The Pueblo Standard Metropolitan Area consists of Pueblo County, Colorado.

Table 2.—GENERAL STATISTICS FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES: 1954 AND EARLIER YEARS

(For explanation of column captions see Introduction)

Year	Establish- ments, number	All employees		Production workers		Value added by manufacture (\$1,000)

1947.....	(NA)	34,288	(NA)	(NA)	(NA)	183,713	

NA Not available. <sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cutoff was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.) <sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

## MANUFACTURES--AREA STATISTICS

Table 3.--GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS, COUNTIES, AND URBAN PLACES: 1954 AND 1947  
(For explanation of column captions see Introduction)

Area, county, and place	Popula- tion, 1950	1954								1947	
		Estab- lish- ments, number	All employees		Production workers			Value added by manu- facture (\$1,000)	Capital expendi- tures, new (\$1,000)	All employees, number	Value added by manu- facture (\$1,000)
			Number	Payroll (\$1,000)	Number	Man- hours (\$1,000)	Wages (\$1,000)

D Withheld to avoid disclosing figures for individual companies. NA Not available. <sup>1</sup>The 1947 data are not strictly comparable with the figures shown for 1954 due to differences in coverages of loggers and fluid milk distributors. See discussion in Introduction and footnotes to Table 4. <sup>2</sup>Denver County is coextensive with Denver city.

Table 4.—GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1954 AND 1947  
(For explanation of column captions see Introduction)

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

Footnotes continued on next page

Footnotes for Table 4.

<sup>3</sup>Comparable data are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
	All industries except subgroups 202 and 2411, total.....	60,805	454,199	53,587	284,040
20	Food and kindred products except subgroup 202, Dairy products.....	14,566	103,392	14,811	89,941
24	Lumber and wood products except Industry 2411, logging camps and contractors.....	2,751	12,185	2,282	8,106

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

## MANUFACTURES—AREA STATISTICS

Note: Detailed figures may not add to the totals because of independent rounding. D Withheld to avoid disclosing figures for individual companies. NA Not available. <sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries" line. <sup>2</sup>The 1954 and 1947 "All industries" totals are not strictly comparable because of differences in coverage of loggers and fluid milk distributors. See discussion in Introduction and footnote to Table 4 for comparable figures at the State level. <sup>3</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

Table 6.—GENERAL STATISTICS FOR PRINCIPAL INDUSTRIAL COUNTIES, BY MAJOR INDUSTRY GROUP: 1954 AND 1947  
 (Principal industrial counties include all counties with 20,000 or more manufacturing employees. For explanation of column captions see Introduction)

1949 <sup>2</sup> .....	345,439	1,082,450	337,143	1,050,926	8,296	31,524
1954						
Standard metropolitan areas:						
Bridgeport <sup>4</sup> .....	67,545	293,654	64,873	279,486	2,672	14,168
Hartford <sup>5</sup> .....	77,320	343,601	76,146	335,056	1,174	8,545
New Britain-Bristol <sup>6</sup> .....	44,141	179,469	43,950	178,017	191	1,452
New Haven <sup>7</sup> .....	46,592	183,288	46,566	183,239	26	49
Springfield-Holyoke <sup>8</sup> .....	74,496	303,873	74,350	302,543	146	1,330
Stamford-Norwalk <sup>9</sup> .....	30,871	132,743	30,372	130,404	499	2,339
Waterbury <sup>10</sup> .....	43,029	184,443	42,186	179,067	843	5,376

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954.

<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.

<sup>3</sup>The 1951 data are shown for 1952 because auxiliary and administrative unit data were not collected in 1952.

<sup>4</sup>The Bridgeport Standard Metropolitan Area consists of Bridgeport city; Fairfield, Stratford, and Trumbull towns in Fairfield County, Conn.; Milford town in New Haven County, Connecticut.

<sup>5</sup>The Hartford Standard Metropolitan Area consists of Hartford city; Avon, Bloomfield, East Hartford, Farmington, Glastonbury, Manchester, Newington, Rocky Hill, Simsbury, South Windsor, West Hartford, Wethersfield, and Windsor towns in Hartford County, Connecticut.

<sup>6</sup>The New Britain-Bristol Standard Metropolitan Area consists of Bristol and New Britain cities; Berlin, Plainville, and Southington towns in Hartford County, Connecticut; Plymouth town in Litchfield County, Connecticut.

<sup>7</sup>The New Haven Standard Metropolitan Area consists of New Haven city; Branford, East Haven, Hamden, North Haven, Orange, West Haven, and Woodbridge towns in New Haven County, Connecticut.

<sup>8</sup>The Springfield-Holyoke Standard Metropolitan Area consists of Chicopee, Holyoke, Springfield, and Westfield cities, Agawam, East Longmeadow, Longmeadow, Ludlow, West Springfield, and Wilbraham towns in Hampden County, Mass.; Northampton city, Easthampton and South Hadley towns in Hampshire County, Mass.; Enfield town in Hartford County, Conn.

<sup>9</sup>The Stamford-Norwalk Standard Metropolitan Area consists of Norwalk and Stamford cities; Darien, Greenwich, New Canaan, and Westport towns in Fairfield County, Connecticut.

<sup>10</sup>The Waterbury Standard Metropolitan Area consists of Waterbury city; Naugatuck borough; Beacon Falls, Cheshire, Middlebury, Prospect, and Wolcott towns in New Haven County, Conn.; Thomastown and Watertown towns in Litchfield County, Connecticut.

Table 2.—GENERAL STATISTICS FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES: 1954 AND EARLIER YEARS

(For explanation of column captions see Introduction)

NA Not available.

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cutoff was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures Volume for this period.

## MANUFACTURES—AREA STATISTICS

D Withheld to avoid disclosing figures for individual companies.

NA Not available

<sup>1</sup>The 1947 data are not strictly comparable with the figures shown for 1954 due to differences in coverage of loggers and fluid milk distributors.  
See discussion in Introduction and footnotes to Table 4.

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

<sup>3</sup>The 1954 and 1947 "all industries" totals are not strictly comparable because of differences in scope between the two years in major groups 20 and 24 (see footnote 4).

<sup>4</sup>Comparable data for major groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 are classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Ind. code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products except subgroup 202, Dairy products.....	8,149	58,904	7,706	44,380
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	1,550	8,500	1,427	5,494

<sup>5</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY GROUP: 1954 AND 1947

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>The Bridgeport Standard Metropolitan Area consists of Bridgeport city; Fairfield, Stratford, and Trumbull towns in Fairfield County, Connecticut; Milford town in New Haven County, Connecticut.

<sup>2</sup>In order to avoid disclosing figures for individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries" line.

<sup>3</sup>The 1954 and 1947 "All industries" totals are not strictly comparable because of differences in scope between the two years in Major Group 20 (see footnote 3).

<sup>4</sup>Comparable data for Major Group 20 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products except Subgroup 202 Dairy Products:				
	Bridgeport Standard Metropolitan Area.....	1,243	6,734	1,300	5,700
	Hartford Standard Metropolitan Area.....	2,043	14,076	125	850
	New Britain-Bristol Standard Metropolitan Area.....	243	1,180	475	2,450
	New Haven Standard Metropolitan Area.....	1,781	11,142	1,200	4,800
	Waterbury Standard Metropolitan Area.....	779	8,674	1,150	10,750

<sup>5</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

<sup>6</sup>The Hartford Standard Metropolitan Area consists of Hartford city; Avon, Bloomfield, East Hartford, Farmington, Glastonbury, Manchester, Newington, Rocky Hill, Simsbury, South Windsor, West Hartford, Wethersfield, and Windsor towns in Hartford County, Connecticut.

<sup>7</sup>The New Britain-Bristol Standard Metropolitan Area consists of Bristol and New Britain cities; Berlin, Plainville, and Southington towns in Hartford County, Connecticut; Plymouth town in Litchfield County, Connecticut.

<sup>8</sup>The New Haven Standard Metropolitan Area consists of New Haven city; Branford, East Haven, Hamden, North Haven, Orange, West Haven, and Woodbridge towns in New Haven County, Connecticut.

<sup>9</sup>The Waterbury Standard Metropolitan Area consists of Waterbury city; Naugatuck borough; Beacon Falls, Cheshire, Middlebury, Prospect, and Wolcott towns in New Haven County, Connecticut; Thomastown and Watertown towns in Litchfield County, Connecticut.

## MANUFACTURES—AREA STATISTICS

## MANUFACTURES—AREA STATISTICS

Table 1.—MANUFACTURING EMPLOYMENT AT OPERATING ESTABLISHMENTS AND CENTRAL ADMINISTRATIVE OFFICES AND AUXILIARIES FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS: 1954 AND EARLIER YEARS

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State, standard metropolitan areas, and year <sup>1</sup>	Total manufacturing employment		Employment at operating manufacturing establishments		Employment at administrative offices and auxiliaries	
	(Number)	Payroll (\$1,000)	Number	Payroll (\$1,000)	Number	Payroll (\$1,000)
Delaware:						
1954.....	54,530	267,354	39,418	151,269	15,112	116,085
1953 <sup>2</sup> .....	58,550	255,801	43,493	164,641	15,057	91,160
1952 <sup>2</sup> .....	58,670	239,593	45,367	164,913	<sup>3</sup> 13,303	<sup>3</sup> 74,680
1951 <sup>2</sup> .....	56,809	217,657	43,506	142,977	13,303	74,680
Standard metropolitan areas:						
Wilmington <sup>4</sup> .....	53,089	287,695	37,919	170,700	15,170	116,995

<sup>1</sup>Comparable data for administrative offices and auxiliaries are not available for the years prior to 1951. Similar data for standard metropolitan areas are available only for 1954.<sup>2</sup>The employment figures for operating manufacturing establishments for 1951-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with figures for these units that were collected by the Bureau of the Census for the year 1954.<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952.<sup>4</sup>The Wilmington Standard Metropolitan Area consists of New Castle County, Delaware; and Salem County, New Jersey.

Table 2.—GENERAL STATISTICS FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES: 1954 AND EARLIER YEARS

(For explanation of column captions see Introduction)

Year	Establish- ments, number	All employees		Production workers		Value added by manufacture (\$1,000)

NA Not available.

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cutoff was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.<sup>3</sup>There are 53,089 manufacturing employees (including central administrative office and auxiliary unit employment) in the Wilmington Standard Metropolitan Area (see Table 1). The data in this table represent employment at operating manufacturing establishments.

See footnotes at end of table.

Table 4.—GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1954 AND 1947—Continued  
(For explanation of column captions see Introduction)

Ind. code	Industry	1954									1947		
		Establish- ments, number		All employees		Production workers			Value added by manufacture	Value of shipments	Capital expendi- tures, new	All employees, number	Value added by manufacture
		Total	20 or more em- ployees	Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)					
39 396	Miscellaneous manufactures <sup>5</sup> Costume jewelry and notions..	42 18	7 1	(D) 186	(D) 371	(D) 183	(D) 258	(D) 350	(D) 669	(D) ( <sup>2</sup> )	(D) 18	1,334 (D)	4,092 (D)

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

<sup>3</sup>The 1954 and 1947 "all industries" totals are not strictly comparable because of differences in scope between the two years in major groups 20 and 24 (see footnote 4).

<sup>4</sup>Comparable data for major groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products except subgroup 202, Dairy products.....	5,400	32,000	5,038	21,000
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	898	3,095	1,345	(D)

<sup>5</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

## MANUFACTURES—AREA STATISTICS

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY GROUP: 1954 AND 1947

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available

<sup>1</sup>There are 53,089 manufacturing employees (including central administrative office and auxiliary unit employment) in the Wilmington Standard Metropolitan Area (see Table 1). The data in this table represent employment at operating manufacturing establishments.<sup>2</sup>In order to avoid disclosing figures for individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries" line.<sup>3</sup>The 1954 and 1947 "All industries" totals are not strictly comparable because of differences in coverage of loggers and fluid milk distributors. See discussion in Introduction and footnote to Table 4 for comparable figures at the State level.<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

## MANUFACTURES—AREA STATISTICS

Table 1.—MANUFACTURING EMPLOYMENT AT OPERATING ESTABLISHMENTS AND CENTRAL ADMINISTRATIVE OFFICES AND AUXILIARIES FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS: 1954 AND EARLIER YEARS

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State standard metropolitan areas, and year <sup>1</sup>	Total manufacturing employment		Employment at operating manufacturing establishments		Employment at administrative offices and auxiliaries	
	(Number)	Payroll (\$1,000)	Number	Payroll (\$1,000)	Number	Payroll (\$1,000)
District of Columbia:						
1954.....	21,723	97,011	20,399	90,083	1,324	6,928
1953 <sup>2</sup> .....	19,499	90,075	19,228	88,259	271	1,816
1952 <sup>2</sup> .....	18,008	72,049	17,930	71,481	<sup>3</sup> 78	<sup>3</sup> 568
1951 <sup>2</sup> .....	17,253	66,202	17,175	65,634	78	568
1950 <sup>2</sup> .....	17,282	61,981	17,118	60,905	164	1,076
1949 <sup>2</sup> .....	17,026	59,770	16,854	58,618	172	1,152
1954						
Standard metropolitan area:						
Washington, D. C. <sup>4</sup> .....	31,732	138,202	30,373	131,088	1,359	7,114

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954.

<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.

<sup>3</sup>The Washington (D.C.) Standard Metropolitan Area consists of District of Columbia; Montgomery and Prince Georges Counties in Maryland; Arlington and Fairfax Counties, and Alexandria City and Falls Church City in Virginia.

<sup>4</sup>The 1951 data are shown for 1952 as auxiliary and administrative unit data were not collected in 1952.

Table 2.—GENERAL STATISTICS FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES: 1954 AND EARLIER YEARS

STANDARD METROPOLITAN AREAS (Not applicable to the District of Columbia)							

NA Not available.

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cutoff was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures Volume for this period.

## MANUFACTURES--AREA STATISTICS

Table 3.--GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS, COUNTIES, AND URBAN PLACES: 1954 AND 1947  
(For explanation of column captions see Introduction)

Area, county, and place	Popula- tion, 1950	1954								1947	
		Estab- lish- ments, number	All employees		Production workers			Value added by manu- facture (\$1,000)	Capital expendi- tures, new (\$1,000)	All employees, number	Value added by manu- facture (\$1,000)

39	Miscellaneous manufacturers	22	1	165	727	114	213	406	1,025	( <sup>2</sup> )	17	147	658

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

<sup>3</sup>Comparable data are not available due to differences in the coverage between 1947 and 1954. The 1947 Census excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for those industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
	All industries except subgroup 202, total.....	17,752	136,836	17,030	95,267
20	Food and kindred products except subgroup 202, Dairy products.....	4,000	30,000	4,400	23,000

## MANUFACTURES--AREA STATISTICS

Table 1.—MANUFACTURING EMPLOYMENT AT OPERATING ESTABLISHMENTS AND CENTRAL ADMINISTRATIVE OFFICES AND AUXILIARIES FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS: 1954 AND EARLIER YEARS

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State, standard metropolitan areas, and year <sup>1</sup>	Total manufacturing employment		Employment at operating manufacturing establishments		Employment at administrative offices and auxiliaries	
	(Number)	Payroll (\$1,000)	Number	Payroll (\$1,000)	Number	Payroll (\$1,000)
Florida:						
1954.....	123,958	389,318	123,368	385,291	590	4,027
1951 <sup>2</sup> .....	104,864	281,851	103,973	280,095	891	1,756
1950 <sup>2</sup> .....	91,397	224,139	90,270	221,859	1,127	2,280
1949 <sup>2</sup> .....	34,227	204,334	83,691	202,366	536	1,968
1954						
Standard metropolitan areas:						
Jacksonville <sup>3</sup> .....	17,402	58,172	17,343	57,854	59	318
Miami <sup>4</sup> .....	24,317	80,212	24,229	79,470	88	742
Orlando <sup>5</sup> .....	4,318	15,547	4,125	14,451	193	1,096
Tampa-St. Petersburg <sup>6</sup> .....	22,907	70,924	22,873	70,750	34	174

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954.<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1951 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufacturers. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. Comparable data for 1951 and 1952 are not available. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.<sup>3</sup>The Jacksonville Standard Metropolitan Area consists of Duval County, Florida.<sup>4</sup>The Miami Standard Metropolitan Area consists of Dade County, Florida.<sup>5</sup>The Orlando Standard Metropolitan Area consists of Orange County, Florida.<sup>6</sup>The Tampa-St. Petersburg Standard Metropolitan Area consists of Hillsborough and Pinellas Counties, Florida.

STANDARD METROPOLITAN AREAS (None with 40,000 or more manufacturing employees in this State)						

NA Not available.

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1951 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cut-off was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1951 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments.) The standard errors associated with these estimates are published in the Annual Survey of Manufactures Volume for this period. Comparable data for 1951 and 1952 are not available.

## MANUFACTURES—AREA STATISTICS

Table 3.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS, COUNTIES, AND URBAN PLACES: 1954 AND 1947  
(For explanation of column captions see Introduction)

Area, county, and place	Popula- tion, 1950	1954								1947	
		Estab- lish- ments, number	All employees		Production workers			Value added by manu- facture (\$1,000)	Capital expendi- tures, new (\$1,000)	All employees, number	Value added by manu- facture (\$1,000)
			Number	Payroll (\$1,000)	Number	Man- hours (\$1,000)	Wages (\$1,000)

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

<sup>3</sup>Comparable data are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
	All industries except subgroups 202 and 2411, total.....	115,977	747,394	78,100	347,652
20	Food and kindred products except subgroup 202, Dairy products.....	26,000	173,000	19,000	90,000
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	13,033	45,858	15,726	47,229

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY GROUPS: 1954 AND 1947  
(This State contained no standard metropolitan area with 40,000 or more manufacturing employees in 1954 or 1947)

Table 6.—GENERAL STATISTICS FOR PRINCIPAL INDUSTRIAL COUNTIES, BY MAJOR INDUSTRY GROUP: 1954 AND 1947

(Principal industrial counties include all counties with 20,000 or more manufacturing employees. For explanation of column captions see Introduction)

Code	Major industry group	1954								1947

## MANUFACTURES—AREA STATISTICS

Table 1.—MANUFACTURING EMPLOYMENT AT OPERATING ESTABLISHMENTS AND CENTRAL ADMINISTRATIVE OFFICES AND AUXILIARIES FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS: 1954 AND EARLIER YEARS

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State, standard metropolitan areas, and year <sup>1</sup>	Total manufacturing employment		Employment at operating manufacturing establishments		Employment at administrative offices and auxiliaries	
	(Number)	Payroll (\$1,000)	Number	Payroll (\$1,000)	Number	Payroll (\$1,000)
Georgia:						
1954.....	303,278	854,522	301,290	843,557	1,988	10,965
1953 <sup>2</sup> .....	306,367	848,075	303,017	834,347	3,350	13,728
1952 <sup>2</sup> .....	294,506	751,043	292,342	742,243	<sup>3</sup> 2,164	<sup>3</sup> 8,800
1951 <sup>2</sup> .....	284,151	694,781	281,987	685,981	2,164	8,800
1950 <sup>2</sup> .....	292,273	650,897	288,926	640,269	3,347	10,628
1949 <sup>2</sup> .....	270,612	557,949	268,335	550,377	2,277	7,572
1954						
Standard metropolitan areas:						
Atlanta <sup>4</sup> .....	79,839	294,965	78,500	287,673	1,339	7,292
Augusta <sup>5</sup> .....	27,764	112,133	27,748	112,011	16	122
Chattanooga <sup>6</sup> .....	43,019	145,186	42,759	143,569	260	1,617
Columbus <sup>7</sup> .....	17,976	44,097	17,913	43,788	63	309
Macon <sup>8</sup> .....	10,770	31,441	10,542	30,137	228	1,304
Savannah <sup>9</sup> .....	13,412	47,774	13,323	47,275	89	499

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954.

<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.

<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952.

<sup>4</sup>The Atlanta Standard Metropolitan Area consists of Cobb, De Kalb and Fulton Counties, Georgia.

<sup>5</sup>The Augusta Standard Metropolitan Area consists of Richmond County, Georgia; Aiken County, South Carolina.

<sup>6</sup>The Chattanooga Standard Metropolitan Area consists of Walker County, Georgia; Hamilton County, Tennessee.

<sup>7</sup>The Columbus Standard Metropolitan Area consists of Chattahoochee and Muscogee Counties, Georgia; Russell County, Alabama.

<sup>8</sup>The Macon Standard Metropolitan Area consists of Bibb and Houston Counties, Georgia.

<sup>9</sup>The Savannah Standard Metropolitan Area consists of Chatham County, Georgia.

NA Not available.

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cutoff was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

D Withheld to avoid disclosing figures for individual companies.

NA Not Available.

<sup>1</sup>The 1947 data are not strictly comparable with the figures shown for 1954 due to differences in coverage of loggers and fluid milk distributors. See discussion in Introduction and footnotes to Table 4.<sup>2</sup>The boundaries of selected cities have been modified since 1947. In such cases the 1947 and 1954 data may not be strictly comparable.

Table 4.—GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1954 AND 1947

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.

Footnotes continued on next page

Footnotes for Table 4.--Continued.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

<sup>3</sup>The 1954 and 1947 "all industries" totals are not strictly comparable because of differences in scope between the two years in Major Groups 20 and 24 (see footnote 4).

<sup>4</sup>Comparable data for Major Groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products except subgroup 202, Dairy products.....	31,000	242,000	26,000	131,000
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	28,375	89,199	33,979	88,466

<sup>5</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

CHATTANOOGA STANDARD METROPOLITAN AREA ("All manufacturing" totals for the Chattanooga Standard Metropolitan Area (which includes Walker County in Georgia) appear in Table 3. Industry group statistics for this standard metropolitan area are shown in the 1954 Census of Manufactures report for the State of Tennessee.)											

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries" line.

<sup>2</sup>The 1954 and 1947 "All industries" totals are not strictly comparable because of differences in scope between the two years in Major group 20 (see footnote 3).

<sup>3</sup>Comparable data for Major group 20 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products except Sub-group 202, Dairy Products	9,358	92,147	8,825	59,300

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

Table 6.—GENERAL STATISTICS FOR PRINCIPAL INDUSTRIAL COUNTIES, BY MAJOR INDUSTRY GROUP: 1954 AND 1947

(Principal industrial counties include all counties with 20,000 or more manufacturing employees. For explanation of column captions see Introduction)

Code	Major industry group	1954								1947

# IDAHO (44 COUNTIES)

## MANUFACTURES—AREA STATISTICS

Table 1.—MANUFACTURING EMPLOYMENT AT OPERATING ESTABLISHMENTS AND CENTRAL ADMINISTRATIVE OFFICES AND AUXILIARIES FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS: 1954 AND EARLIER YEARS

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State, standard metropolitan areas, and year <sup>1</sup>	Total manufacturing employment		Employment at operating manufacturing establishments		Employment at administrative offices and auxiliaries	
	(Number)	Payroll (\$1,000)	Number	Payroll (\$1,000)	Number	Payroll (\$1,000)
Idaho:						
1954.....	23,895	90,742	23,722	89,507	173	1,235
1953 <sup>2</sup> .....	23,482	87,781	23,218	86,173	264	1,608
1952 <sup>2</sup> .....	20,016	83,165	19,623	81,149	<sup>3</sup> 393	<sup>2</sup> 2,016
1951 <sup>2</sup> .....	19,706	78,837	19,313	76,821	393	2,016
1950 <sup>2</sup> .....	15,832	56,860	15,815	56,784	17	76
1949 <sup>2</sup> .....	15,379	50,754	15,250	50,082	129	672
Standard Metropolitan Areas: (None in this State)						

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949.<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.<sup>3</sup>The 1951 data are shown for 1952 as auxiliary and administrative unit data were not collected in 1952.

Table 2.—GENERAL STATISTICS FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES: 1954 AND EARLIER YEARS

(For explanation of column captions see Introduction)

	STANDARD METROPOLITAN AREAS (None in this State)						

NA Not available. <sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cut-off was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>The 1947 data are not strictly comparable with the figures shown for 1954 due to differences in coverage of loggers and fluid milk distributors. See discussion in Introduction and footnotes to Table 4.

Table 4.—GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1954 AND 1947

(For explanation of column captions see Introduction)

Ind. code	Industry	1954									1947

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)<sup>3</sup>Comparable data are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
	All industries except subgroups 202 and 2411, total.....	19,260	149,713	15,612	101,674
20	Food and kindred products except subgroup 202, Dairy products.....	4,880	34,113	4,725	35,633
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	9,000	66,000	7,629	43,396

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

## MANUFACTURES—AREA STATISTICS

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY GROUPS: 1954 AND 1947  
(This State contained no standard metropolitan area with 40,000 or more manufacturing employees in 1954 or 1947)

Table 6.—GENERAL STATISTICS FOR PRINCIPAL INDUSTRIAL COUNTIES (THOSE WITH 20,000 OR MORE MANUFACTURING EMPLOYEES),  
BY MAJOR INDUSTRY GROUPS: 1954 AND 1947

(This State contained no county with 20,000 or more manufacturing employees in 1954 and 1947)

Springfield <sup>10</sup> .....	12,857	53,414	12,816	53,256	41	158

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954.<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952. In some instances, the figures have been withheld because the estimates did not meet publication standards.<sup>4</sup>The Chicago Standard Metropolitan Area consists of Cook, Du Page, Kane, Lake, and Will Counties, Illinois and Lake County, Indiana.<sup>5</sup>The Davenport-Rock Island-Moline Standard Metropolitan Area consists of Rock Island County, Illinois and Scott County, Iowa.<sup>6</sup>The Decatur Standard Metropolitan Area consists of Macon County, Illinois.<sup>7</sup>The Peoria Standard Metropolitan Area consists of Peoria and Tazewell Counties, Illinois.<sup>8</sup>The Rockford Standard Metropolitan Area consists of Winnebago County, Illinois.<sup>9</sup>The St. Louis Standard Metropolitan Area consists of Madison and St. Clair Counties, Illinois; St. Charles and St. Louis Counties and St. Louis City, Missouri.<sup>10</sup>The Springfield Standard Metropolitan Area consists of Sangamon County, Illinois.

Table 2.—GENERAL STATISTICS FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES: 1954 AND EARLIER YEARS

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cutoff was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

## MANUFACTURES—AREA STATISTICS

Table 3.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS, COUNTIES, AND URBAN PLACES: 1954 AND 1947  
(For explanation of column captions see Introduction)

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

The 1947 data are not strictly comparable with the figures shown for 1954 due to differences in coverage of loggers and fluid milk distributors.  
See discussion in Introduction and footnotes to Table 4.

Table 4.—GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1954 AND 1947  
(For explanation of column captions see Introduction)

1900	Ordinance and accessories.....	30	28	10,509	40,450	7,122	13,960	25,170	83,138	( <sup>2</sup> )	1,107	(D)	(D)

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

<sup>3</sup>The 1954 and 1947 "all industries" totals are not strictly comparable because of differences in scope between the two years in major groups 20 and 24 (see footnote 4).

<sup>4</sup>Comparable data for Major Groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 are classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products except sub- group 202, Dairy products.....	126,000	1,188,000	132,083	964,928
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	12,439	68,803	12,962	57,351

<sup>5</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordinance and Accessories." (Establishments which are Government-owned and operated are not included.)

## MANUFACTURES—AREA STATISTICS

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY GROUP: 1954 AND 1947

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries" line.

<sup>2</sup>The 1954 and 1947 "All industries" totals are not strictly comparable because of differences in scope between the two years in Major Group 20 (see footnote 3).

<sup>3</sup>Comparable data for Major Group 20 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products, except Sub-group 202, Dairy Products:				
	Chicago Standard Metropolitan Area	94,248	872,936	96,000	694,000
	Peoria Standard Metropolitan Area.	6,952	100,881	9,000	116,000
	St. Louis Standard Metropolitan Area.....	30,500	286,831	32,320	217,467

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

## MANUFACTURES—AREA STATISTICS

Table 6.--GENERAL STATISTICS FOR PRINCIPAL INDUSTRIAL COUNTIES, BY MAJOR INDUSTRY GROUP: 1954 AND 1947--Continued

(Principal industrial counties include all counties with 20,000 or more manufacturing employees. For explanation of column captions see Introduction)

D Withheld to avoid disclosing data for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing data for individual companies, the statistics for some industry groups are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the "All industries" line.<sup>2</sup>The 1954 and 1947 "All industries" totals are not strictly comparable because of differences in coverage of loggers and fluid milk distributors. See discussion in Introduction and footnote to Table 4 for comparable figures at the State level.<sup>3</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

Table 6.—GENERAL STATISTICS FOR PRINCIPAL INDUSTRIAL COUNTIES, BY MAJOR INDUSTRY GROUP: 1954 AND 1947

(Principal industrial counties include all counties with 20,000 or more manufacturing employees. For explanation of column captions see Introduction)

Code	Major industry group	1954							1947		
		Establishments, number	All employees		Production workers			Value added by manu- facture (\$1,000)	Capital expendit- ures, new (\$1,000)	All employees, number	Value added by manu- facture (\$1,000)
			Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)

Terre Haute <sup>11</sup> .....	10,455	40,821	10,419	40,677	36	144

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954.<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952.<sup>4</sup>The Chicago Standard Metropolitan Area consists of Lake County, Indiana; Cook, Du Page, Kane Lake and Will Counties, Illinois.<sup>5</sup>The Evansville Standard Metropolitan Area consists of Vanderburgh County, Indiana.<sup>6</sup>The Fort Wayne Standard Metropolitan Area consists of Allen County, Indiana.<sup>7</sup>The Indianapolis Standard Metropolitan Area consists of Marion County, Indiana.<sup>8</sup>The Louisville Standard Metropolitan Area consists of Clark and Floyd Counties, Indiana; Jefferson County, Kentucky.<sup>9</sup>The Muncie Standard Metropolitan Area consists of Delaware County, Indiana.<sup>10</sup>The South Bend Standard Metropolitan Area consists of St. Joseph County, Indiana.<sup>11</sup>The Terre Haute Standard Metropolitan Area consists of Vigo County, Indiana.

Table 2.—GENERAL STATISTICS FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES: 1954 AND EARLIER YEARS

(For explanation of column captions see Introduction)

Year	Establish- ments, number	All employees		Production workers		Value added by manufacture (\$1,000)				
		Number	Payroll (\$1,000)	Number	Wages (\$1,000)

NA Not available.

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cutoff was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

## MANUFACTURES—AREA STATISTICS

West Lafayette.....	11,873	5	74	233	50	104	135	284	4	(NA)	(NA)

D Withheld to avoid disclosing figures for individual companies.

NA Separate figures are not available, but are included in appropriate totals.

<sup>1</sup>The 1947 data are not strictly comparable with the figures shown for 1954 due to differences in coverage of loggers and fluid milk distributors.  
See discussion in Introduction and footnotes to Table 4.

Table 4.—GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1954 AND 1947

1900	Ordnance and accessories.....	17	13	7,669	35,707	5,954	12,594	26,532	48,191	( <sup>2</sup> )	1,335	(D)	(D)

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification contained in these figures. (See Introduction.)

<sup>3</sup>The 1954 and 1947 "all industries" totals are not strictly comparable because of differences in scope between the two years in major groups 20 and 24 (see footnote 4).

<sup>4</sup>Comparable data for Major groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 are classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products except subgroup 202, Dairy products.....	38,984	318,415	41,630	271,796
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	10,742	59,071	9,224	36,425

<sup>5</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

## MANUFACTURES—AREA STATISTICS

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY GROUP: 1954 AND 1947

(For explanation of column captions see Introduction)

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries" line.<sup>2</sup>The 1954 and 1947 "All industries" totals are not strictly comparable because of differences in scope between the two years in Major group 20 (see footnote 3).<sup>3</sup>Comparable data for Major group 20 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	Food and kindred products except Subgroup 202, Dairy Products:				
	Chicago Standard Metropolitan Area.....	94,248	872,936	96,000	694,000
	Indianapolis Standard Metropolitan Area.....	9,654	75,833	10,563	63,719
	South Bend Standard Metropolitan Area.....	1,424	13,257	1,400	9,350

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

## MANUFACTURES—AREA STATISTICS

Table 6.—GENERAL STATISTICS FOR PRINCIPAL INDUSTRIAL COUNTIES, BY MAJOR INDUSTRY GROUP: 1954 AND 1947

(Principal industrial counties include all counties with 20,000 or more manufacturing employees. For explanation of column captions see Introduction)

Code	Major industry group	1954								1947

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954. <sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954. <sup>3</sup>The 1951 data are shown for 1952, as auxiliary and administrative unit data were not collected in 1952. <sup>4</sup>The Cedar Rapids Standard Metropolitan Area consists of Linn County, Iowa. <sup>5</sup>The Davenport-Rock Island-Moline Standard Metropolitan Area consists of Scott County, Iowa; Rock Island County, Illinois. <sup>6</sup>The Des Moines Standard Metropolitan Area consists of Polk County, Iowa. <sup>7</sup>The Dubuque Standard Metropolitan Area consists of Dubuque County, Iowa. <sup>8</sup>The Omaha Standard Metropolitan Area consists of Pottawattamie County, Iowa; Douglas and Sarpy Counties, Nebraska. <sup>9</sup>The Sioux City Standard Metropolitan Area consists of Woodbury County, Iowa. <sup>10</sup>The Waterloo Standard Metropolitan Area consists of Black Hawk County, Iowa.

STANDARD METROPOLITAN AREAS (None with 40,000 or more manufacturing employees in this State)							

NA Not available.

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging Camps and Contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cutoff was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>The 1947 data are not strictly comparable with the figures shown for 1954 due to differences in coverages of loggers and fluid milk distributors.

See discussion in Introduction and footnotes to Table 4.

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

<sup>3</sup>Comparable data for Major groups 20 and 24 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 are classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
	All industries except subgroups 202 and 2411, total.....	156,060	1,188,523	137,490	654,200
20	Food and kindred products except subgroup 202, Dairy products.....	44,654	313,894	43,508	271,853
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	5,618	27,635	4,700	19,990

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories". (Establishments which are Government-owned and operated are not included.)

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY GROUPS: 1954 AND 1947  
(This State contained no standard metropolitan area with 40,000 or more manufacturing employees in 1954 or 1947)

## MANUFACTURES—AREA STATISTICS

Table 6.—GENERAL STATISTICS FOR PRINCIPAL INDUSTRIAL COUNTIES, BY MAJOR INDUSTRY GROUP: 1954 AND 1947

(Principal industrial counties include all counties with 20,000 or more manufacturing employees. For explanation of column captions see Introduction)

D Withheld to avoid disclosing data for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing data for individual companies, the statistics for some industry groups are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the "All industries" line.<sup>2</sup>The 1954 and 1947 "All industries" totals are not strictly comparable because of differences in coverage of loggers and fluid milk distributors. See discussion in Introduction and footnote to Table 4 for comparable figures at the State level.

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1954

20 Food and kindred products	26 Pulp, paper and products	32 Stone, clay, and glass products	38 Instruments and related products
21 Tobacco manufactures	27 Printing and publishing	33 Primary metal industries	39 Miscellaneous manufactures (Includes Group 19 Ordinance and accessories)
22 Textile mill products	28 Chemicals and products	34 Fabricated metal products	
23 Apparel and related products	29 Petroleum and coal products	35 Machinery, except electrical	
24 Lumber and wood products	30 Rubber products	36 Electrical machinery	
25 Furniture and fixtures	31 Leather and leather goods	37 Transportation equipment	

(Counties and size classes in which no manufacturing establishments were reported are omitted)

## MANUFACTURES—AREA STATISTICS

Table 1.—MANUFACTURING EMPLOYMENT AT OPERATING ESTABLISHMENTS AND CENTRAL ADMINISTRATIVE OFFICES AND AUXILIARIES FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS: 1954 AND EARLIER YEARS

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State, standard metropolitan areas, and year <sup>1</sup>	Total manufacturing employment		Employment at operating manufacturing establishments		Employment at administrative offices and auxiliaries	
	(Number)	Payroll (\$1,000)	Number	Payroll (\$1,000)	Number	Payroll (\$1,000)
Kansas:						
1954.....	131,432	560,483	131,017	558,457	415	2,026
1953 <sup>2</sup> .....	137,572	567,027	136,886	563,615	686	3,412
1952 <sup>2</sup> .....	141,777	552,129	140,346	548,033	<sup>3</sup> 1,431	<sup>3</sup> 4,096
1951 <sup>2</sup> .....	113,305	421,230	111,874	417,134	1,431	4,096
1950 <sup>2</sup> .....	88,389	285,855	87,622	283,031	767	2,824
1949 <sup>2</sup> .....	83,413	248,042	82,090	243,790	1,323	4,252
1954						
Standard metropolitan areas:						
Kansas City <sup>4</sup> .....	118,053	515,791	115,132	497,764	2,921	18,027
Topeka <sup>5</sup> .....	6,174	24,060	6,010	23,711	164	349
Wichita <sup>6</sup> .....	53,260	237,765	53,190	237,206	70	559

<sup>1</sup> Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954.<sup>2</sup> The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.<sup>3</sup> The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952.<sup>4</sup> The Kansas City (Kansas)-Kansas City (Missouri) Standard Metropolitan Area consists of Johnson and Wyandotte Counties, Kansas; Clay and Jackson Counties, Missouri.<sup>5</sup> The Topeka Standard Metropolitan Area consists of Shawnee County, Kansas.<sup>6</sup> The Wichita Standard Metropolitan Area consists of Sedgwick County, Kansas.

Table 2.—GENERAL STATISTICS FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES: 1954 AND EARLIER YEARS

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cutoff was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments.) The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

## MANUFACTURES—AREA STATISTICS

Table 3.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS, COUNTIES, AND URBAN PLACES: 1954 AND 1947

(For explanation of column captions see Introduction)

Area, county, and place	Popula- tion, 1950	1954								1947	
		Estab- lish- ments, number	All employees		Production workers			Value added by manu- facture (\$1,000)	Capital expendi- tures, new (\$1,000)	All employees, number	Value added by manu- facture (\$1,000)
			Number	Payroll (\$1,000)	Number	Man- hours (\$1,000)	Wages (\$1,000)

NOTE: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)<sup>3</sup>Comparable data are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20	All industries except subgroups 202 and 2411, total.....	127,040	1,022,650	72,994	452,139
24	Food and kindred products except subgroup 202, Dairy products.....	19,525	147,529	26,053	143,149
24	Lumber and wood products except Industry 2411, logging camps and contractors.....	1,158	5,993	935	3,731

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

## MANUFACTURES—AREA STATISTICS

115-9

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY GROUP: 1954 AND 1947

(For explanation of column captions see Introduction)

Code	Industry group	Establishments, number	1954							1947		
			All employees		Production workers			Value added by manufacture	Capital expenditures, new	All employees, number	Value added by manufacture	
			Number	Payroll (\$1,000)	Number	Man-hours ((1,000)	Wages (\$1,000)					
			"All manufacturing" totals for the Kansas City (Kansas) - Kansas City (Missouri) Standard Metropolitan Area (which includes Johnson and Wyandotte Counties in Kansas) appear in Table 3. Industry group statistics for this area are shown in the 1954 Census of Manufactures report for the State of Missouri.

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries" line.<sup>2</sup>The 1954 and 1947 "All industries" totals are not strictly comparable because of differences in coverage of loggers and fluid milk distributors. See discussion in Introduction and footnote to Table 4 for comparable figures at the State level.<sup>3</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-- owned and operated are not included.)

## MANUFACTURES—AREA STATISTICS

## MANUFACTURES—AREA STATISTICS

Table 1.—MANUFACTURING EMPLOYMENT AT OPERATING ESTABLISHMENTS AND CENTRAL ADMINISTRATIVE OFFICES AND AUXILIARIES FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS: 1954 AND EARLIER YEARS

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State standard metropolitan areas, and year <sup>1</sup>	Total manufacturing employment		Employment at operating manufacturing establishments		Employment at administrative offices and auxiliaries	
	(Number)	Payroll (\$1,000)	Number	Payroll (\$1,000)	Number	Payroll (\$1,000)
Kentucky:						
1954.....	151,113	553,203	146,434	529,206	4,679	23,997
1953 <sup>2</sup> .....	150,319	532,300	148,977	524,492	1,342	7,808
1952 <sup>2</sup> .....	145,213	475,770	143,599	469,382	<sup>3</sup> 1,614	<sup>3</sup> 6,388
1951 <sup>2</sup> .....	147,323	463,968	145,709	457,580	1,614	6,388
1950 <sup>2</sup> .....	138,444	391,730	136,727	385,478	1,717	6,252
1949 <sup>2</sup> .....	124,936	336,009	123,711	331,713	1,225	4,296
1954						
Standard metropolitan areas:						
Cincinnati <sup>4</sup> .....	154,519	691,713	151,317	673,358	3,202	18,355
Huntington-Ashland <sup>5</sup> .....	24,722	100,137	24,178	97,212	544	2,925
Lexington <sup>6</sup> .....	4,420	13,635	4,317	13,156	103	479
Louisville <sup>7</sup> .....	88,539	375,510	84,653	354,192	3,886	21,318

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954.

<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.

<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952.

<sup>4</sup>The Cincinnati Standard Metropolitan Area consists of Campbell and Kenton Counties, Kentucky; Hamilton County, Ohio.

<sup>5</sup>The Huntington-Ashland Standard Metropolitan Area consists of Boyd County, Kentucky; Lawrence County, Ohio; Cabell and Wayne Counties, West Virginia.

<sup>6</sup>The Lexington Standard Metropolitan Area consists of Fayette County, Kentucky.

<sup>7</sup>The Louisville Standard Metropolitan Area consists of Jefferson County, Kentucky; Clark and Floyd Counties, Indiana.

Table 2.—GENERAL STATISTICS FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES: 1954 AND EARLIER YEARS

(For explanation of column captions see Introduction)

NA Not available.

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cut-off was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

398 399	Miscellaneous manufactures <sup>4</sup> ..	57	11	1,563	5,981	1,284	2,686	4,663	9,340	( <sup>2</sup> )	(D)	722	2,304
3988	Morticians' goods.....	10	2	152	423	116	229	258	744	1,570	(D)	216	695
3993	Signs and advertising displays.	31	5	396	1,247	300	664	839	1,844	2,992	65	370	1,316

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction.)

<sup>3</sup>Comparable data are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 are classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
	All industries except subgroups 202 and 2411, total.....	141,760	1,198,782	127,922	730,525
20	Food and kindred products except subgroup 202, Dairy products.....	22,007	262,535	23,004	276,017
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	8,296	30,393	11,765	37,319

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories."  
(Establishments which are Government-owned and operated are not included.)

## MANUFACTURES—AREA STATISTICS

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY GROUP: 1954 AND 1947  
(For explanation of column captions see Introduction)

Code	Industry group	Establish- ments, number	1954						1947		
			All employees		Production workers			Value added by manufacture	Capital expendi- tures, new	All employees, number	Value added by manufacture
			Number	Payroll (\$1,000)	Number	Man-hours (11,000)	Wages (\$1,000)				
"All manufacturing" totals for the Cincinnati Standard Metropolitan Area (which includes Campbell and Kenton Counties in Kentucky) appear in Table 3. Industry group statistics for this area are shown in the 1954 Census of Manufactures report for the State of Ohio											
LOUISVILLE STANDARD METROPOLITAN AREA (Consists of Jefferson County, Kentucky; Clark and Floyd Counties, Indiana)

See footnotes at end of table.

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY GROUP: 1954 AND 1947—Con.

Code	Industry group	Establishments, number	1954							1947	
			All employees		Production workers			Value added by manufacture (\$1,000)	Capital expenditures, new (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
			Number	Payroll (\$1,000)	Number	Man-hours ((1,000)	Wages (\$1,000)				
38	Instruments & related prod.	6	(L)	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)
39	Miscellaneous manufactures <sup>4</sup>	30	4,457	(D)	3,689	(D)	(D)	(D)	(D)	932	3,840

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries" line.

<sup>2</sup>The 1954 and 1947 "All industries" totals are not strictly comparable because of differences in scope between the two years in Major Group 20 (see footnote 3).

<sup>3</sup>Comparable data for Major Group 20 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Industry	1954		1947	
	All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
20 Food and kindred products except Subgroup 202, Dairy Products, Louisville Standard Metropolitan Area.	11,896	142,912	12,378	145,743

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

Table 6.—GENERAL STATISTICS FOR PRINCIPAL INDUSTRIAL COUNTIES, BY MAJOR INDUSTRY GROUP: 1954 AND 1947

(Principal industrial counties include all counties with 20,000 or more manufacturing employees. For explanation of column captions see Introduction)

Code	Major industry group	1954								1947

## MANUFACTURES—AREA STATISTICS

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1954—Continued  
(Counties and size classes in which no manufacturing establishments were reported are omitted)

[illegible]

# LOUISIANA (64 PARISHES)

## MANUFACTURES—AREA STATISTICS

Table 1.—MANUFACTURING EMPLOYMENT AT OPERATING ESTABLISHMENTS AND CENTRAL ADMINISTRATIVE OFFICES AND AUXILIARIES FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS: 1954 AND EARLIER YEARS

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State, standard metropolitan areas, and year <sup>1</sup>	Total manufacturing employment		Employment at operating manufacturing establishments		Employment at administrative offices and auxiliaries	
	(Number)	Payroll (\$1,000)	Number	Payroll (\$1,000)	Number	Payroll (\$1,000)
Louisiana:						
1954.....	146,330	538,969	144,757	531,639	1,573	7,330
1953 <sup>2</sup> .....	152,549	533,448	150,808	526,168	1,741	7,280
1952 <sup>2</sup> .....	135,446	459,114	134,147	454,370	1,299	4,744
1951 <sup>2</sup> .....	135,354	415,921	134,055	411,177	1,299	4,744
1950 <sup>2</sup> .....	126,035	358,251	123,952	350,751	2,083	7,500
1949.....	119,719	316,725	117,246	311,369	2,473	5,356
1954						
Standard metropolitan areas:						
Baton Rouge <sup>4</sup> .....	18,909	98,547	18,882	98,399	27	148
New Orleans <sup>5</sup> .....	53,777	196,082	53,313	193,617	464	2,465
Shreveport <sup>6</sup> .....	8,786	32,168	8,037	28,592	749	3,576

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954.<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952.<sup>4</sup>The Baton Rouge Standard Metropolitan Area consists of East Baton Rouge Parish, Louisiana.<sup>5</sup>The New Orleans Standard Metropolitan Area consists of Jefferson, Orleans and St. Bernard Parishes, Louisiana.<sup>6</sup>The Shreveport Standard Metropolitan Area consists of Bossier and Caddo Parishes, Louisiana.

NA Not available.

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cut-off was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures Volume for this period.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>The 1947 data are not strictly comparable with the figures shown for 1954 due to differences in coverage of loggers and fluid milk distributors. See discussion in Introduction and footnotes to Table 4.

<sup>2</sup>New Orleans city is coextensive with Orleans Parish.

## MANUFACTURES--AREA STATISTICS

Table 4.—GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1954 AND 1947

38	Instruments and related products.....	8	2	161	461	123	233	249	733	( <sup>2</sup> )	11	102	248
39	Miscellaneous manufactures <sup>4</sup>	72	12	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)	919	3,313
398	Miscellaneous manufactures...	50	8	4,113	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(D)
3981	Brooms and brushes.....	13	1	181	388	139	256	260	478	1,198	(D)	84	(D)
3988	Morticians' goods.....	9	1	223	621	193	398	461	808	1,575	56	216	(D)

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "all industries" line.

<sup>2</sup>The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction)

<sup>3</sup>Comparable data are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude establishments in S.I.C. Industry 2411, Logging Camps and Contractors, which are included in the scope of the 1954 Census; the 1947 Census also excludes plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
	All industries except subgroups 202 and 2411, total.....	139,518	1,150,718	131,857	691,777
20	Food and kindred products except subgroup 202, Dairy products.....	28,000	192,000	28,148	136,852
24	Lumber and wood products except Industry 2411, Logging camps and contractors.....	16,992	60,342	29,100	84,172

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY GROUP: 1954 AND 1947  
(For explanation of column captions see Introduction)

Code	Industry group	Establishments, number	1954							1947

## MANUFACTURES—AREA STATISTICS

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY GROUP: 1954 AND 1947--Continued  
(For explanation of column captions see Introduction)

Code	Industry group	Establishments, number	1954							1947	
			All employees		Production workers			Value added by manufacture (\$1,000)	Capital expenditures, new (\$1,000)	All employees, number	Value added by manufacture (\$1,000)
			Number	Payroll (\$1,000)	Number	Man-hours ((1,000)	Wages (\$1,000)				
39	Miscellaneous manufactures <sup>4</sup> .	31	945	3,258	784	1,618	2,433	5,059	192	532	2,028
398 399	Miscellaneous manufactures <sup>4</sup> ....	19	865	3,044	722	1,495	2,289	4,619	141	464	1,752

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>In order to avoid disclosing figures for individual companies, the statistics for some industry groups (3-digit are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries" line.

<sup>2</sup>The 1954 and 1947 "All industries" totals are not strictly comparable because of differences in scope between the two years in Major group 20 (see footnote 3).

<sup>3</sup>Comparable data for Major group 20 are not available due to differences in the coverage between 1947 and 1954. The 1947 Census figures exclude plants processing and distributing fluid milk which in 1954 were classified in Industry Group 202, Dairy Products. In the special comparative table below, data for these industries have been subtracted from the appropriate totals:

Code	Industry	1954		1947	
		All employees, number	Value added by manufacture (\$1000)	All employees, number	Value added by manufacture (\$1000)
20	Food and kindred products except Sub-group 202, Dairy Products	11,938	96,497	11,500	63,000

<sup>4</sup>Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." (Establishments which are Government-owned and operated are not included.)

Table 6.—GENERAL STATISTICS FOR PRINCIPAL INDUSTRIAL PARISHES, BY MAJOR INDUSTRY GROUP: 1954 AND 1947

(Principal industrial parishes include all parishes with 20,000 or more manufacturing employees. For explanation of column captions see Introduction)

Code	Major industry group	1954								1947	
		Establish- ments, number	All employees		Production workers			Value added by manu- facture (\$1,000)	Capital expendit- ures, new (\$1,000)	All employees, number	Value added by manu- facture (\$1,000)
			Number	Pay roll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)

D Withheld to avoid disclosing data for individual companies.

<sup>1</sup>In order to avoid disclosing data for individual companies, the statistics for some industry groups are not shown. Industry groups reporting less than 100 employees are also omitted. They are included, however, in the "All industries" line.<sup>2</sup>The 1954 and 1947 "All industries" totals are not strictly comparable because of differences in coverage of loggers and fluid milk distributors. See discussion in Introduction and footnote to Table 4 for comparable figures at the State level.

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR PARISHES: 1954—Continued  
(Parishes and size classes in which no manufacturing establishments were reported are omitted)

## MANUFACTURES—AREA STATISTICS

Table 1.—MANUFACTURING EMPLOYMENT AT OPERATING ESTABLISHMENTS AND CENTRAL ADMINISTRATIVE OFFICES AND AUXILIARIES FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS: 1954 AND EARLIER YEARS

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State, standard metropolitan areas, and year <sup>1</sup>	Total manufacturing employment		Employment at operating manufacturing establishments		Employment at administrative offices and auxiliaries	
	(Number)	Payroll (\$1,000)	Number	Payroll (\$1,000)	Number	Payroll (\$1,000)
Maine:						
1954.....	104,507	325,048	104,025	322,158	482	2,890
1953 <sup>2</sup> .....	110,187	354,377	109,351	350,777	836	3,600
1952 <sup>2</sup> .....	108,321	323,033	107,590	320,517	<sup>3</sup> 731	<sup>3</sup> 2,516
1951 <sup>2</sup> .....	107,402	307,960	106,671	305,444	731	2,516
1950 <sup>2</sup> .....	108,309	281,757	108,050	280,357	259	1,400
1949 <sup>2</sup> .....	102,134	258,557	101,458	256,185	676	2,372
1954						
Standard metropolitan area:						
Portland <sup>4</sup> .....	13,161	45,884	13,125	45,626	36	258

<sup>1</sup>Employment data for administrative offices and auxiliaries on a State basis are not available for the years prior to 1949. Similar data for standard metropolitan areas are available only for 1954.<sup>2</sup>The employment figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period. The employment figures for administrative and auxiliary units were compiled chiefly from Bureau of Old-Age and Survivors Insurance records and are not strictly comparable with the figures for these units that were collected by the Bureau of the Census for the year 1954.<sup>3</sup>The 1951 data are shown for 1952 since auxiliary and administrative unit data were not collected in 1952.<sup>4</sup>The Portland Standard Metropolitan Area consists of Portland, South Portland, and Westbrook cities; Cape Elizabeth and Falmouth towns in Cumberland County, Maine.

Table 2.—GENERAL STATISTICS FOR THE STATE AND ITS STANDARD METROPOLITAN AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES: 1954 AND EARLIER YEARS

(For explanation of column captions see Introduction)

Year	Establishments, number	All employees		Production workers		Value added by manufacture (\$1,000)	
		Number	Payroll (\$1,000)	Number	Wages (\$1,000)		
		MAINE

		STANDARD METROPOLITAN AREA (None with 40,000 or more manufacturing employees in this State)					

NA Not available.

<sup>1</sup>The 1954 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for the Annual Survey years 1949-1953 or earlier Census years. In addition, the 1954 Census and Annual Survey years include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. See footnotes to Table 4 for comparable 1954 and 1947 totals. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: figures for 1935 and later years excluded data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1954 and 1947 was one employee, for 1939-1921 manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cutoff was \$500. (This change in procedure has not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

<sup>2</sup>The employment and payroll figures for operating manufacturing establishments for 1949-1953 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volume for this period.

## MANUFACTURES—AREA STATISTICS
